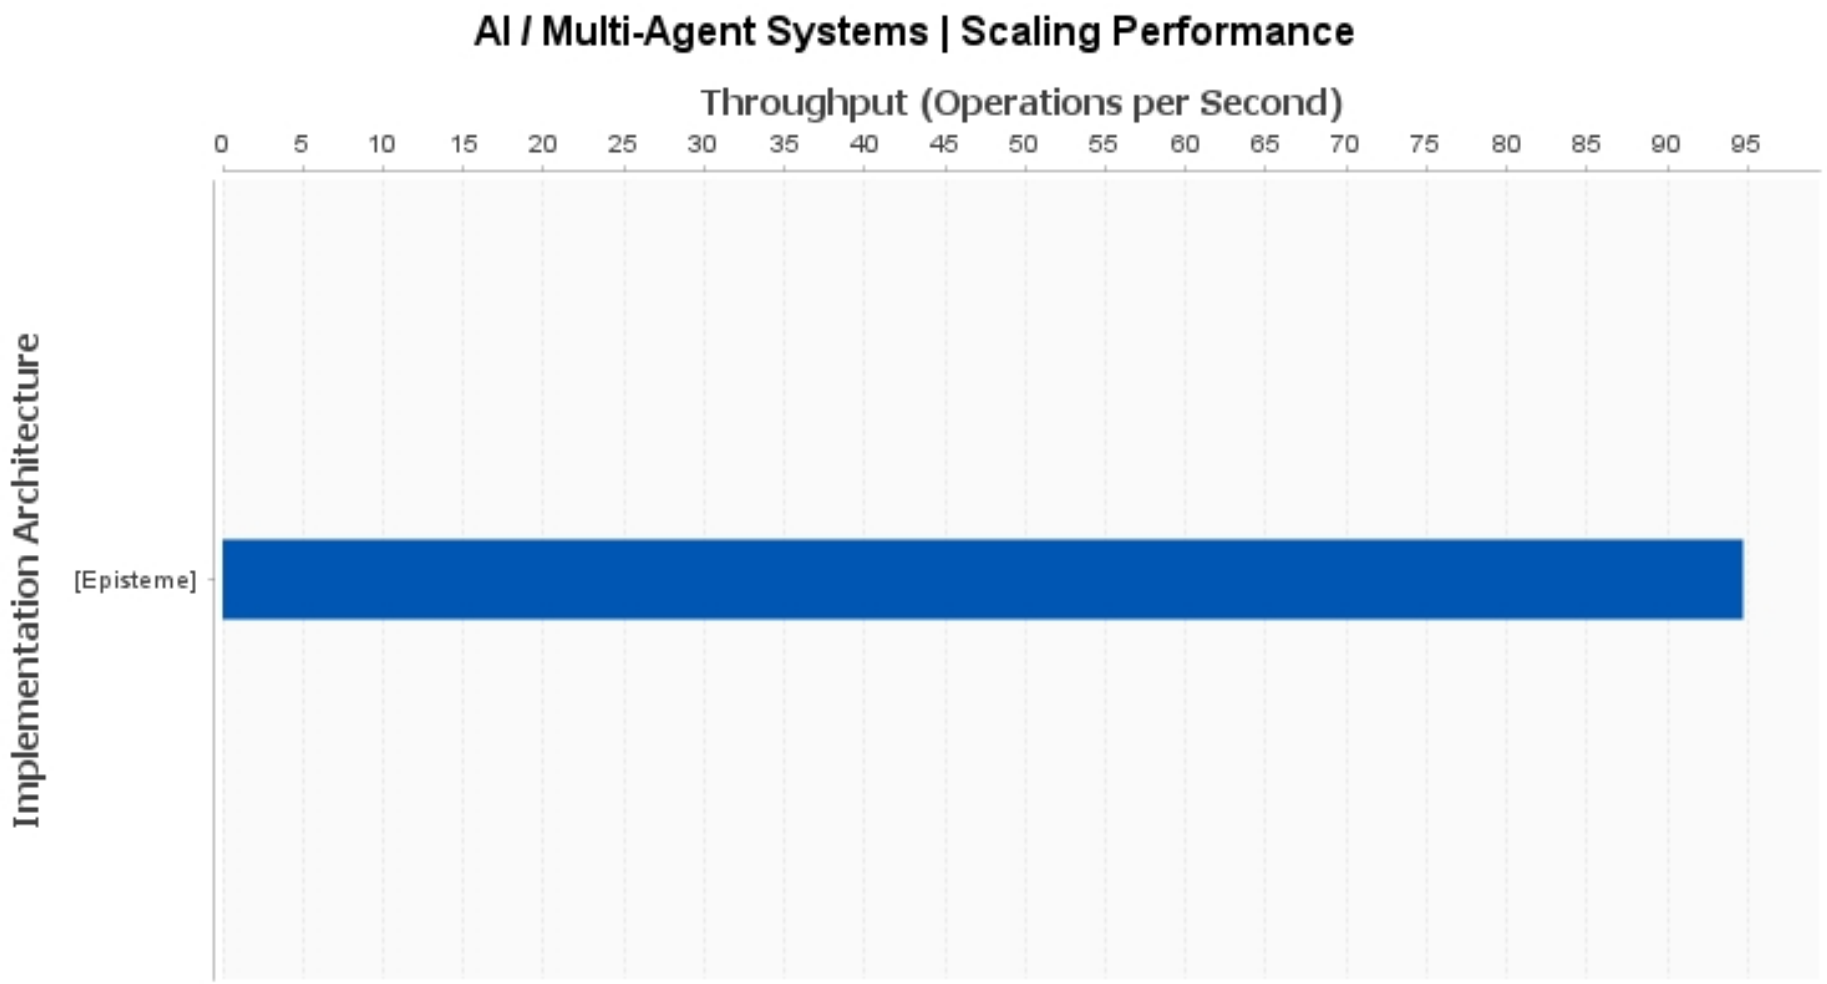
Episteme Benchmark Executive Summary

Precision Performance Analytics | Generated: 2026-03-04 17:23:37

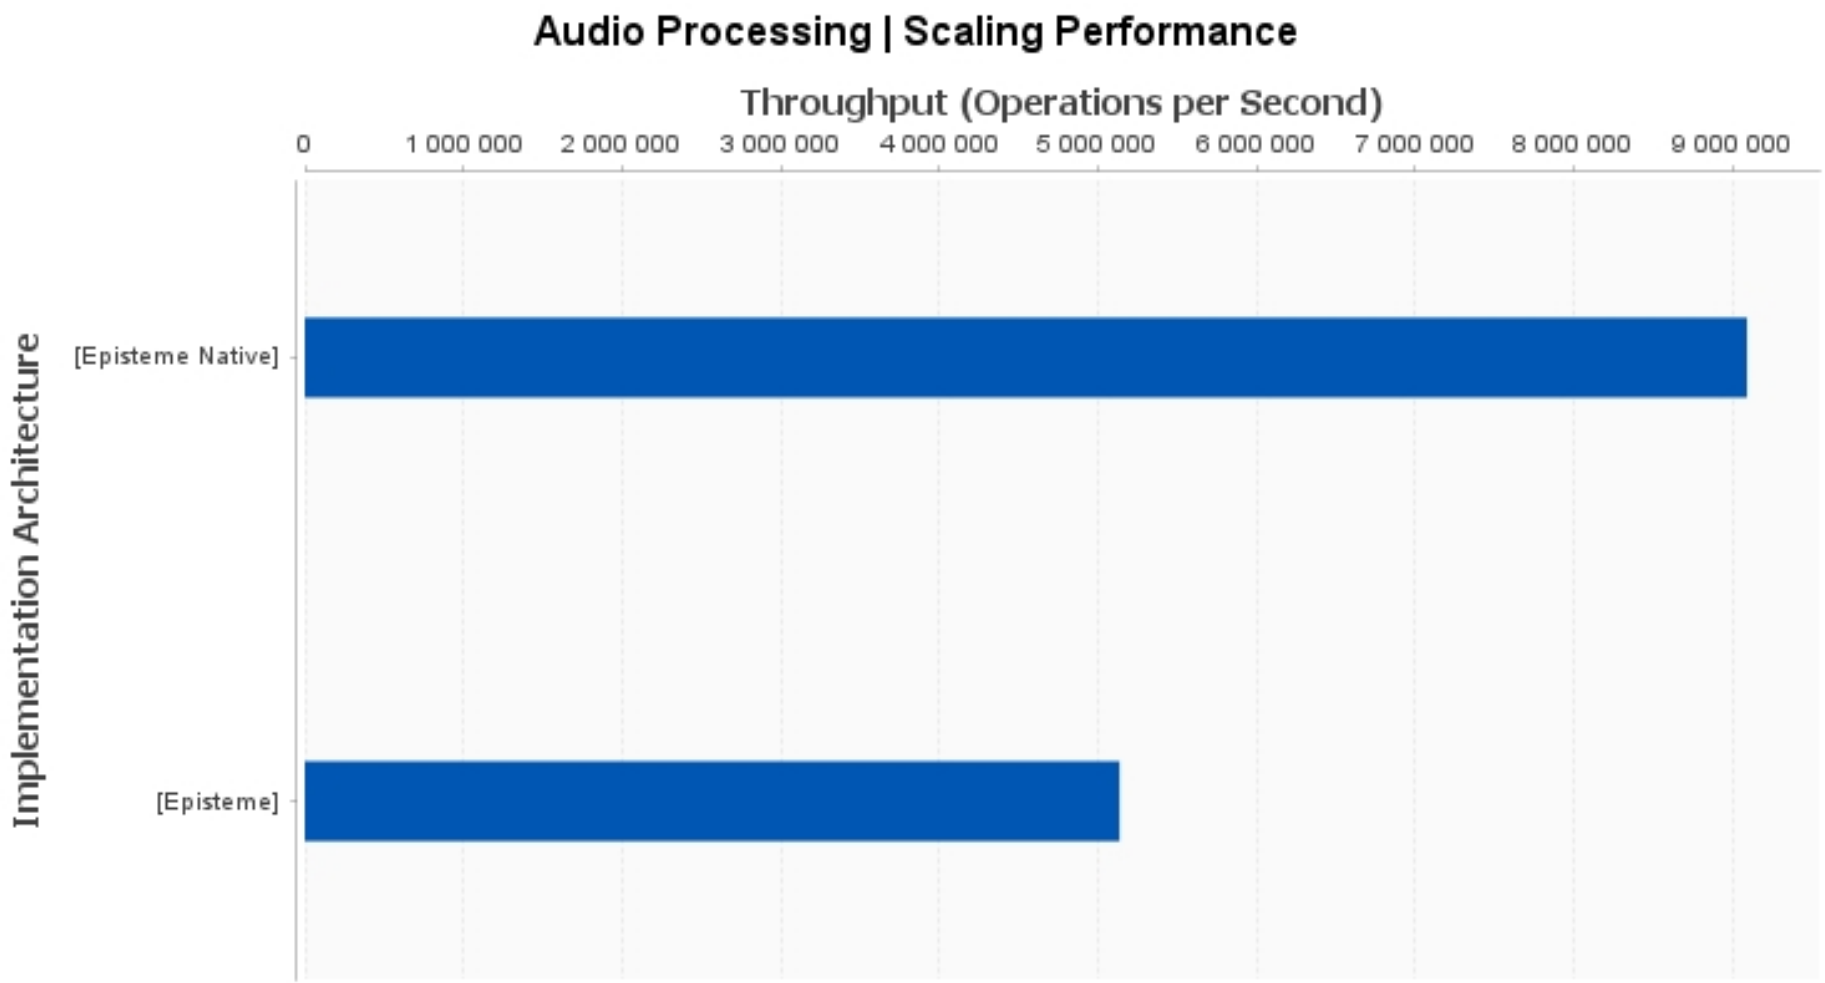
Operating System	Windows 11 (amd64)
Java Runtime	25 (Oracle Corporation)
Logical Processors	4

AI / Multi-Agent Systems

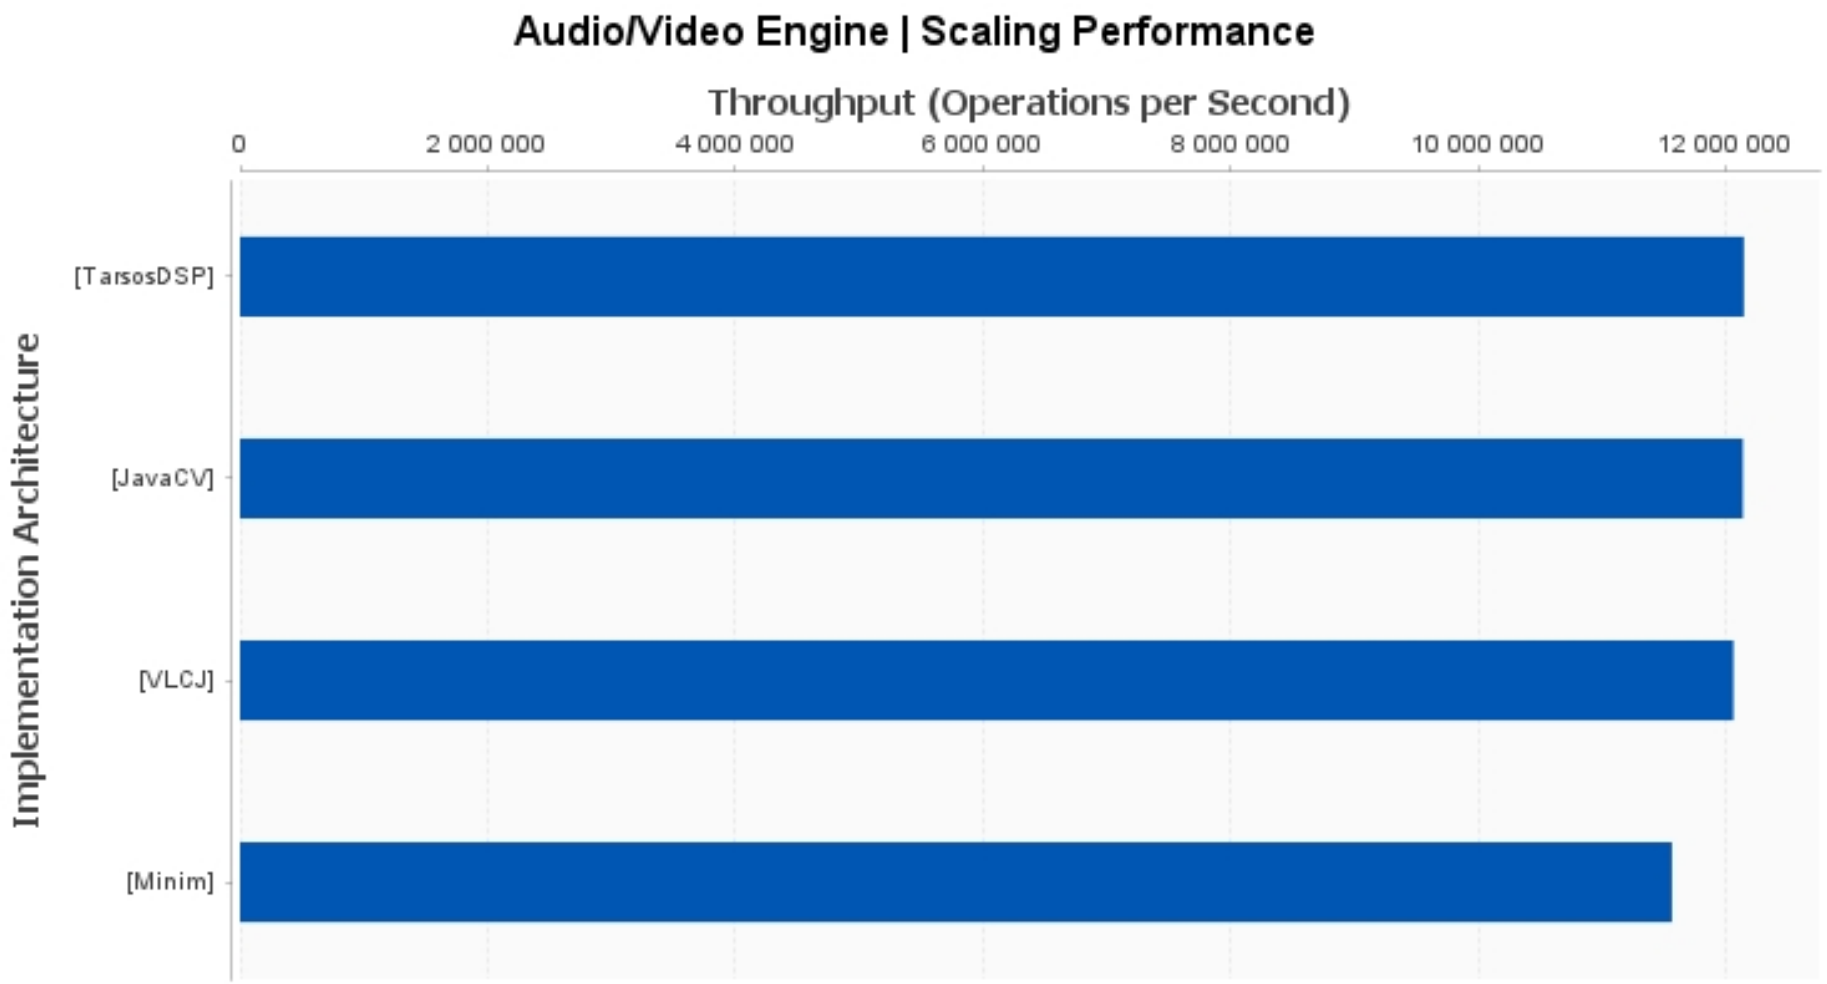
Audio Processing



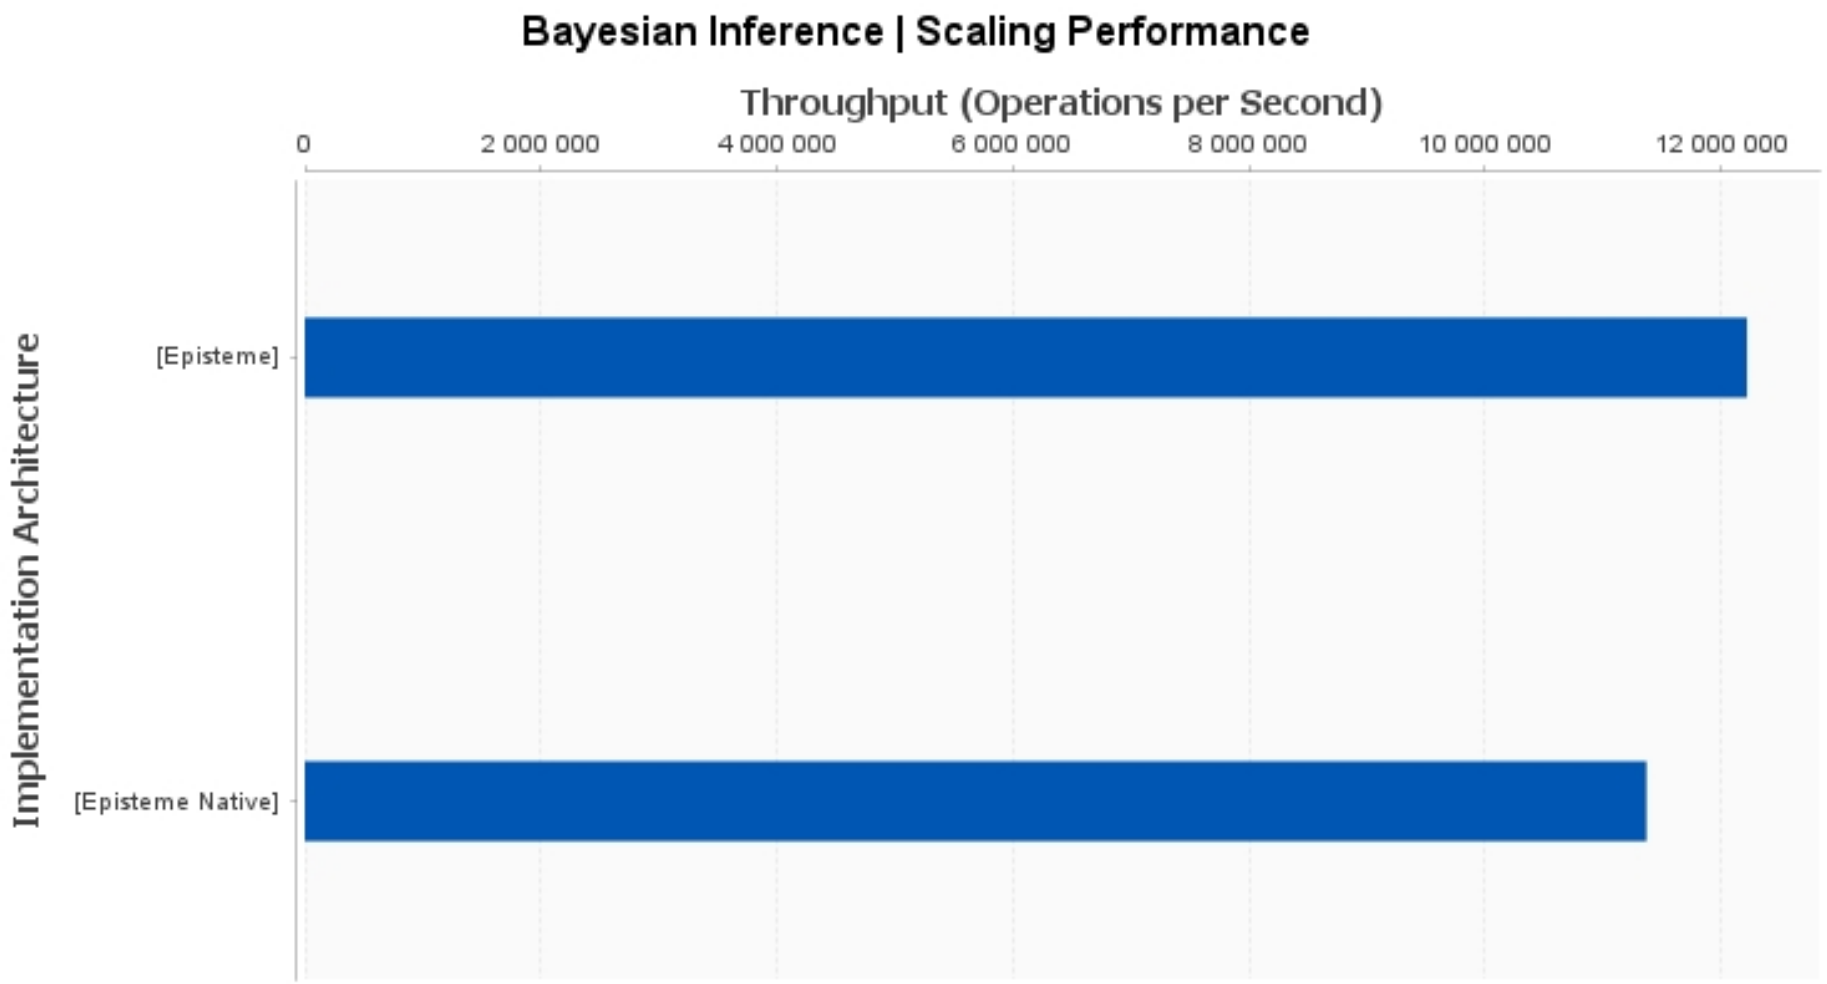
Audio/Video Engine



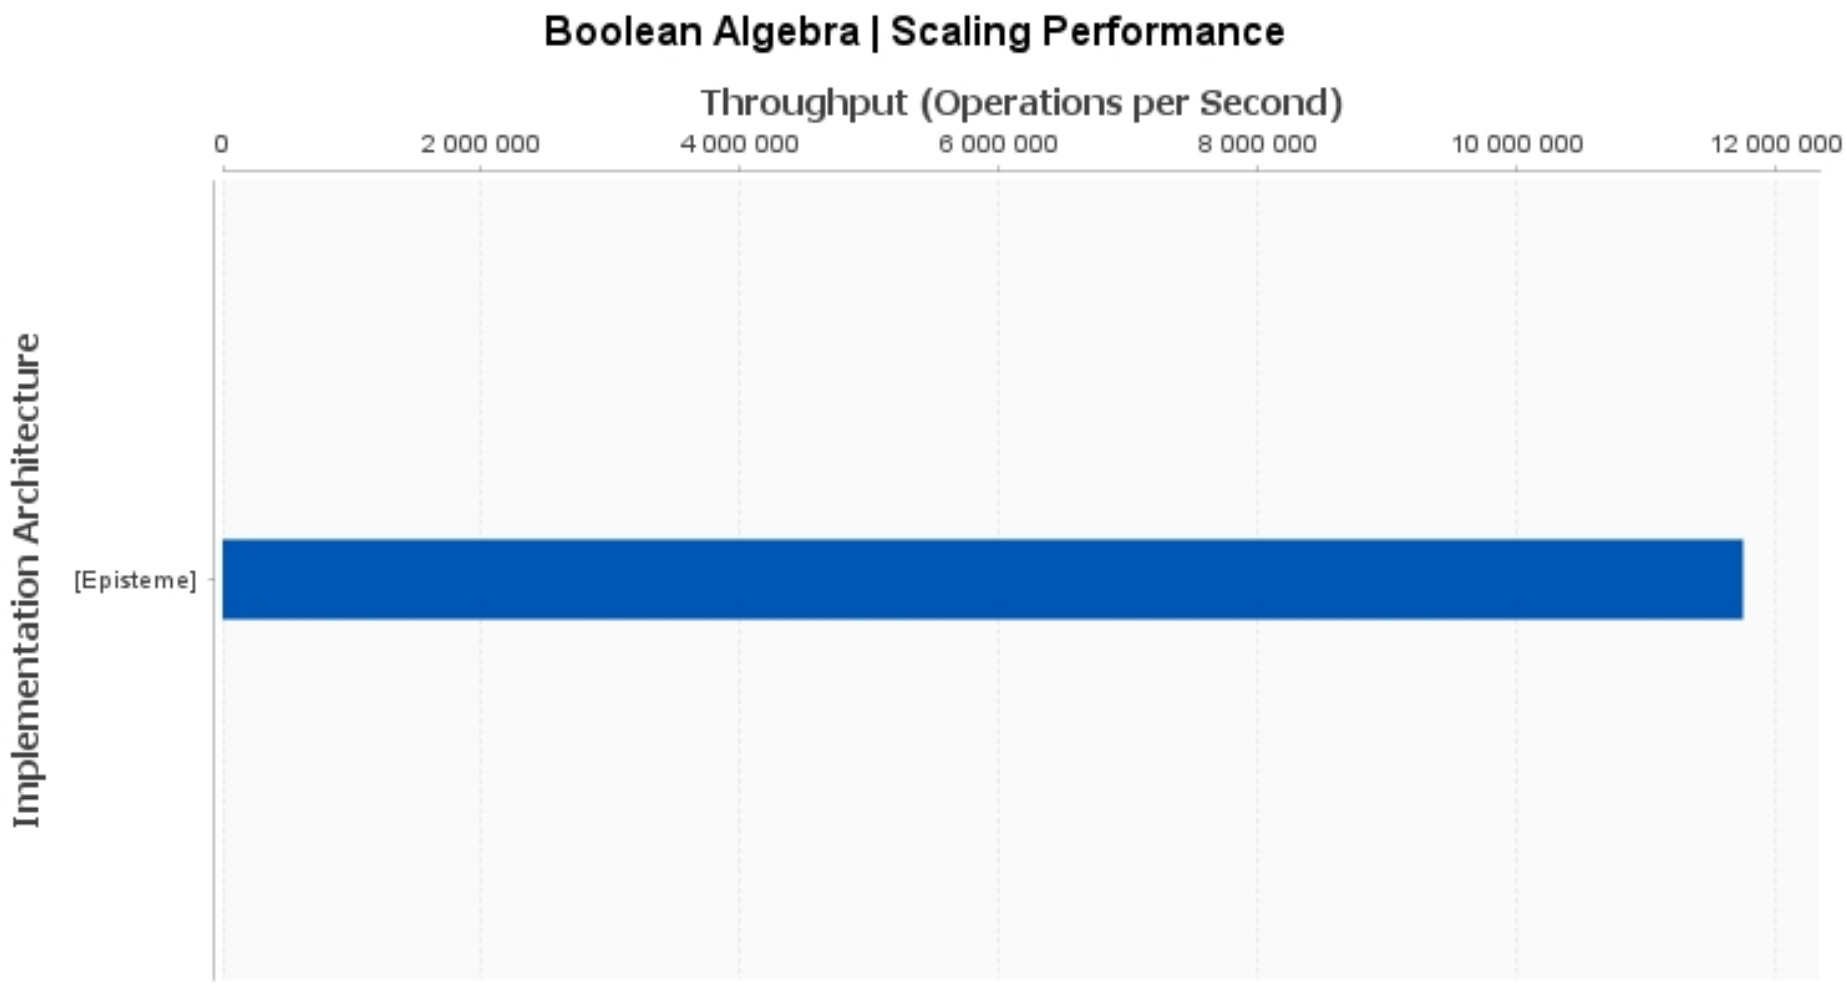
Bayesian Inference



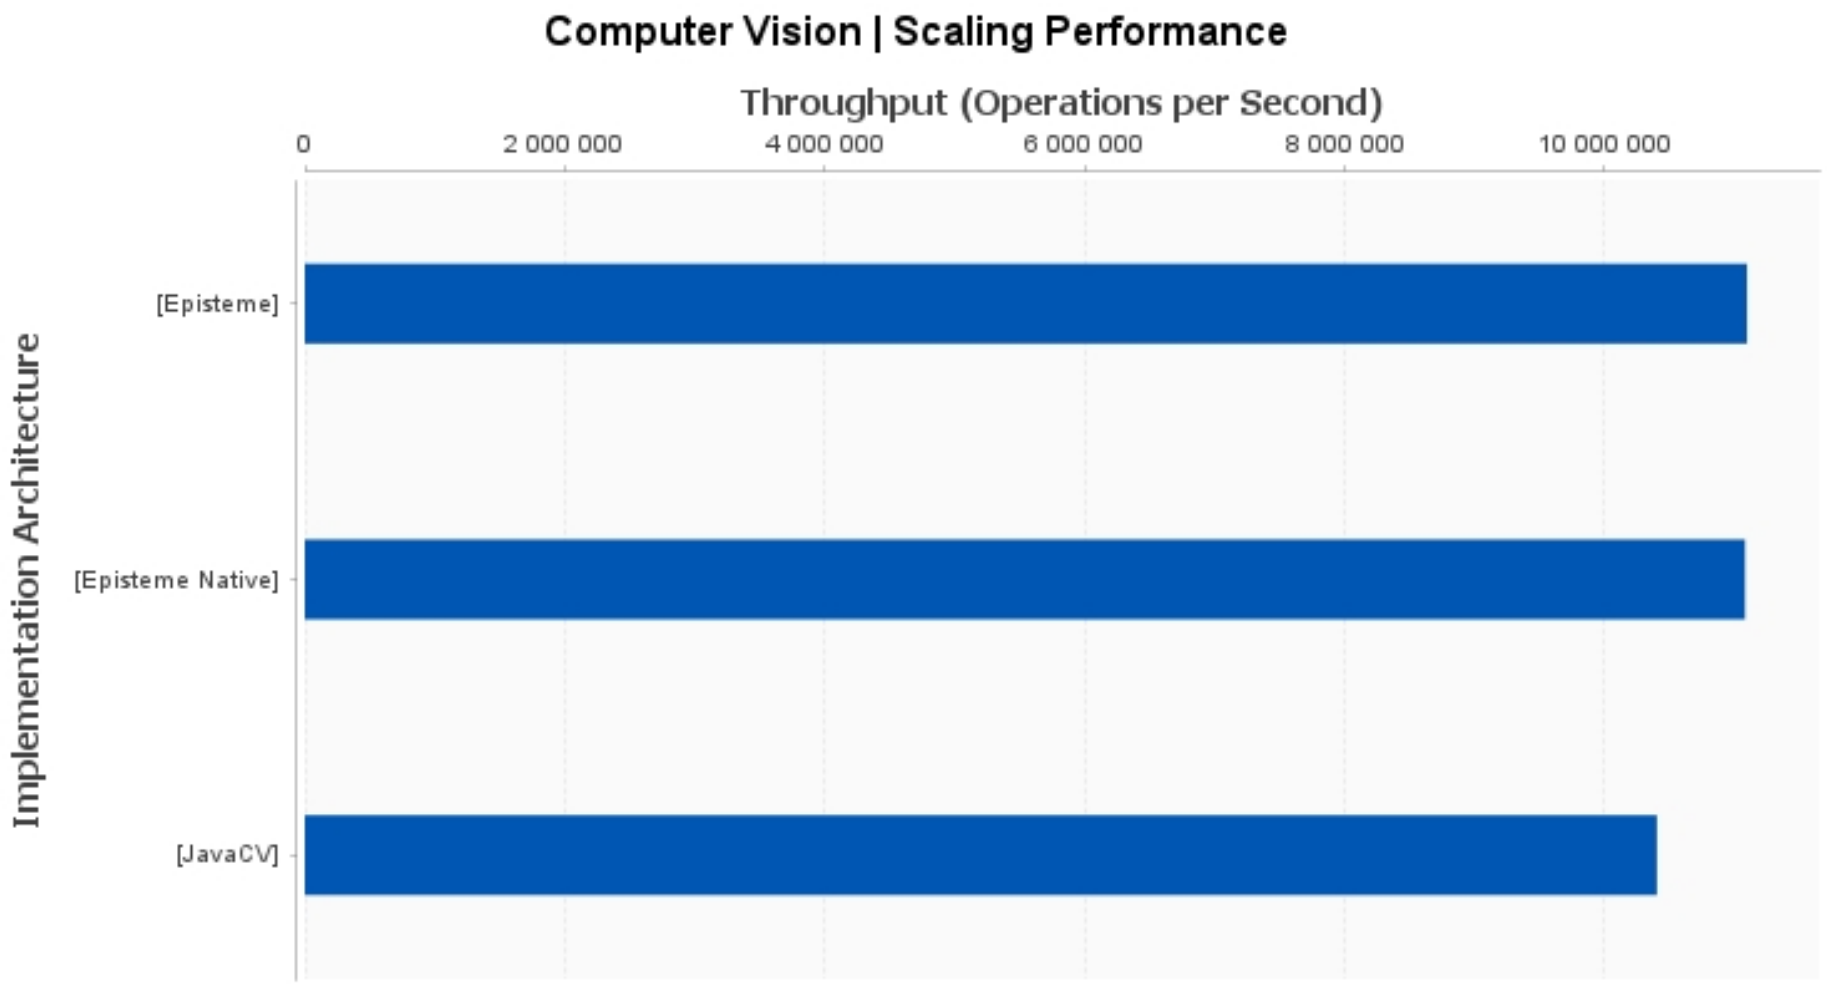
Boolean Algebra



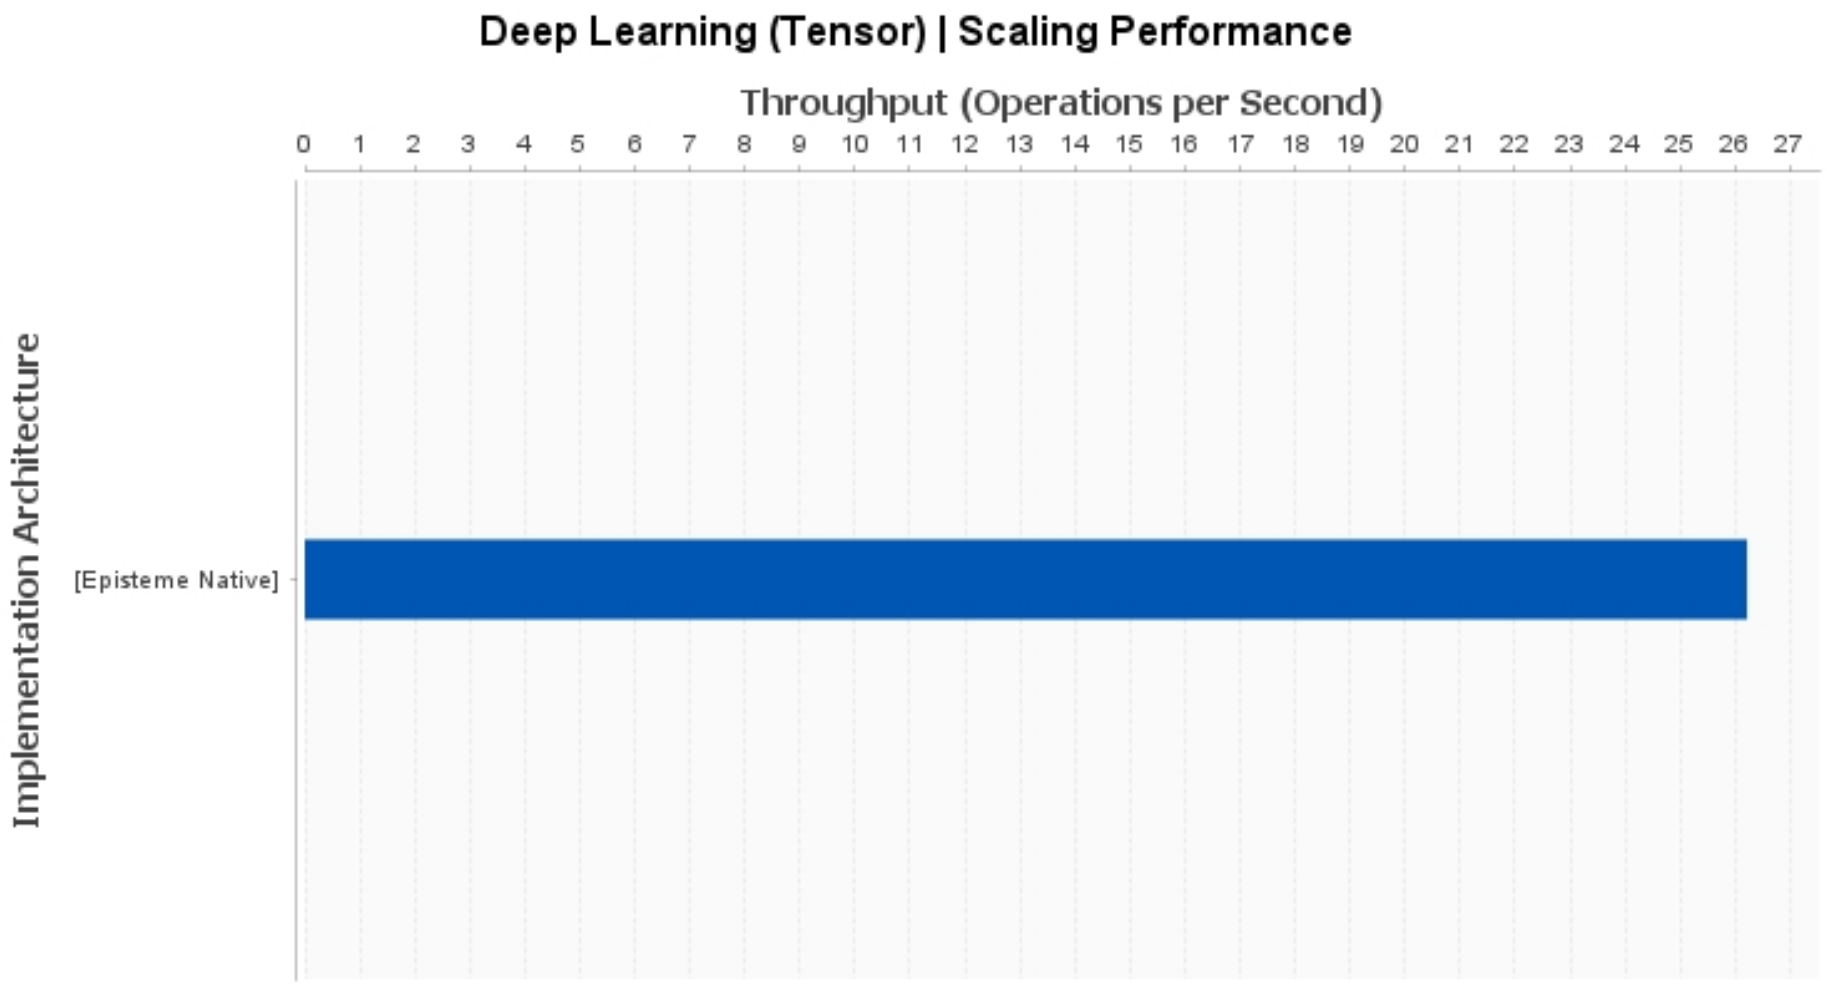
Computer Vision



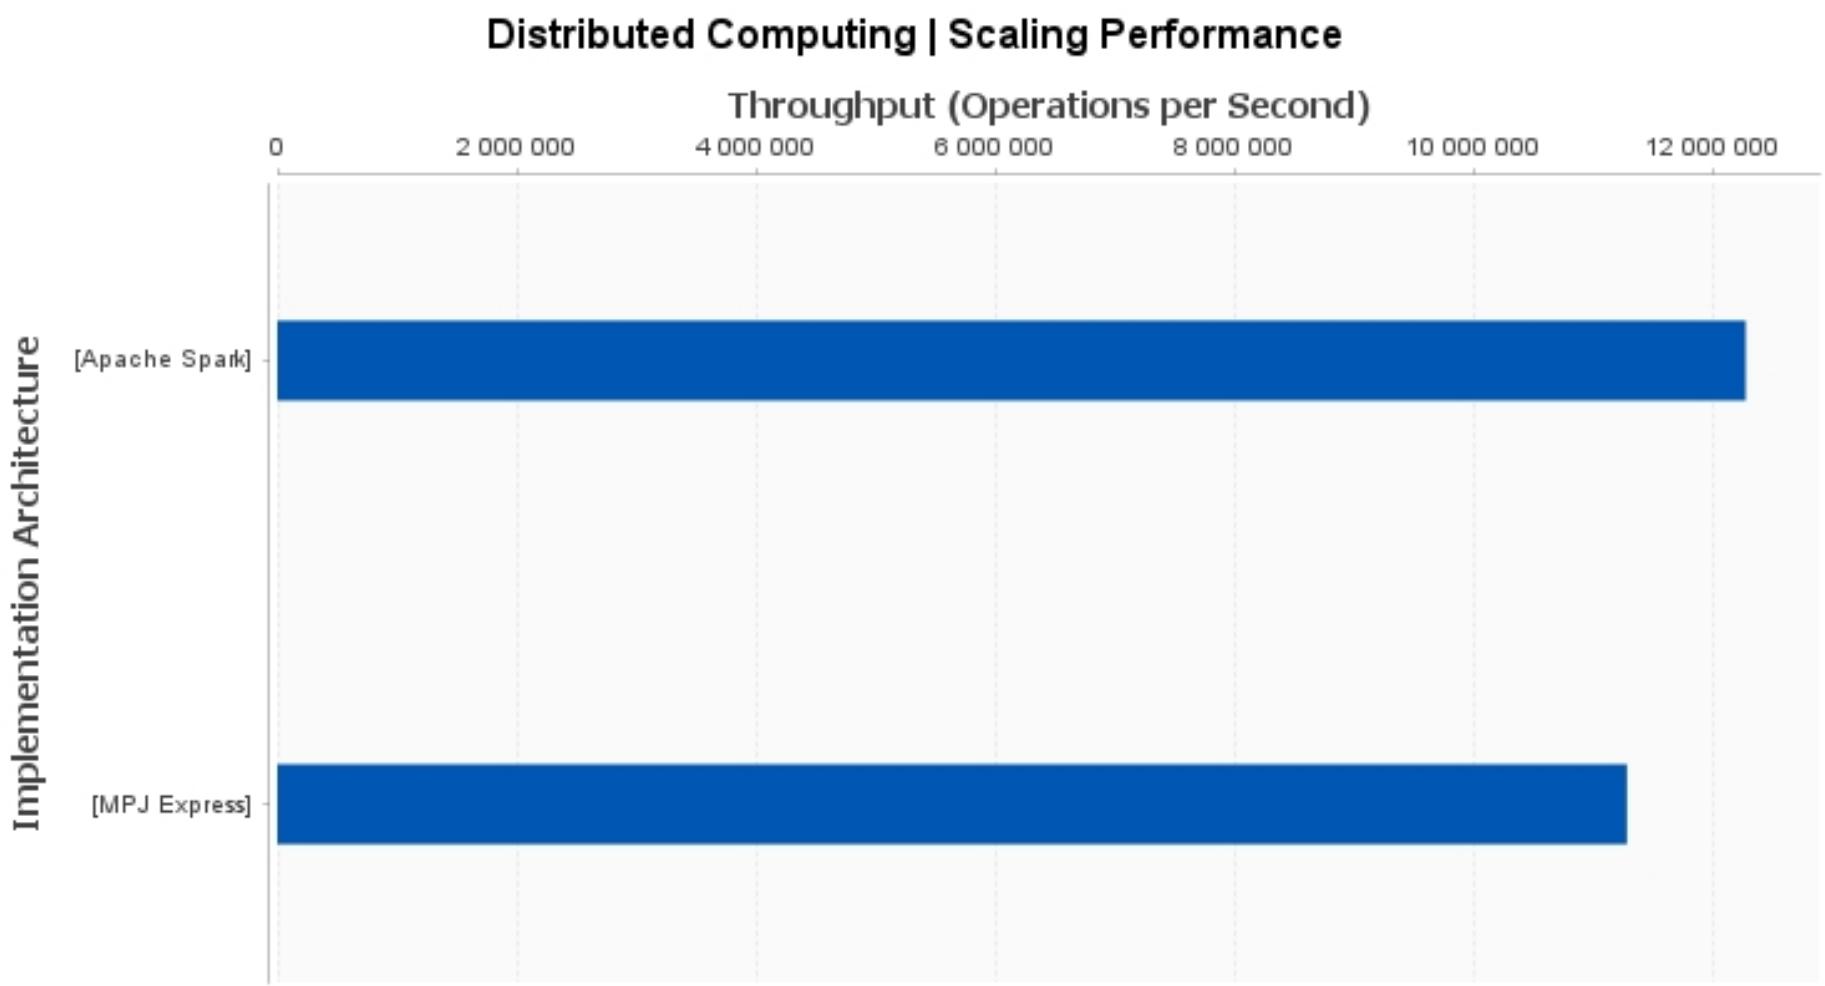
Deep Learning (Tensor)



Distributed Computing

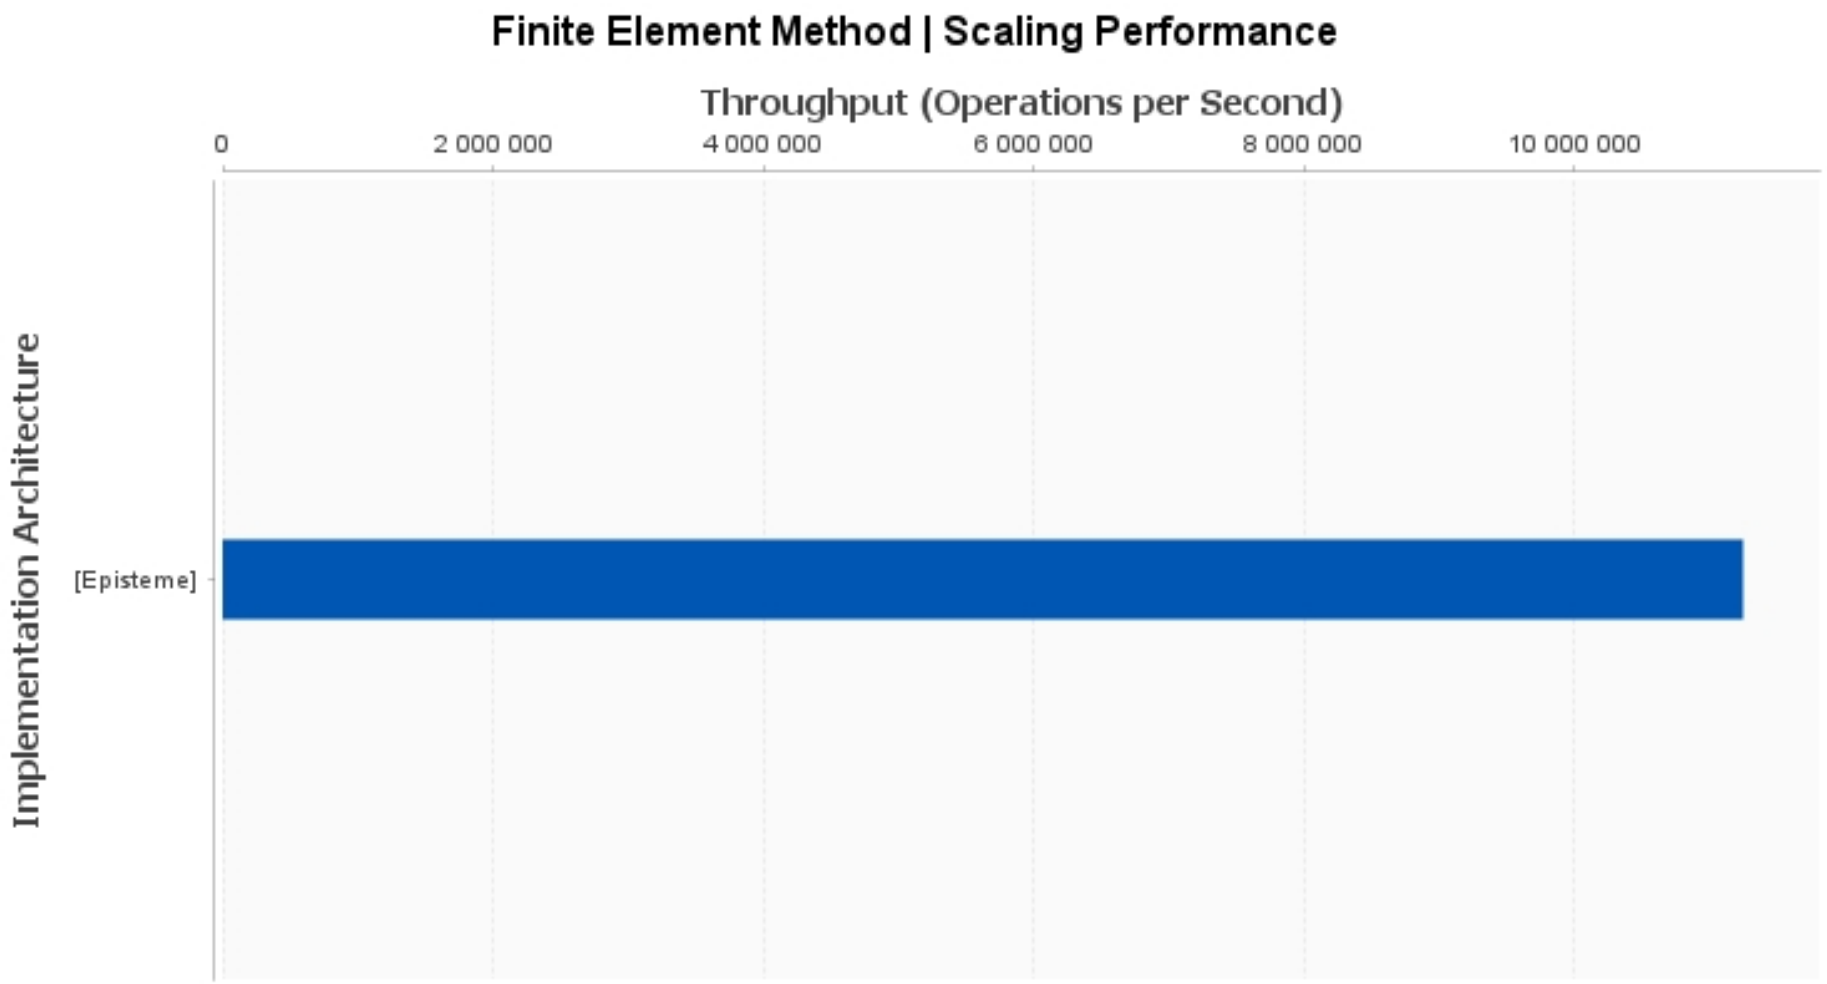


Finite Element Method

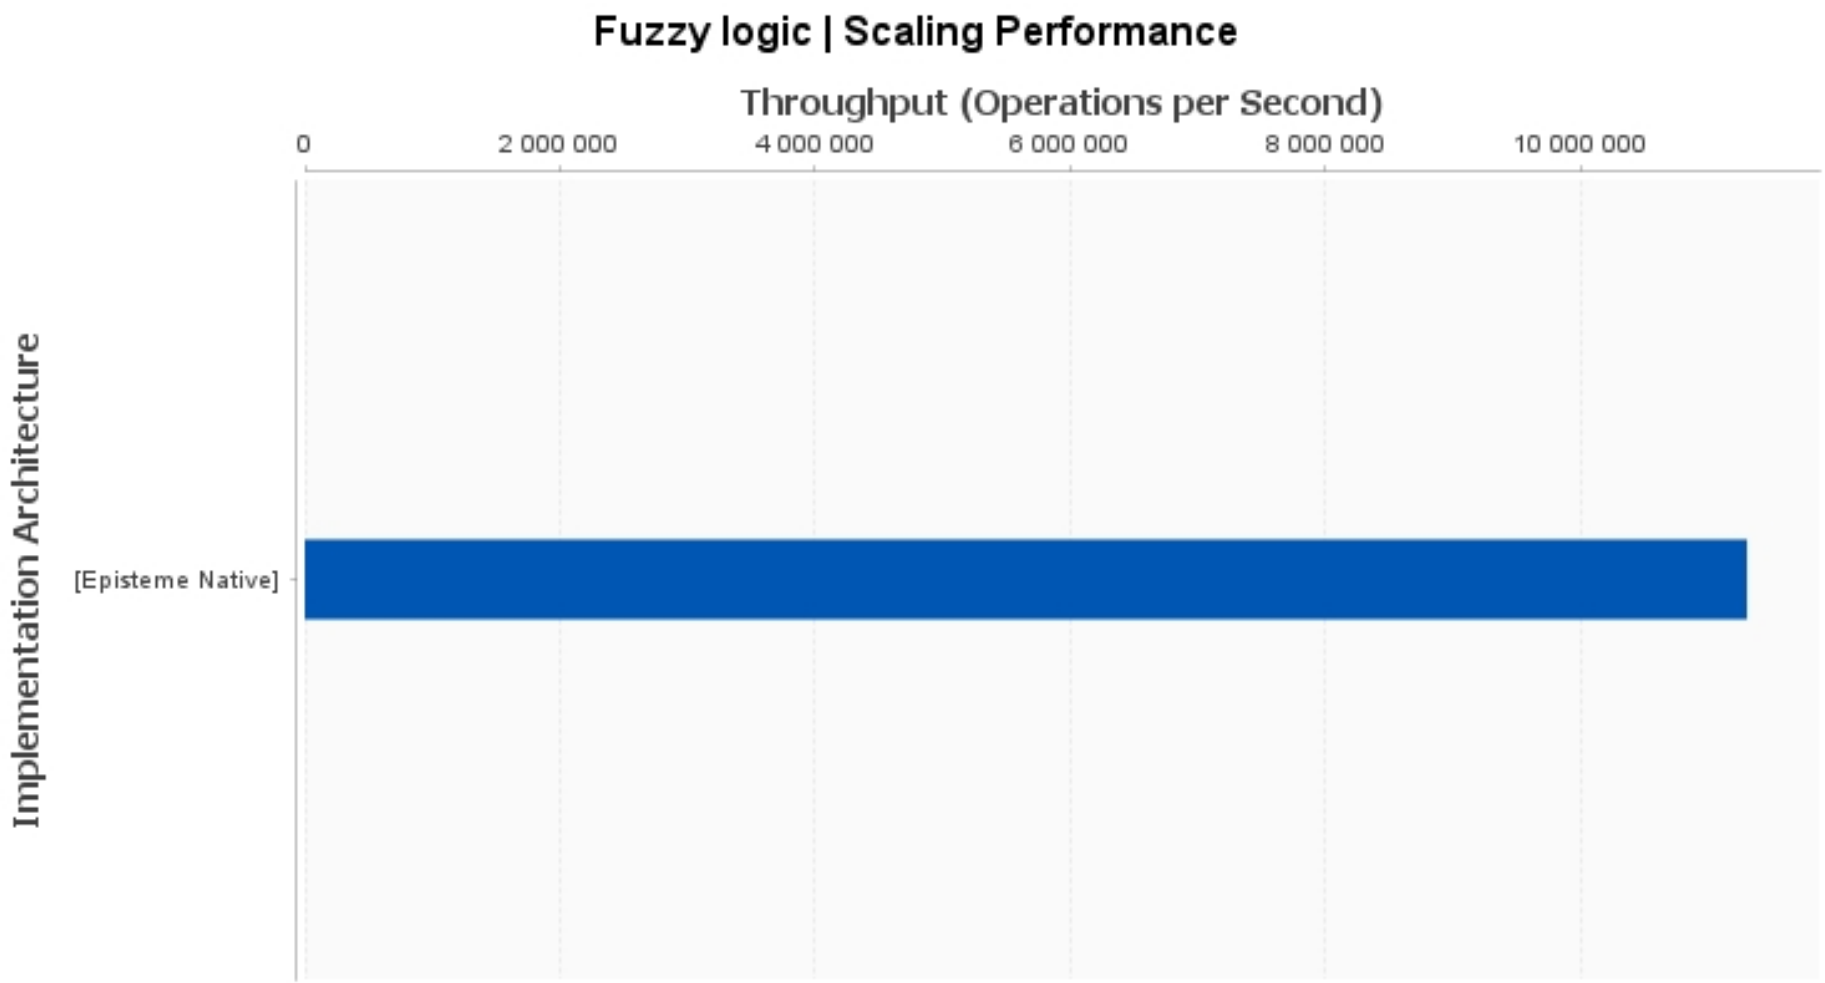


Distributed Computing | Scaling Performance
Throughput (Operations per Second)
0
2 000 000
4 000 000
6 000 000
8 000 000
10 000 000
12 000 000
Implementation Architecture
[Apache Spark]
[MPJ Express]

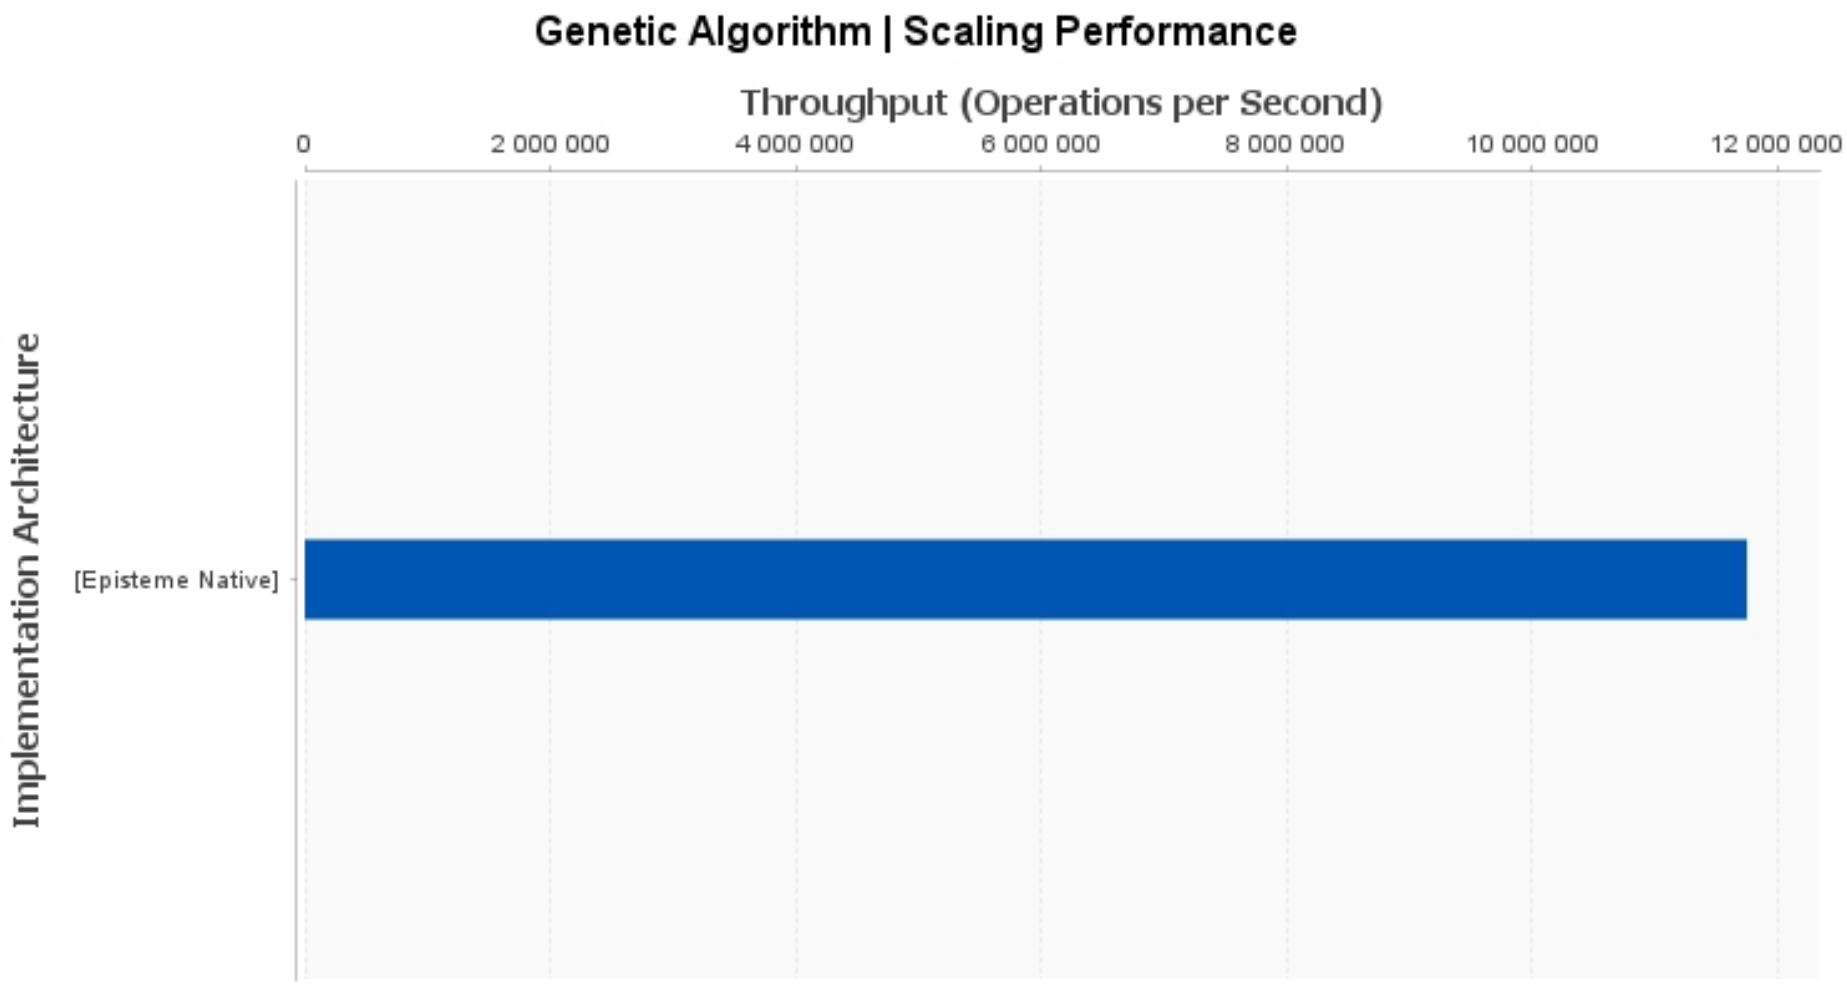
Fuzzy logic



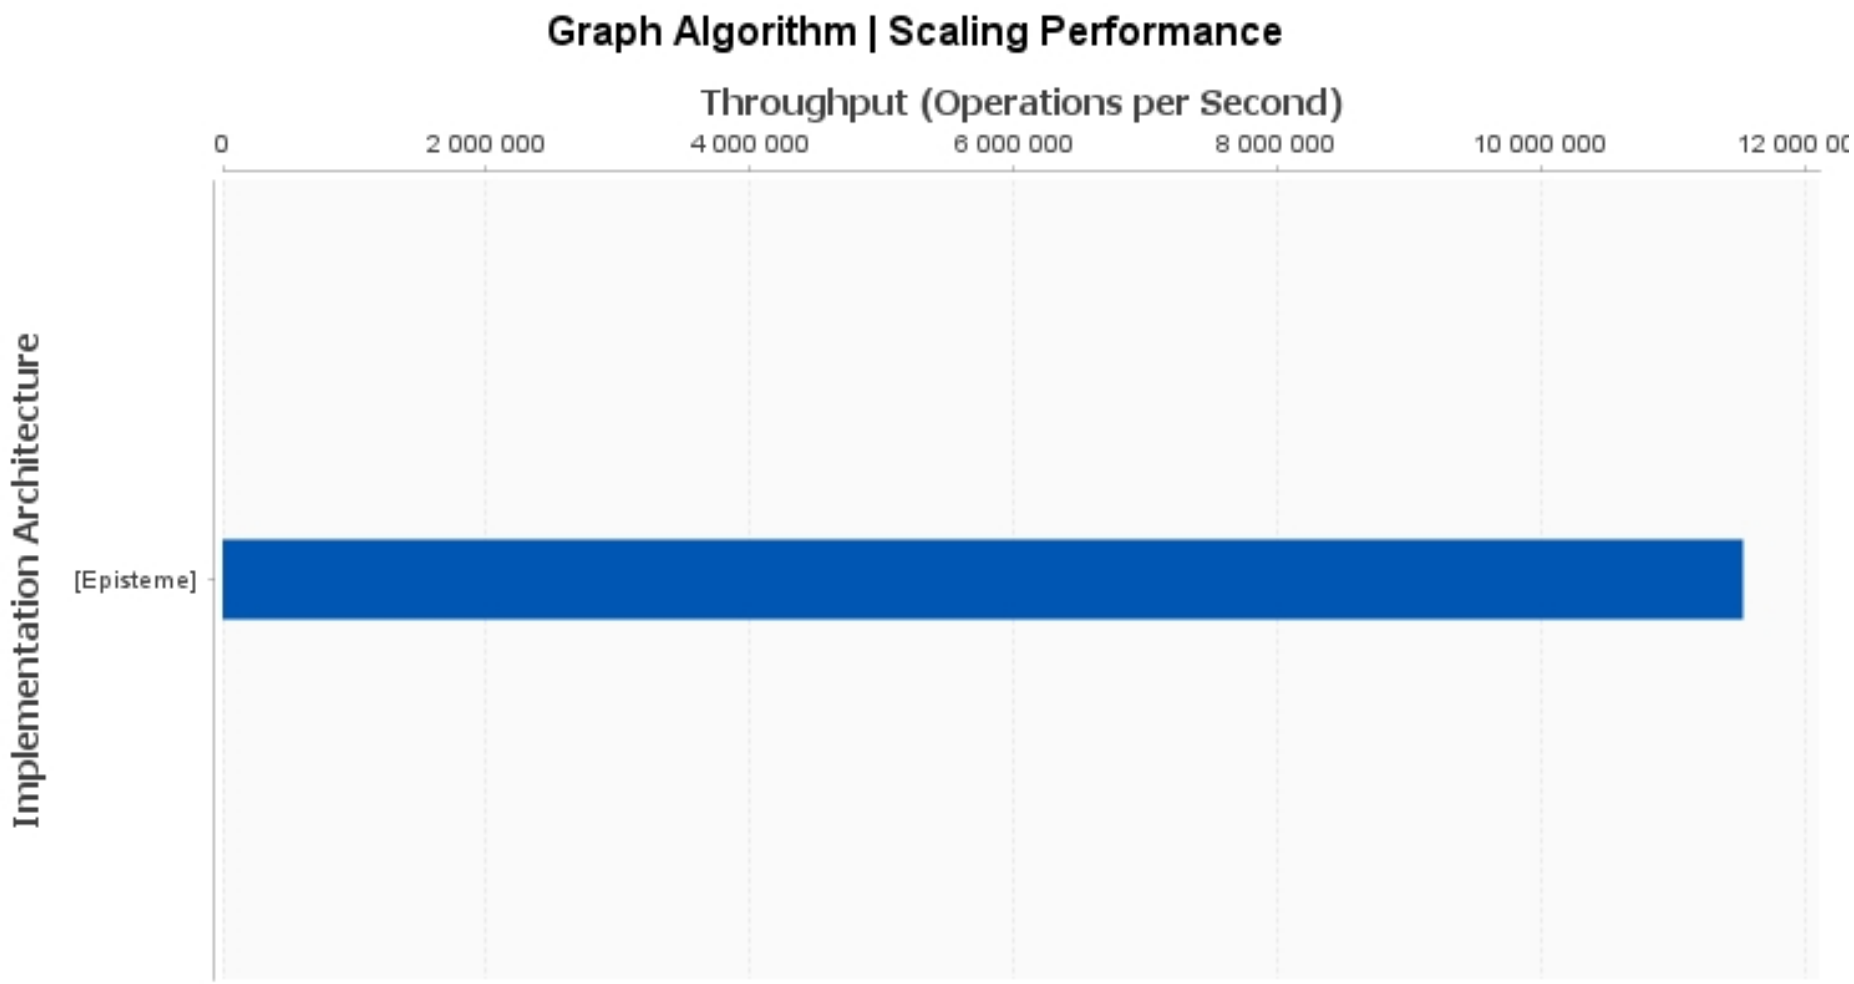
Genetic Algorithm



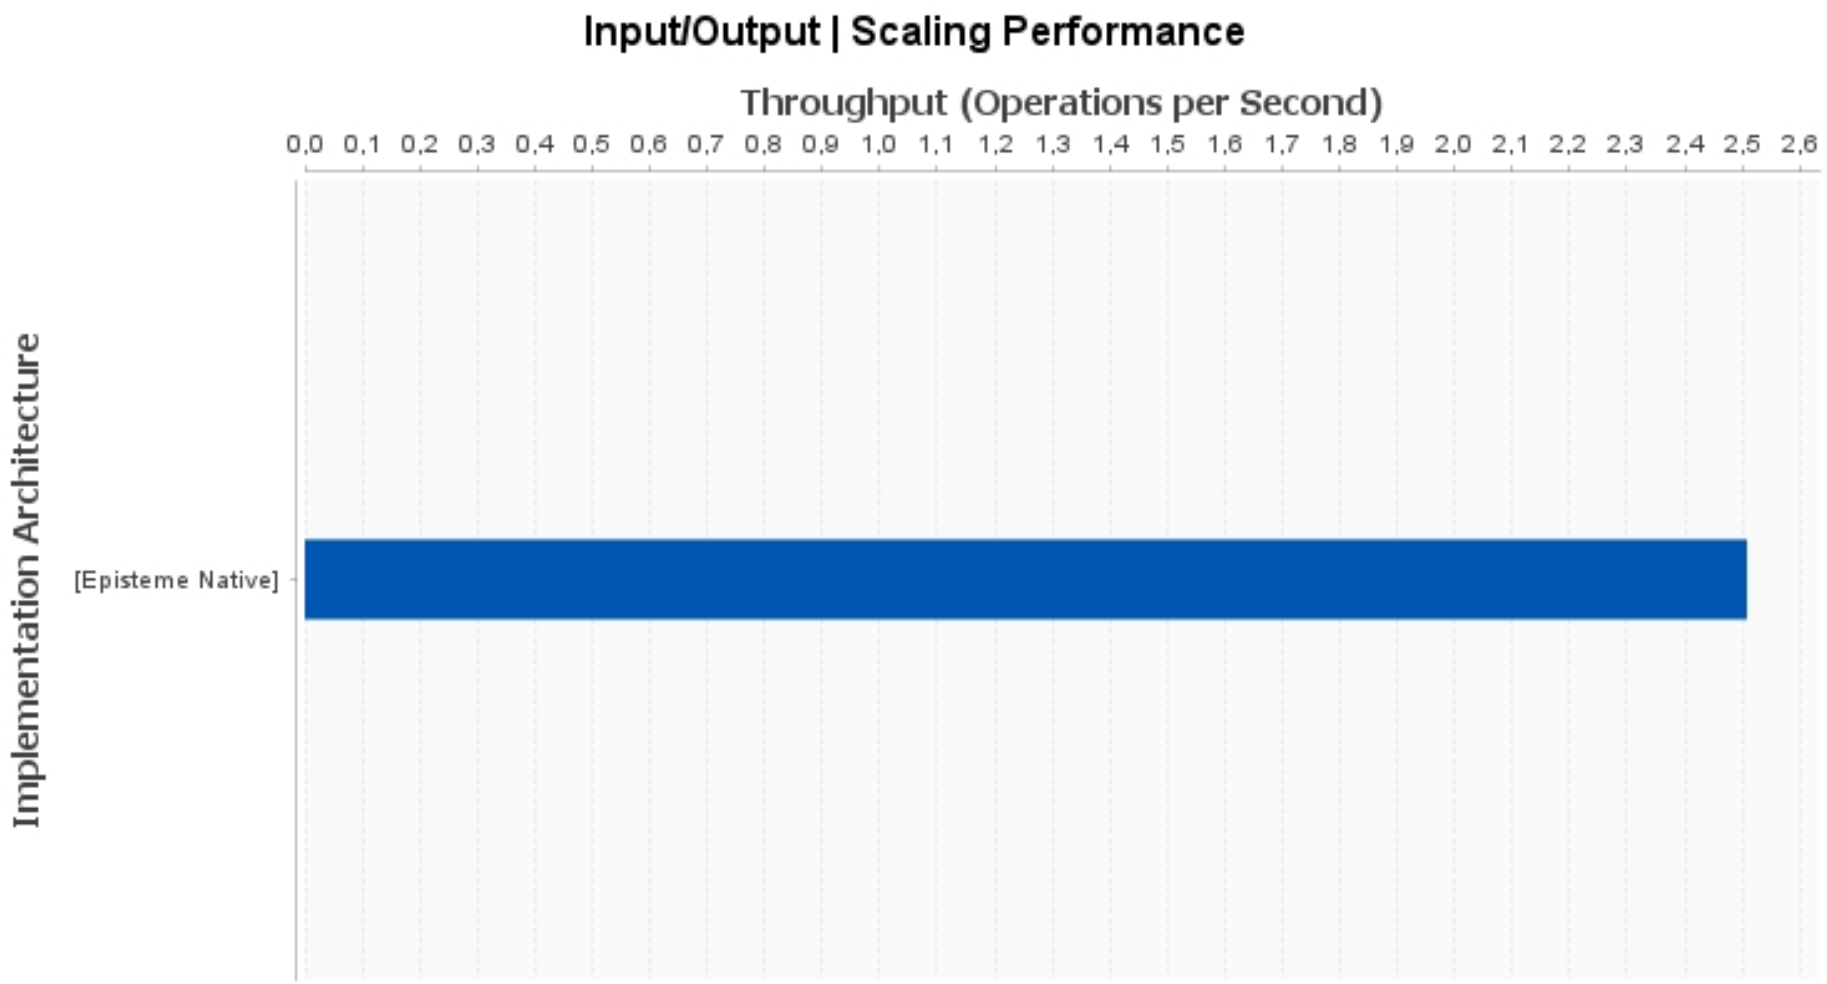
Graph Algorithm



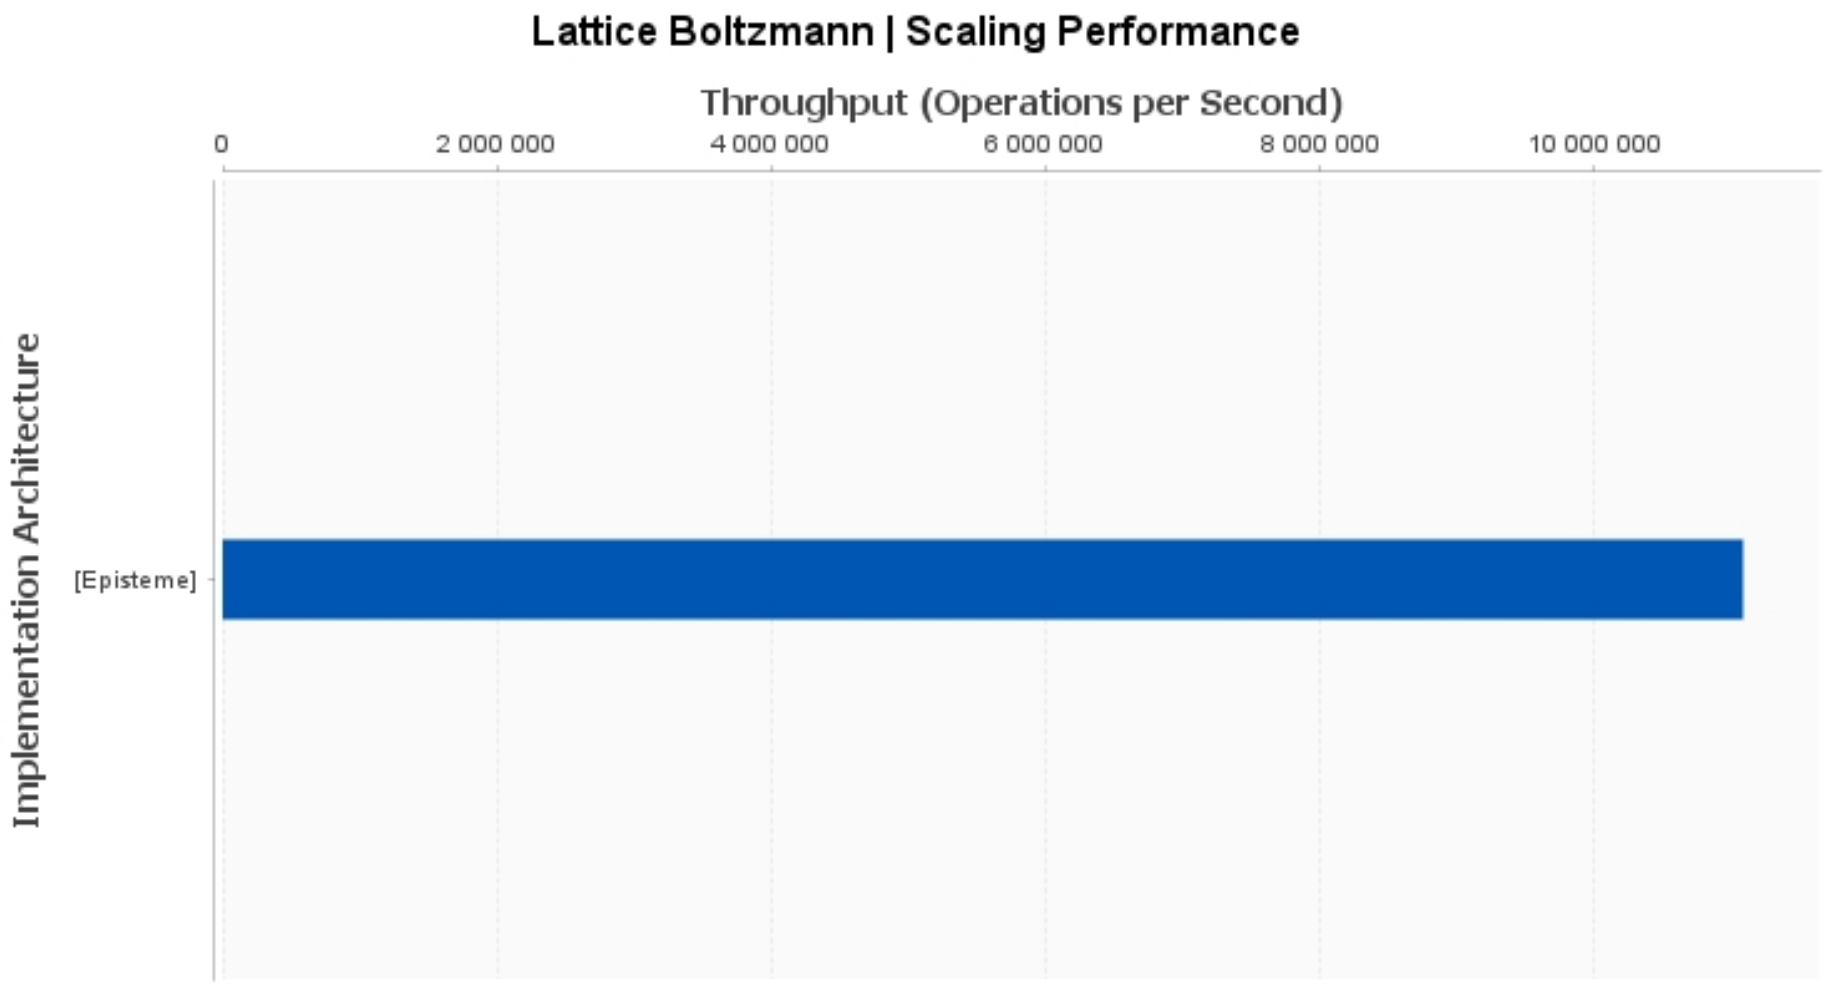
Input/Output



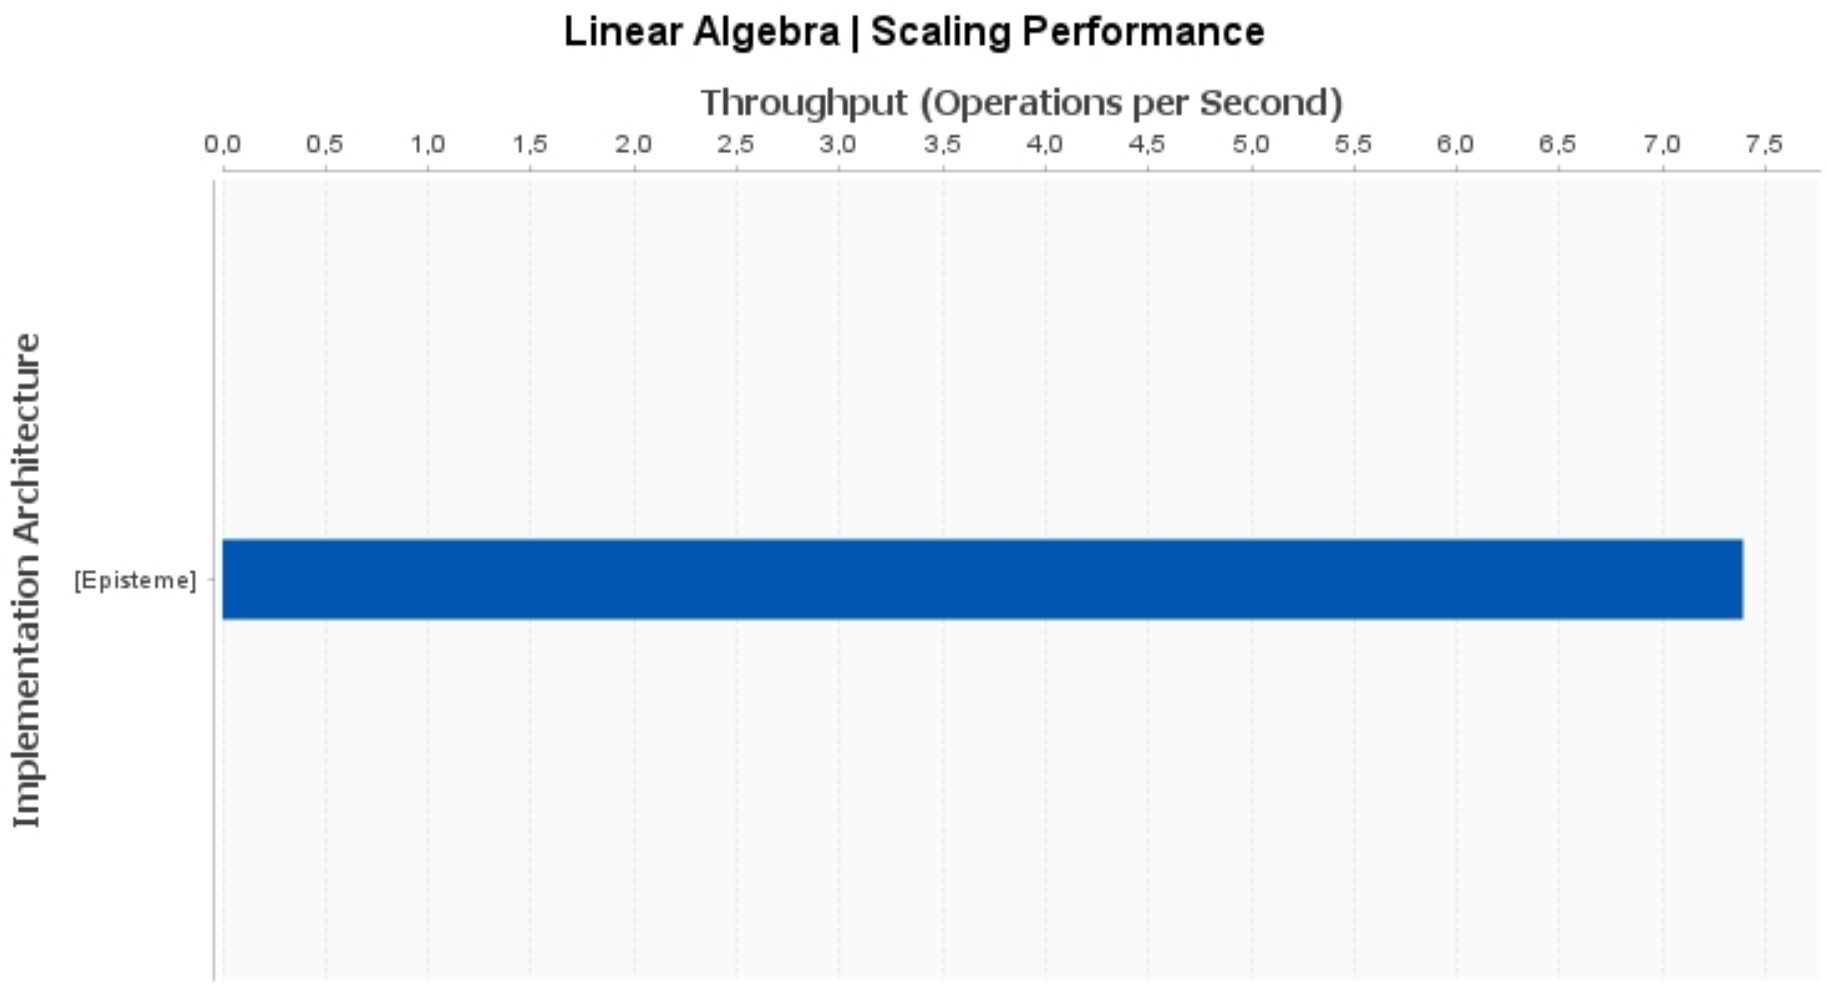
Lattice Boltzmann



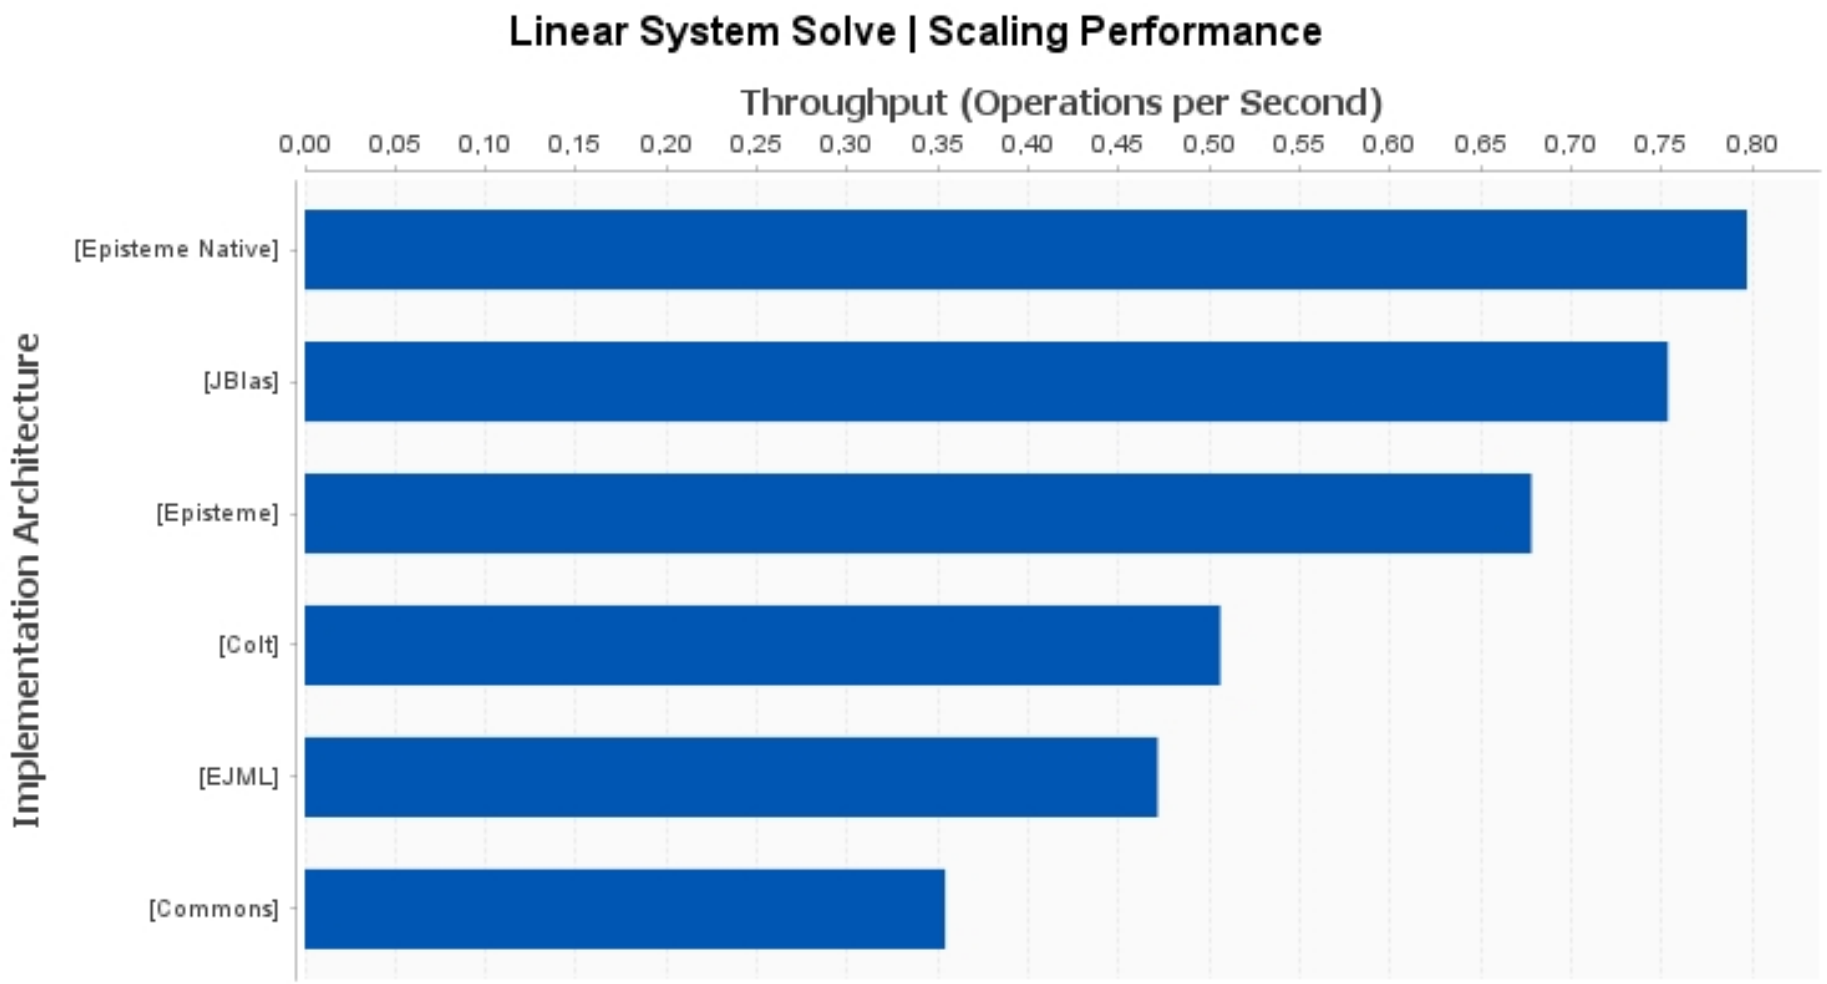
Linear Algebra



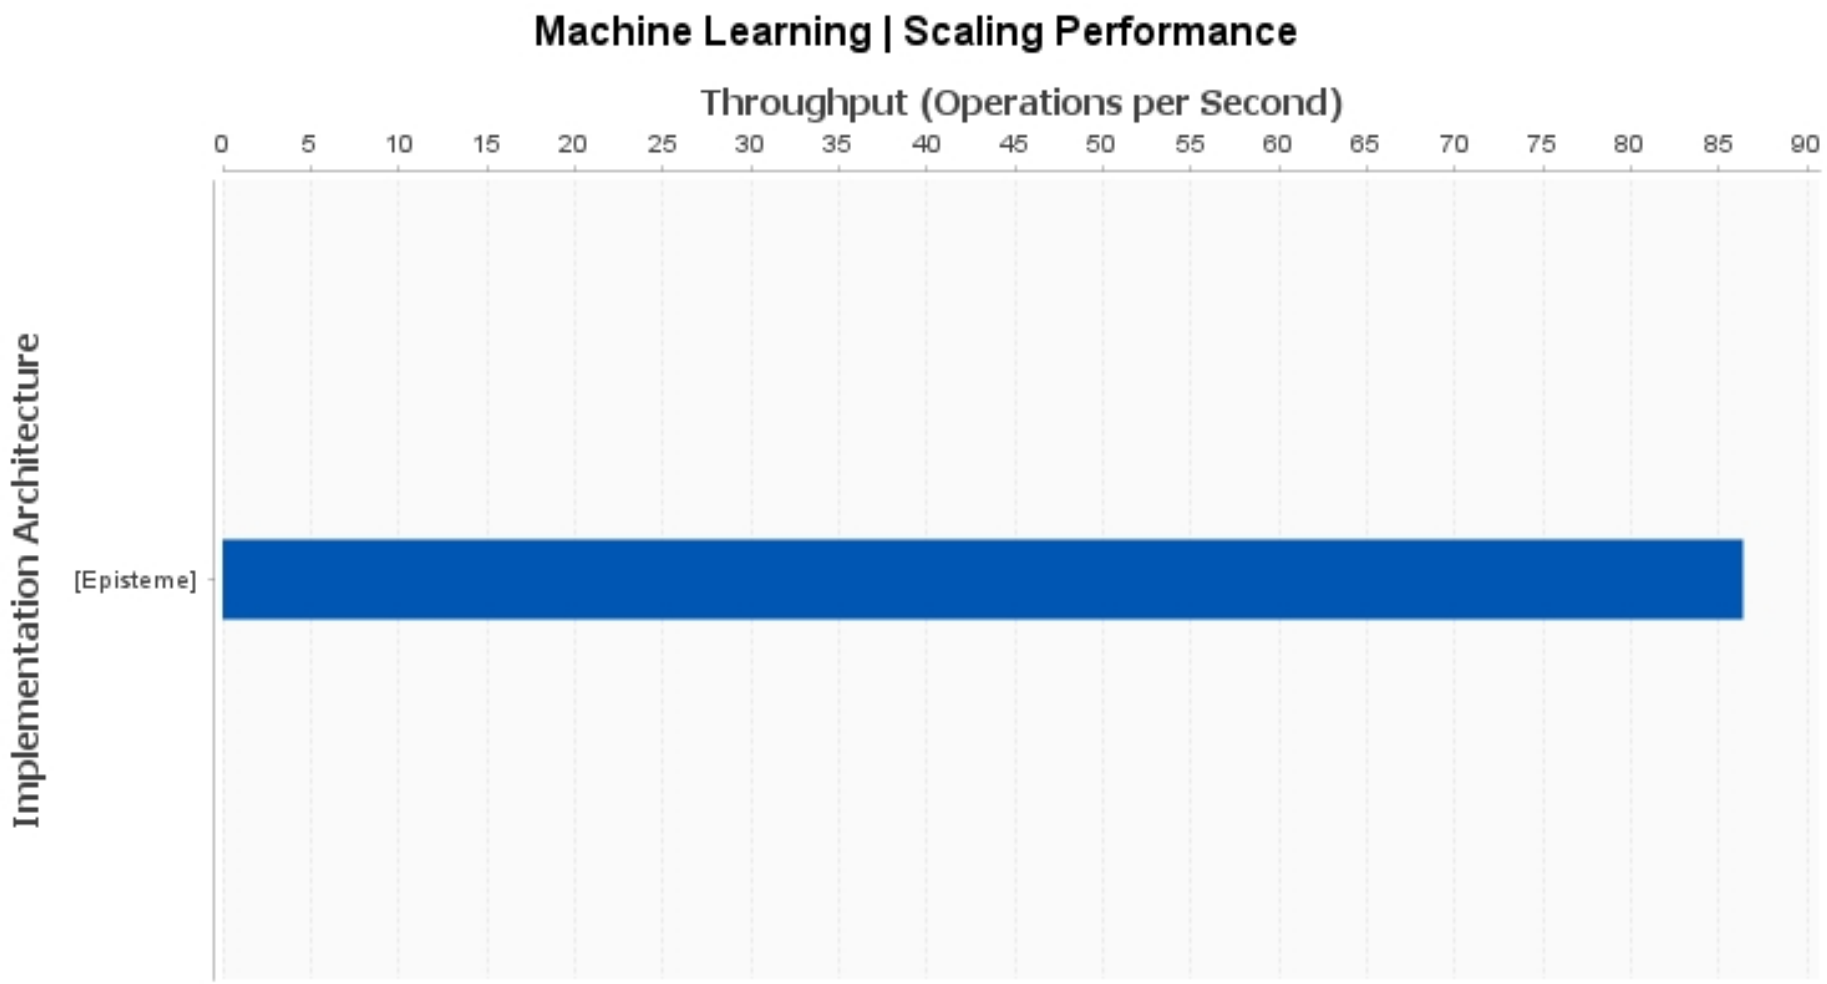
Linear System Solve



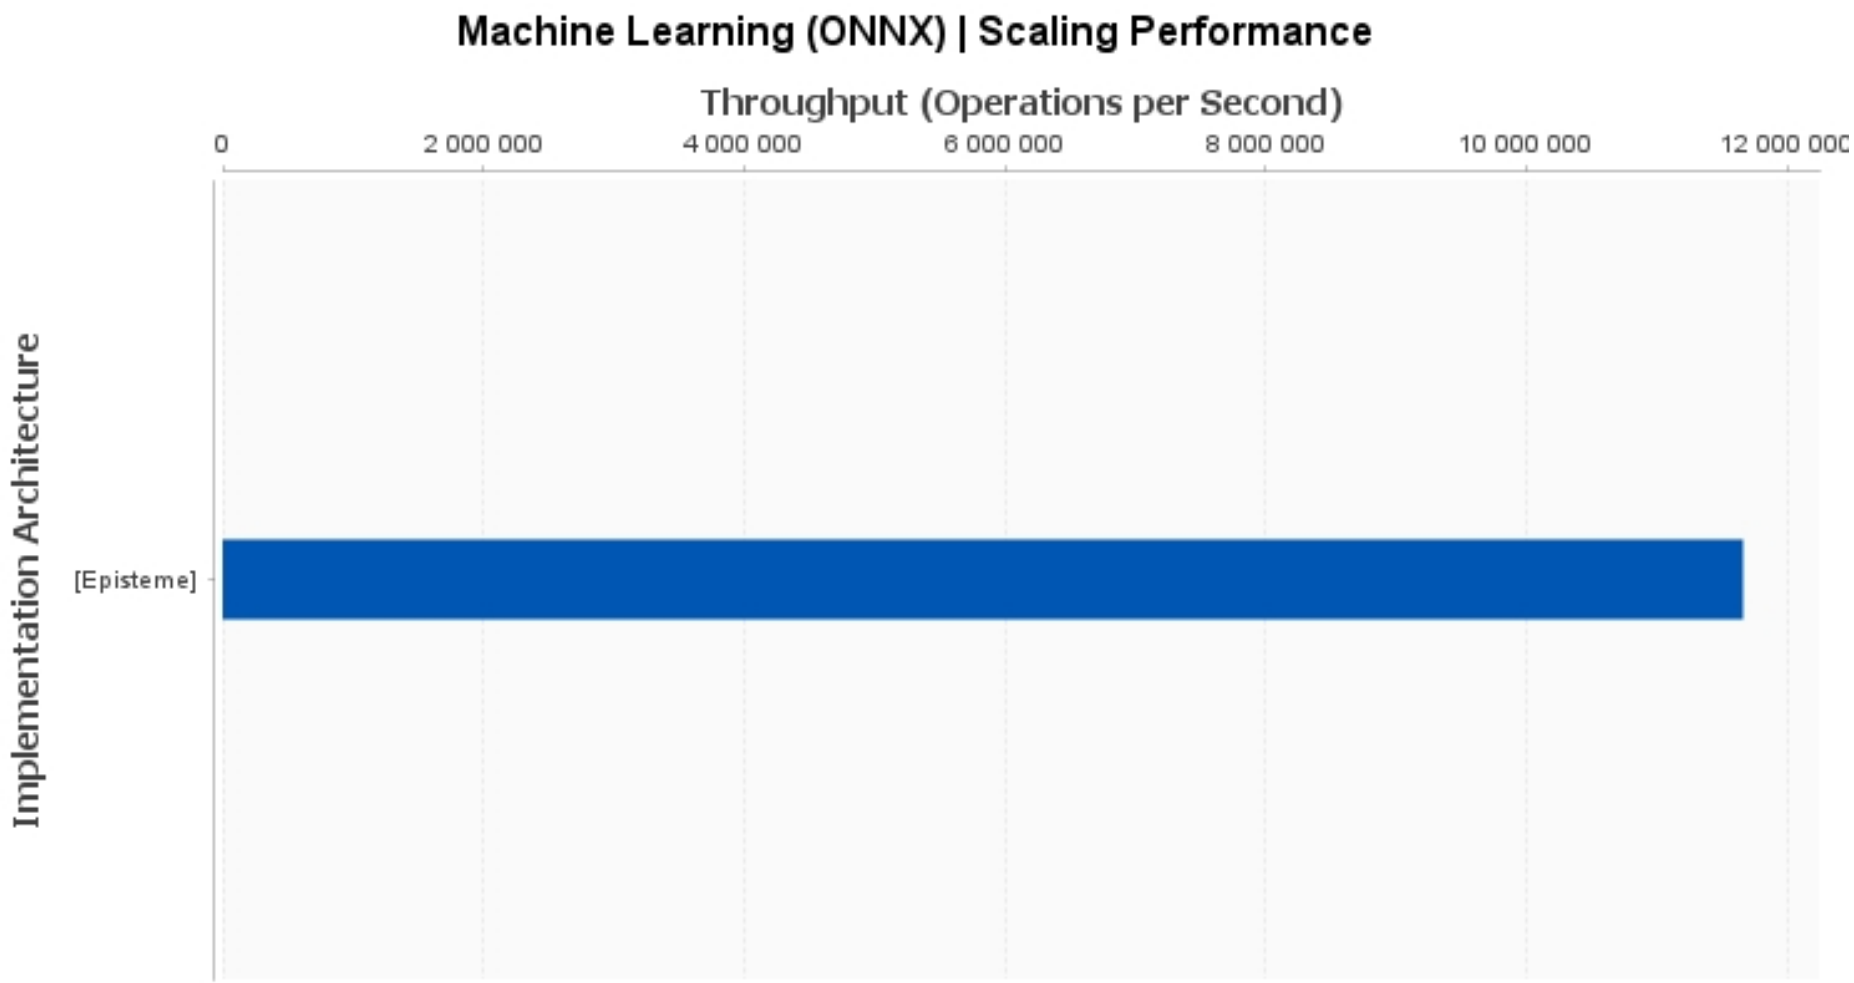
Machine Learning



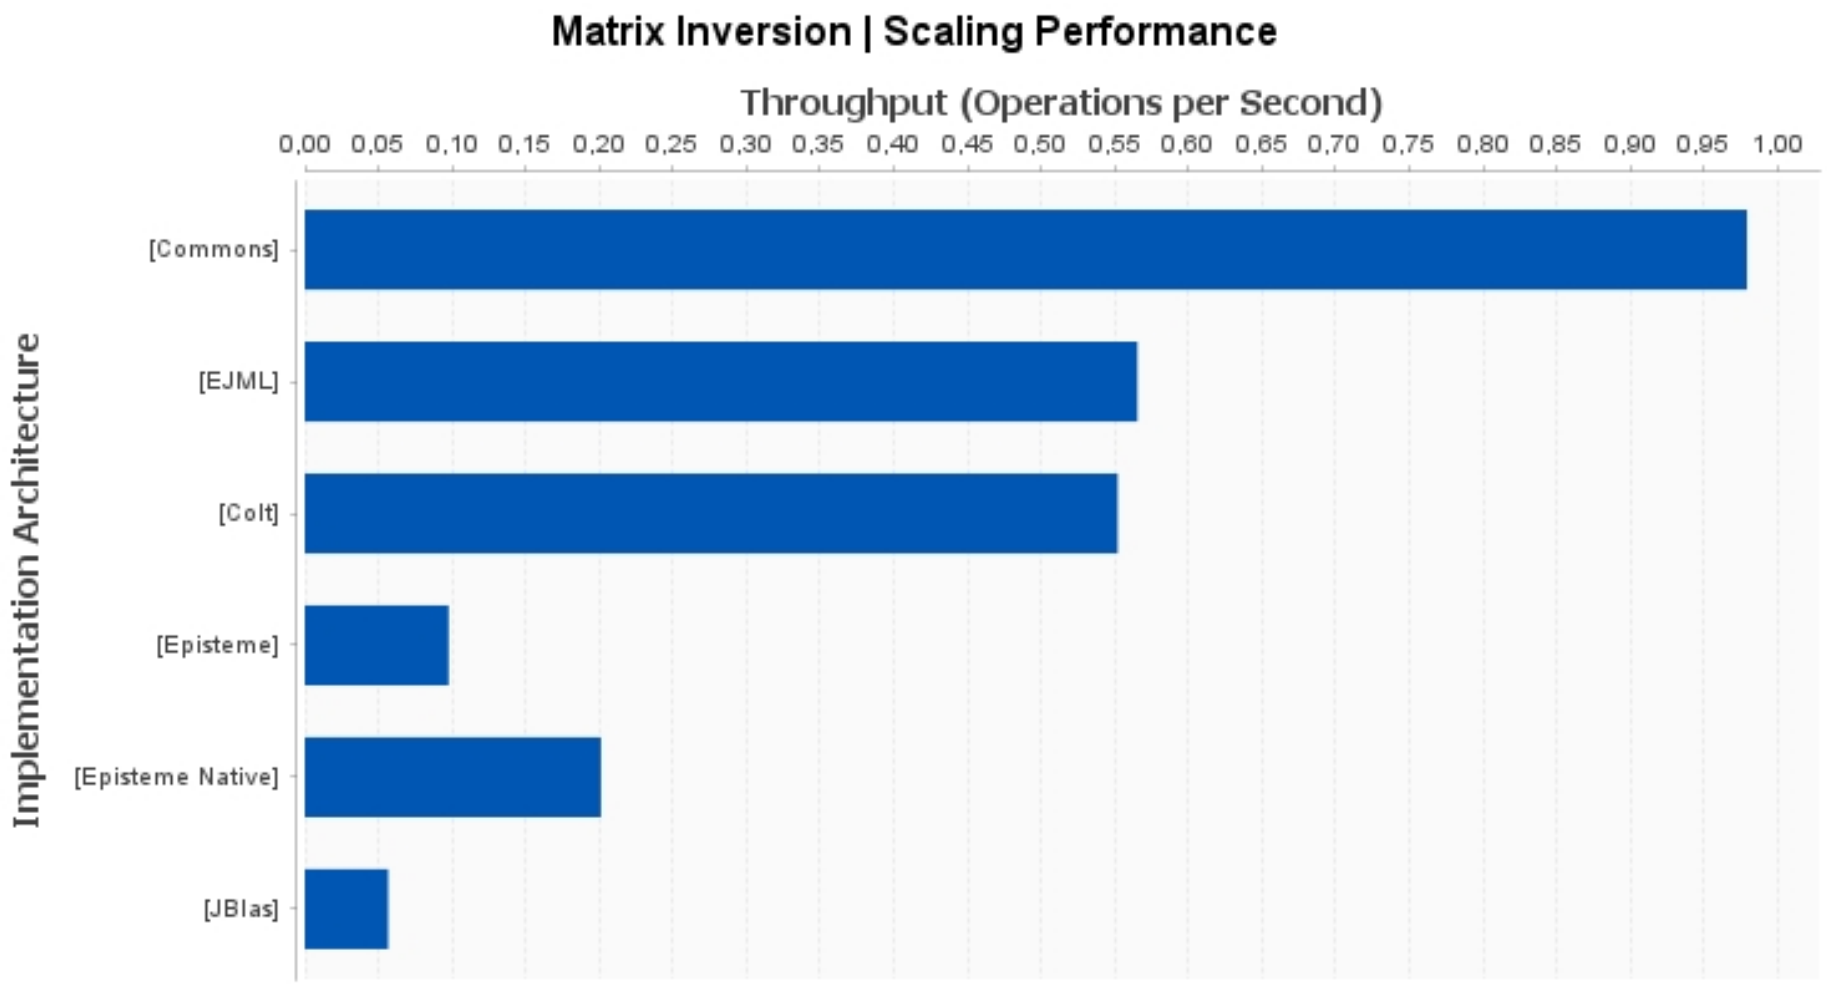
Machine Learning (ONNX)



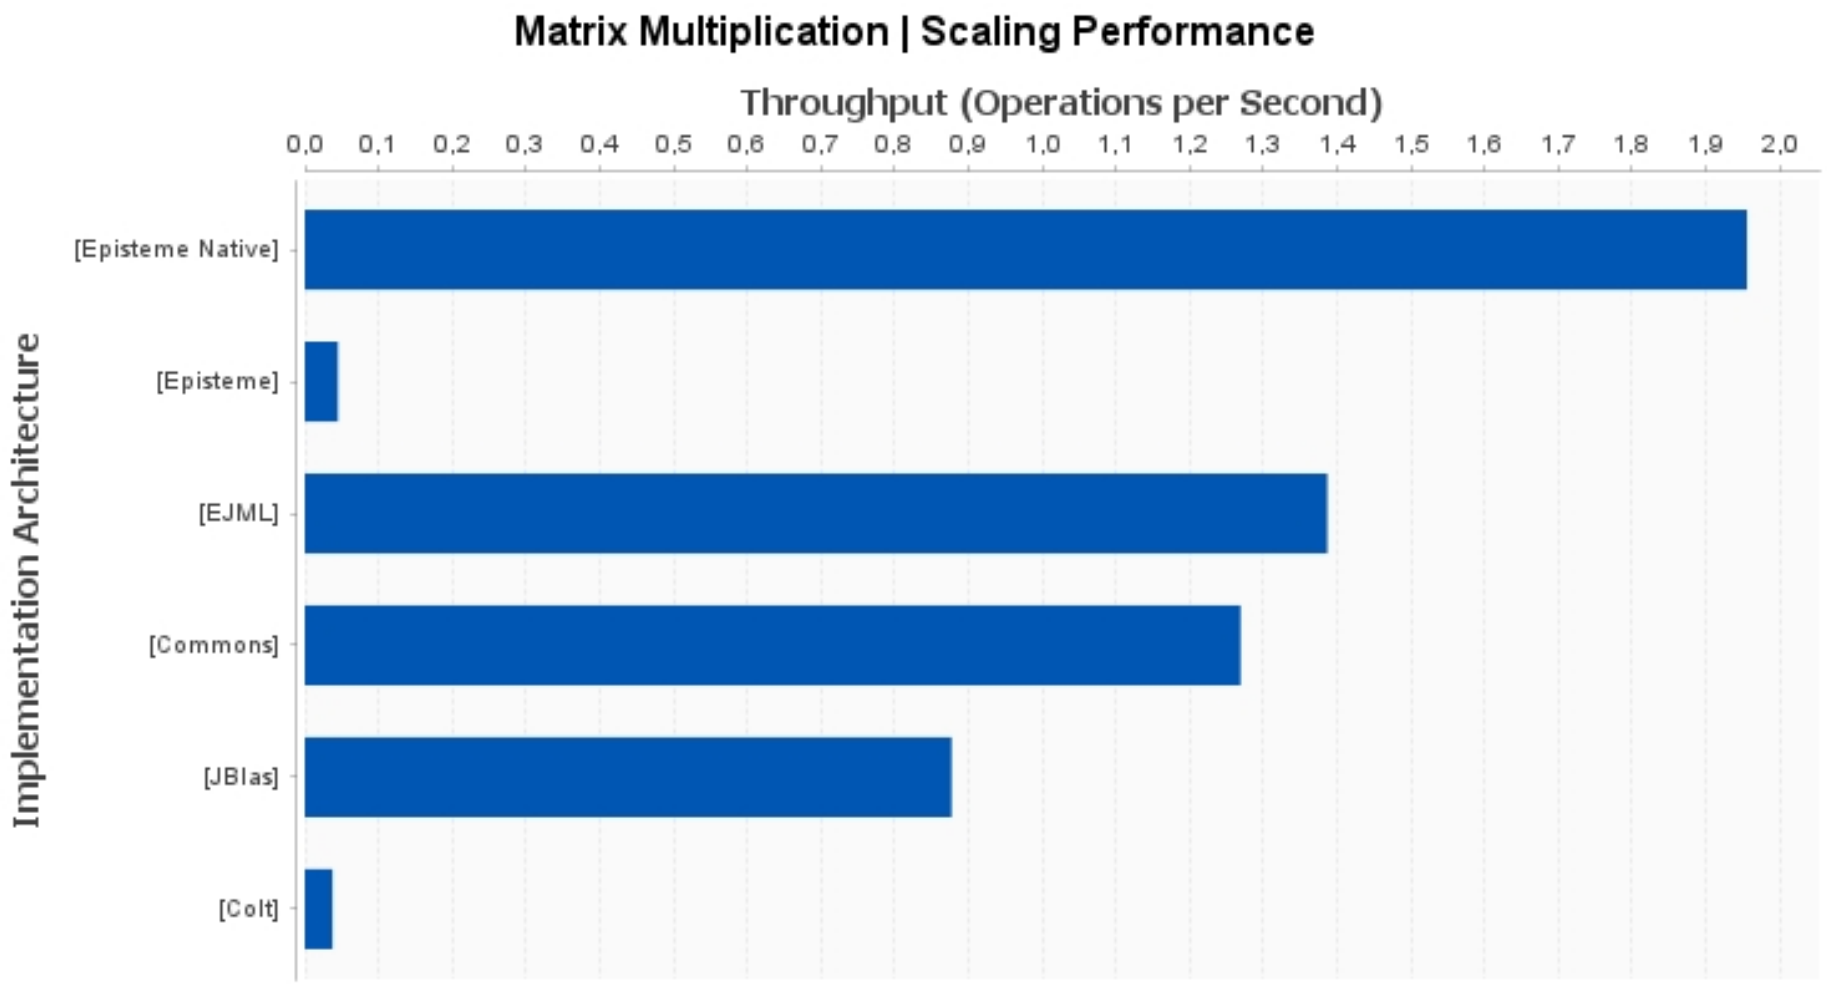
Matrix Inversion



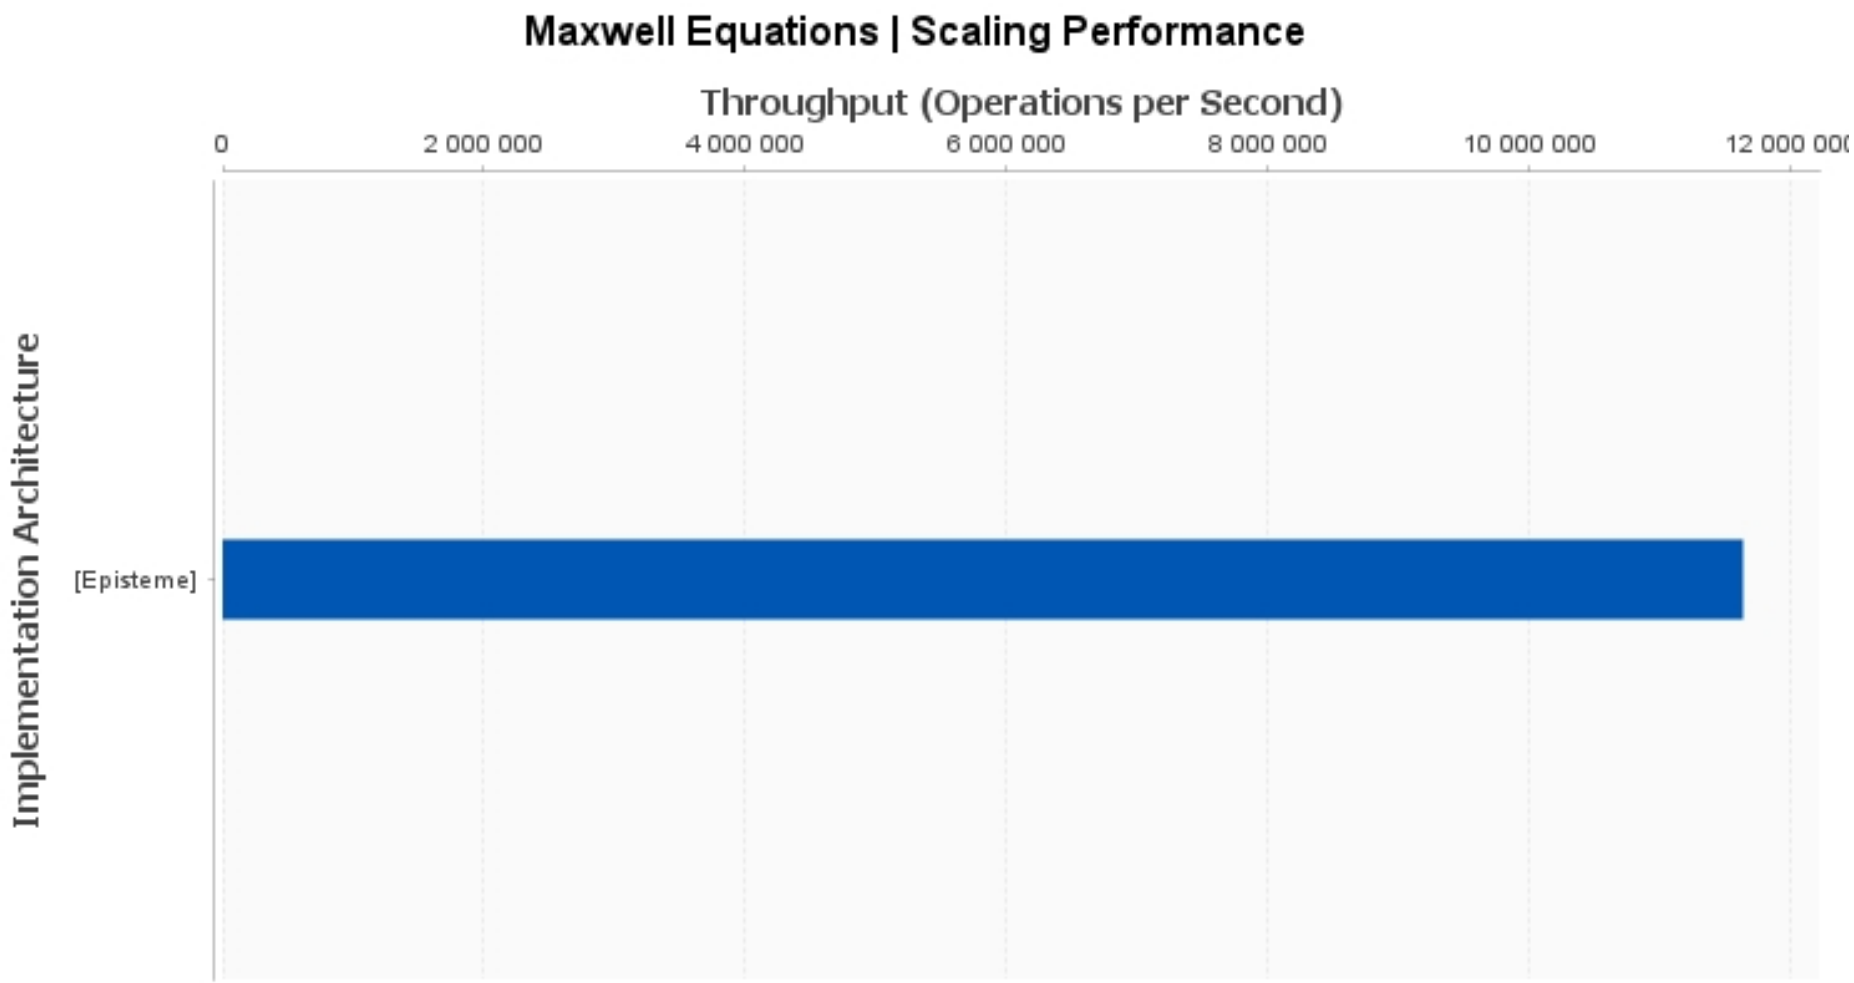
Matrix Multiplication



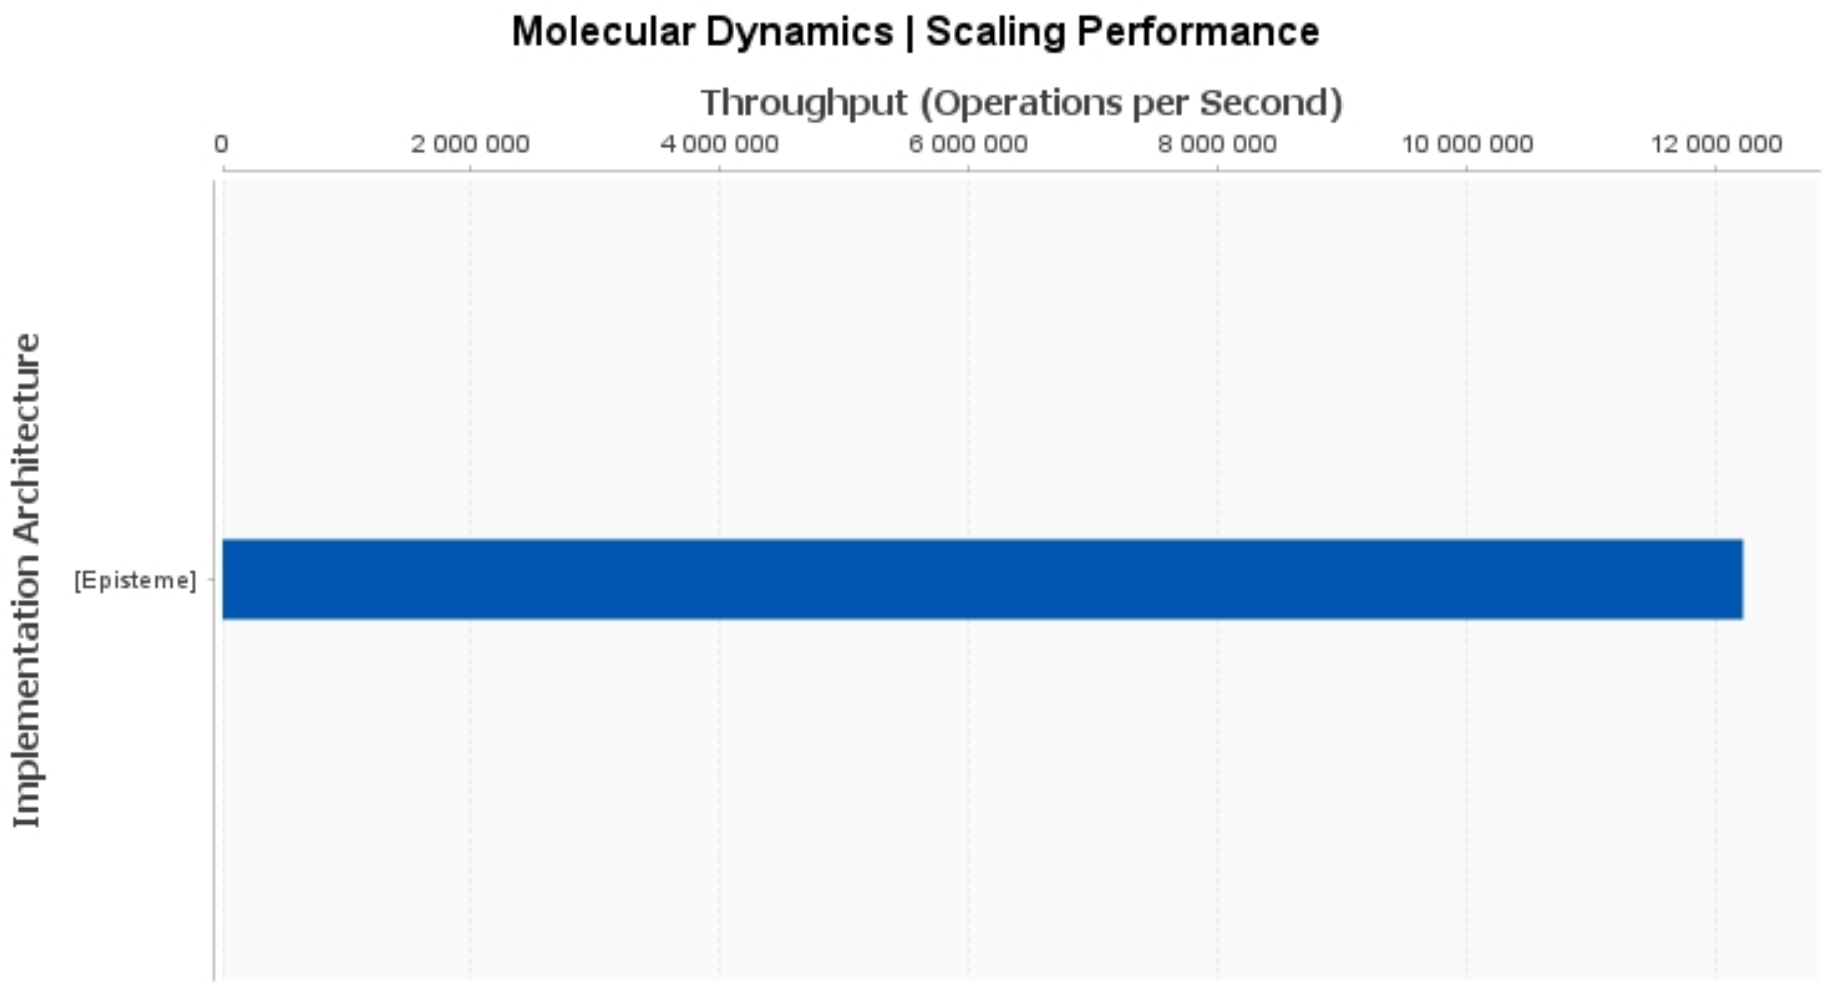
Maxwell Equations



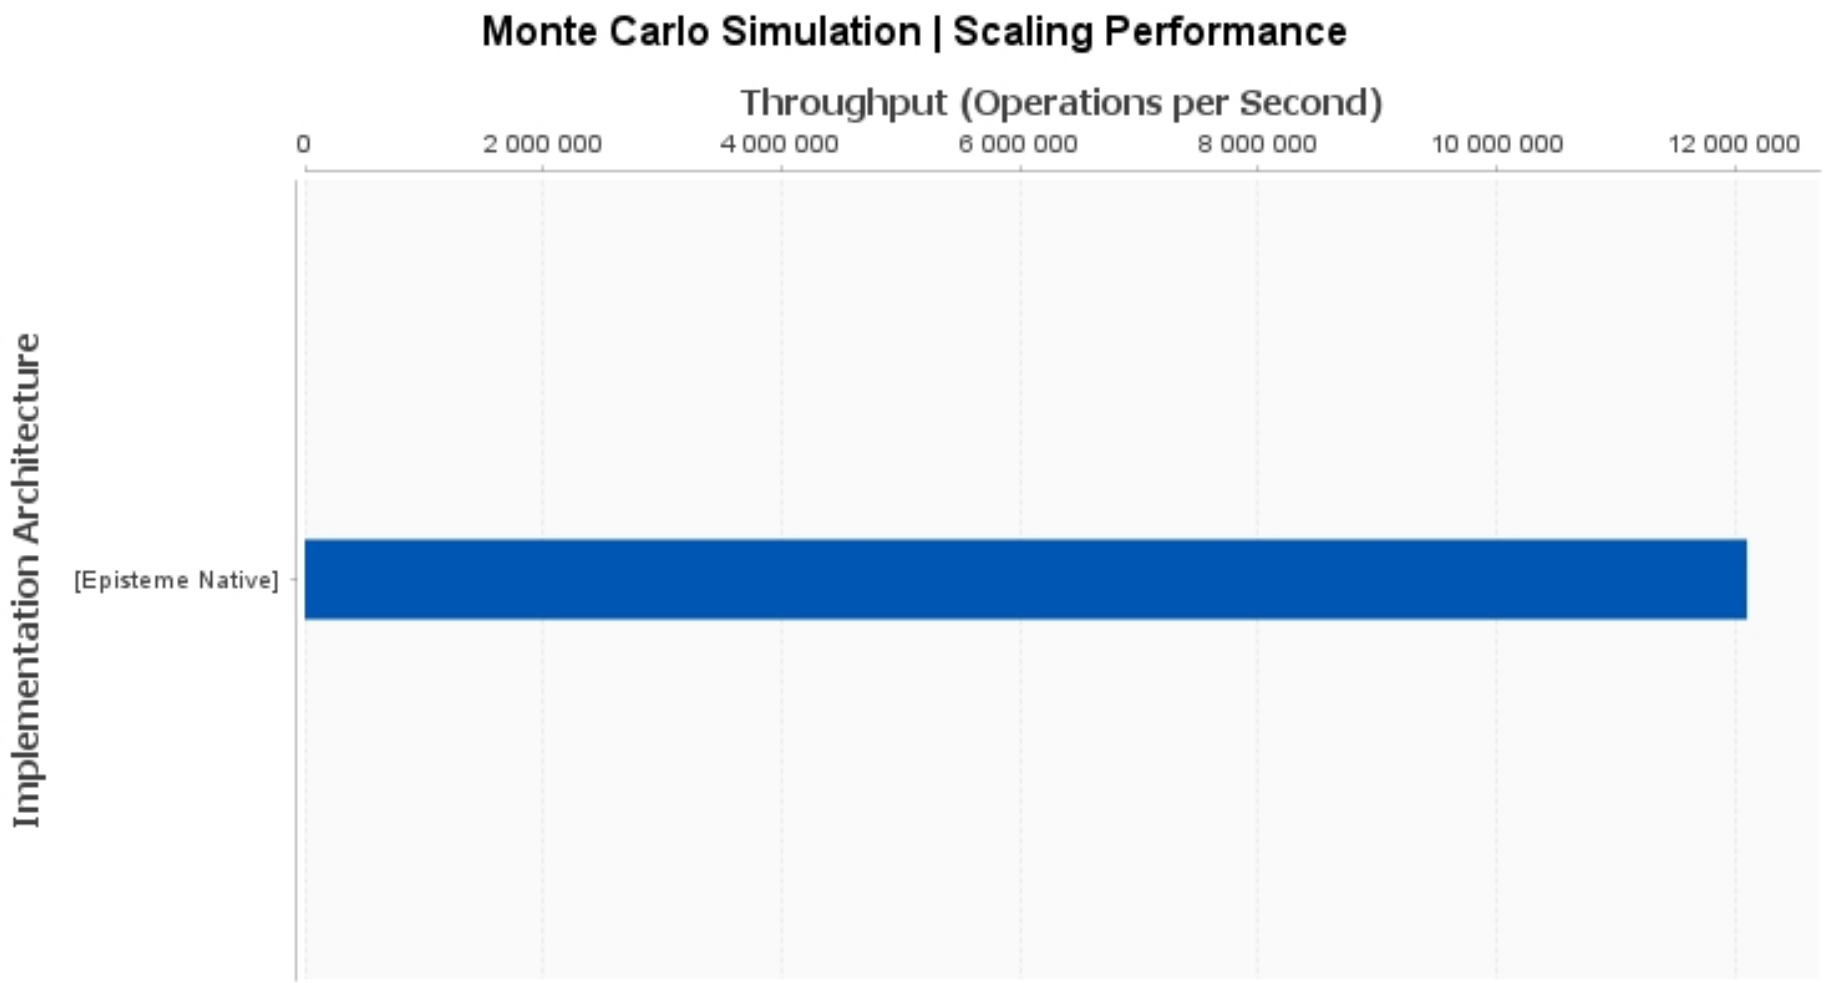
Molecular Dynamics



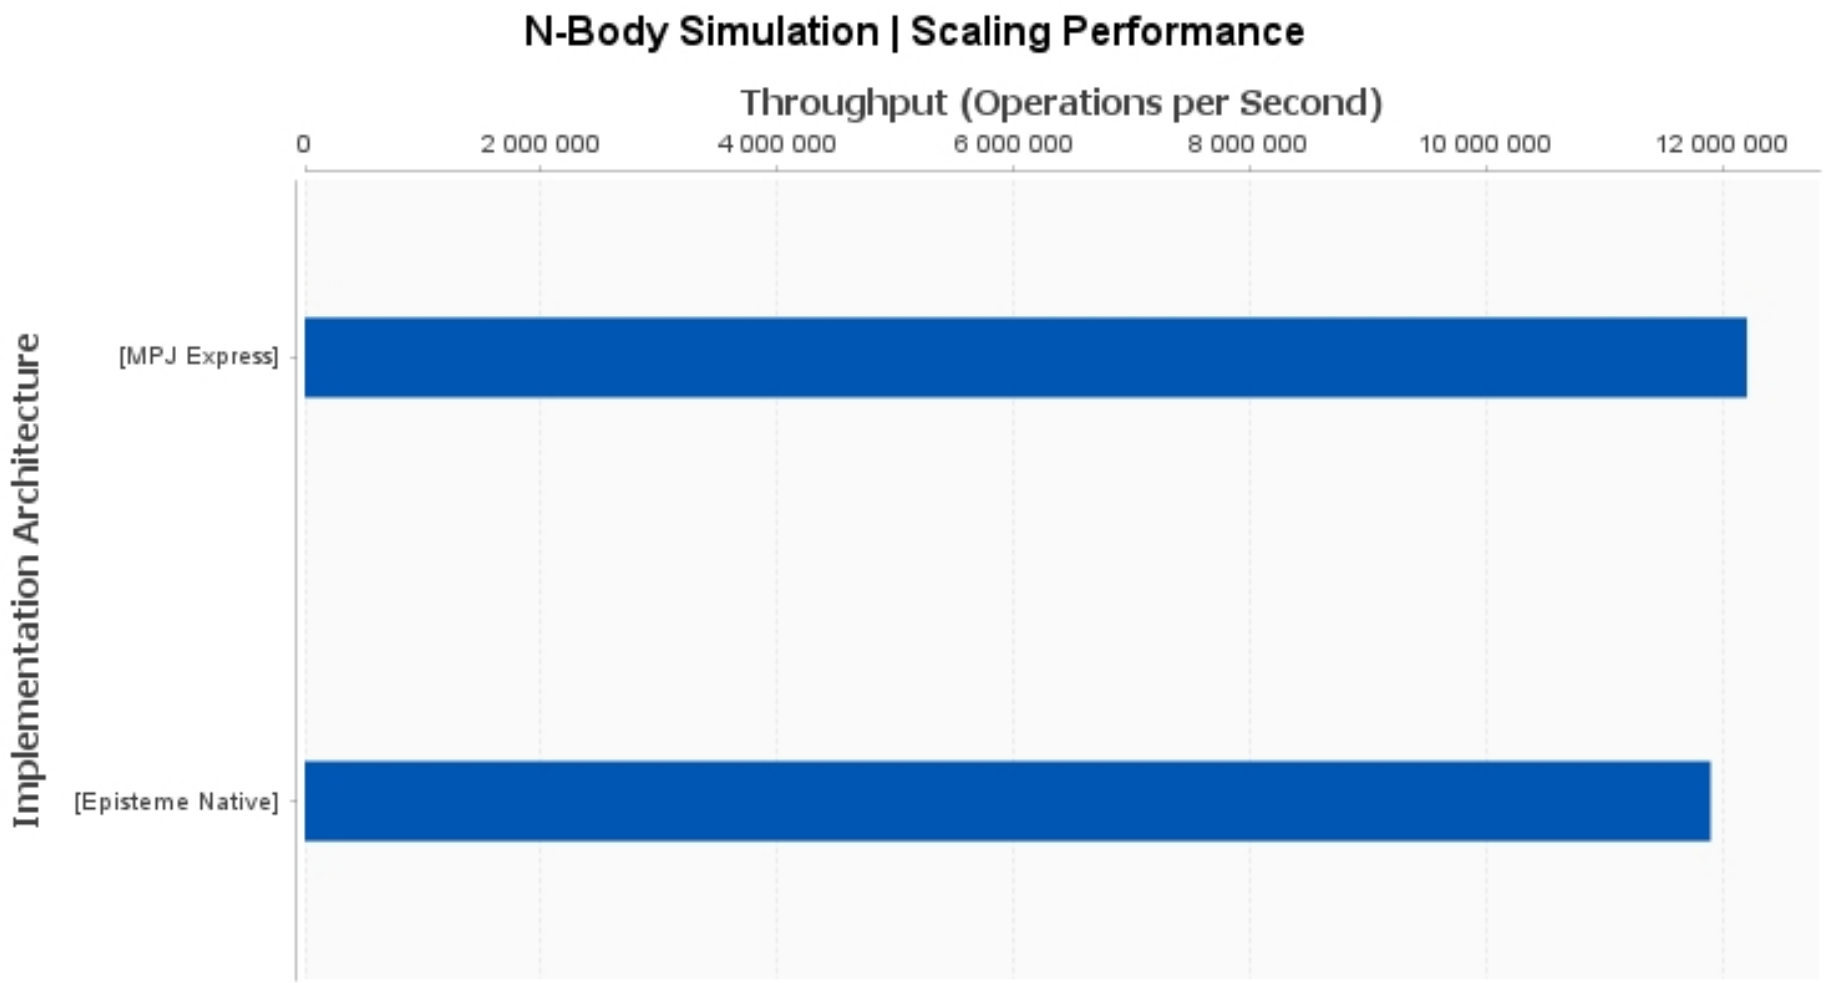
Monte Carlo Simulation



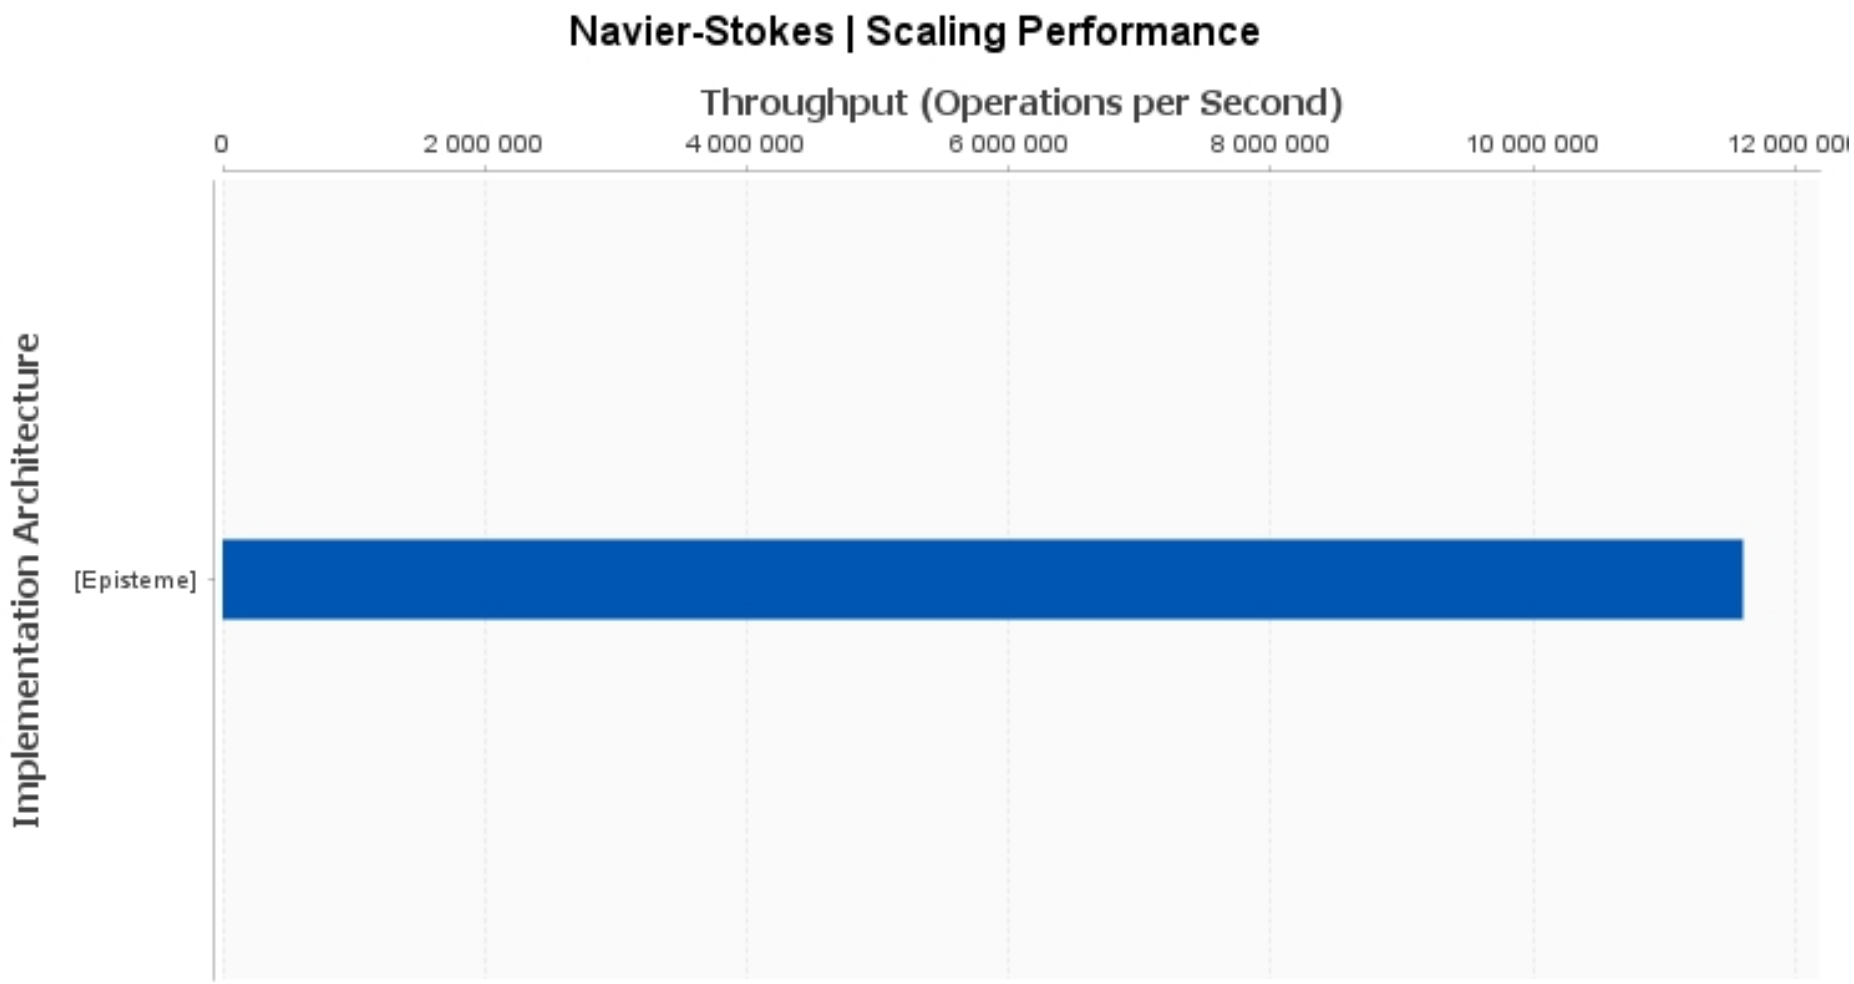
N-Body Simulation



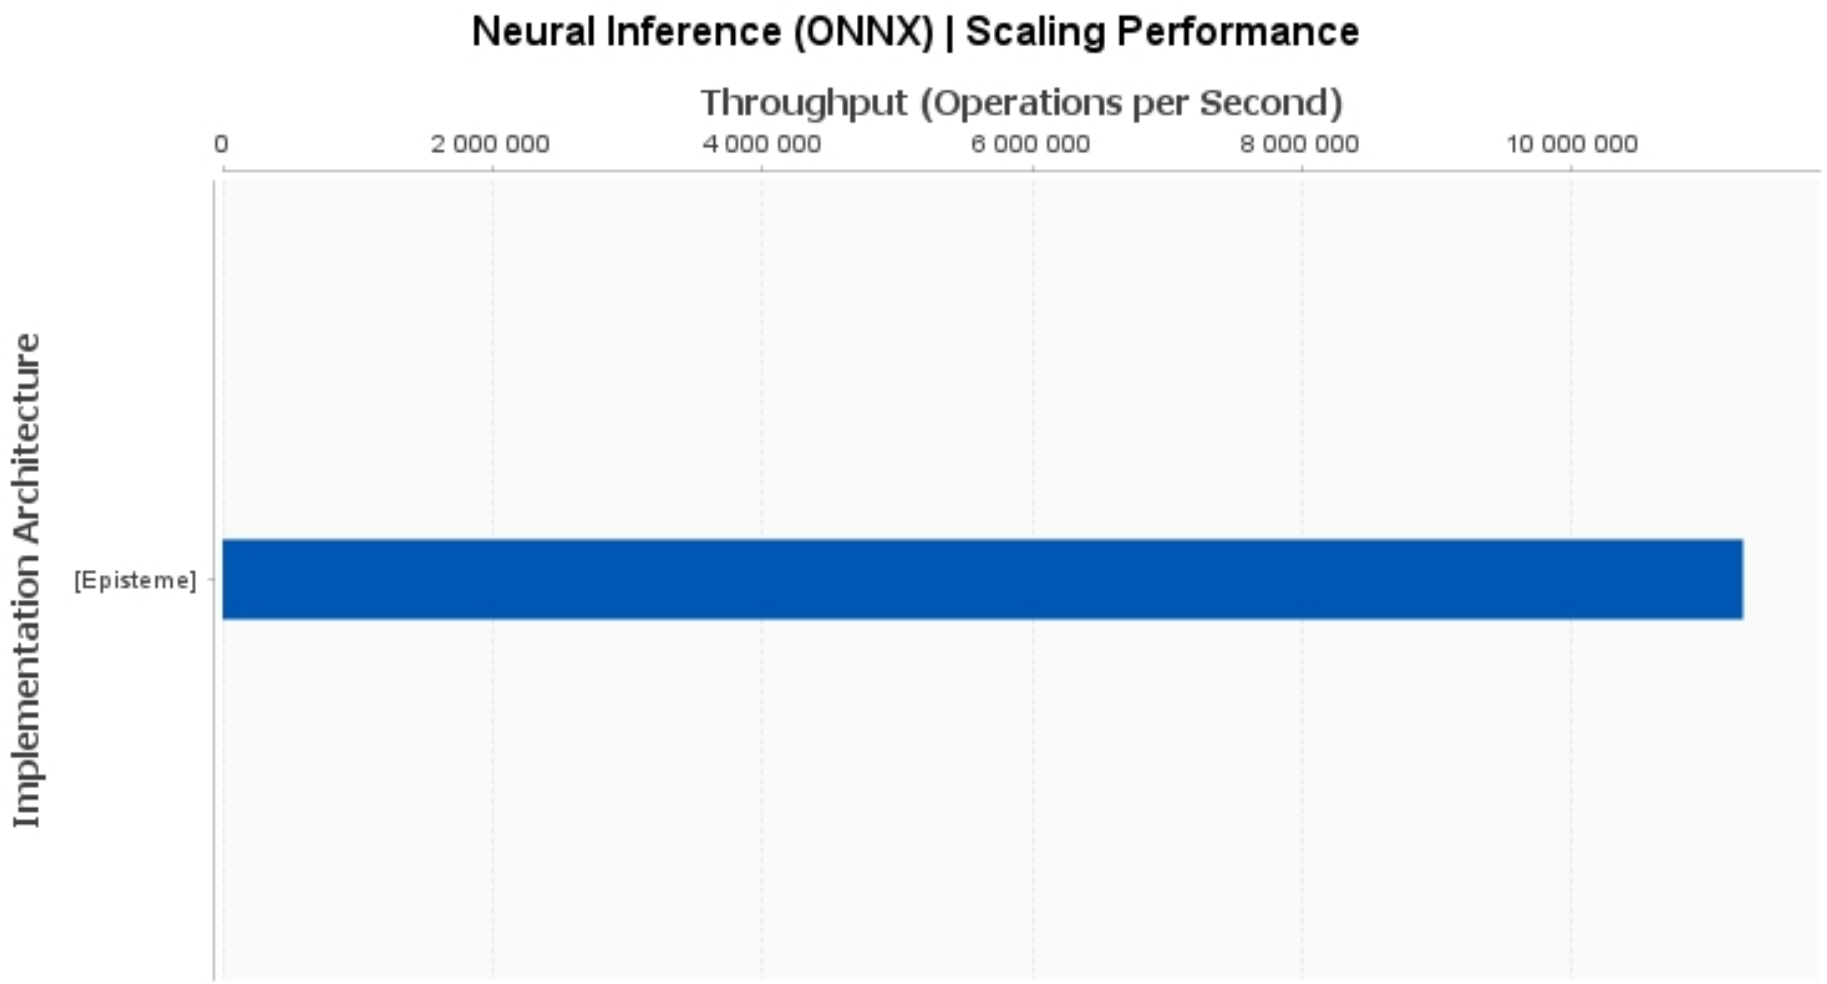
Navier-Stokes



Neural Inference (ONNX)

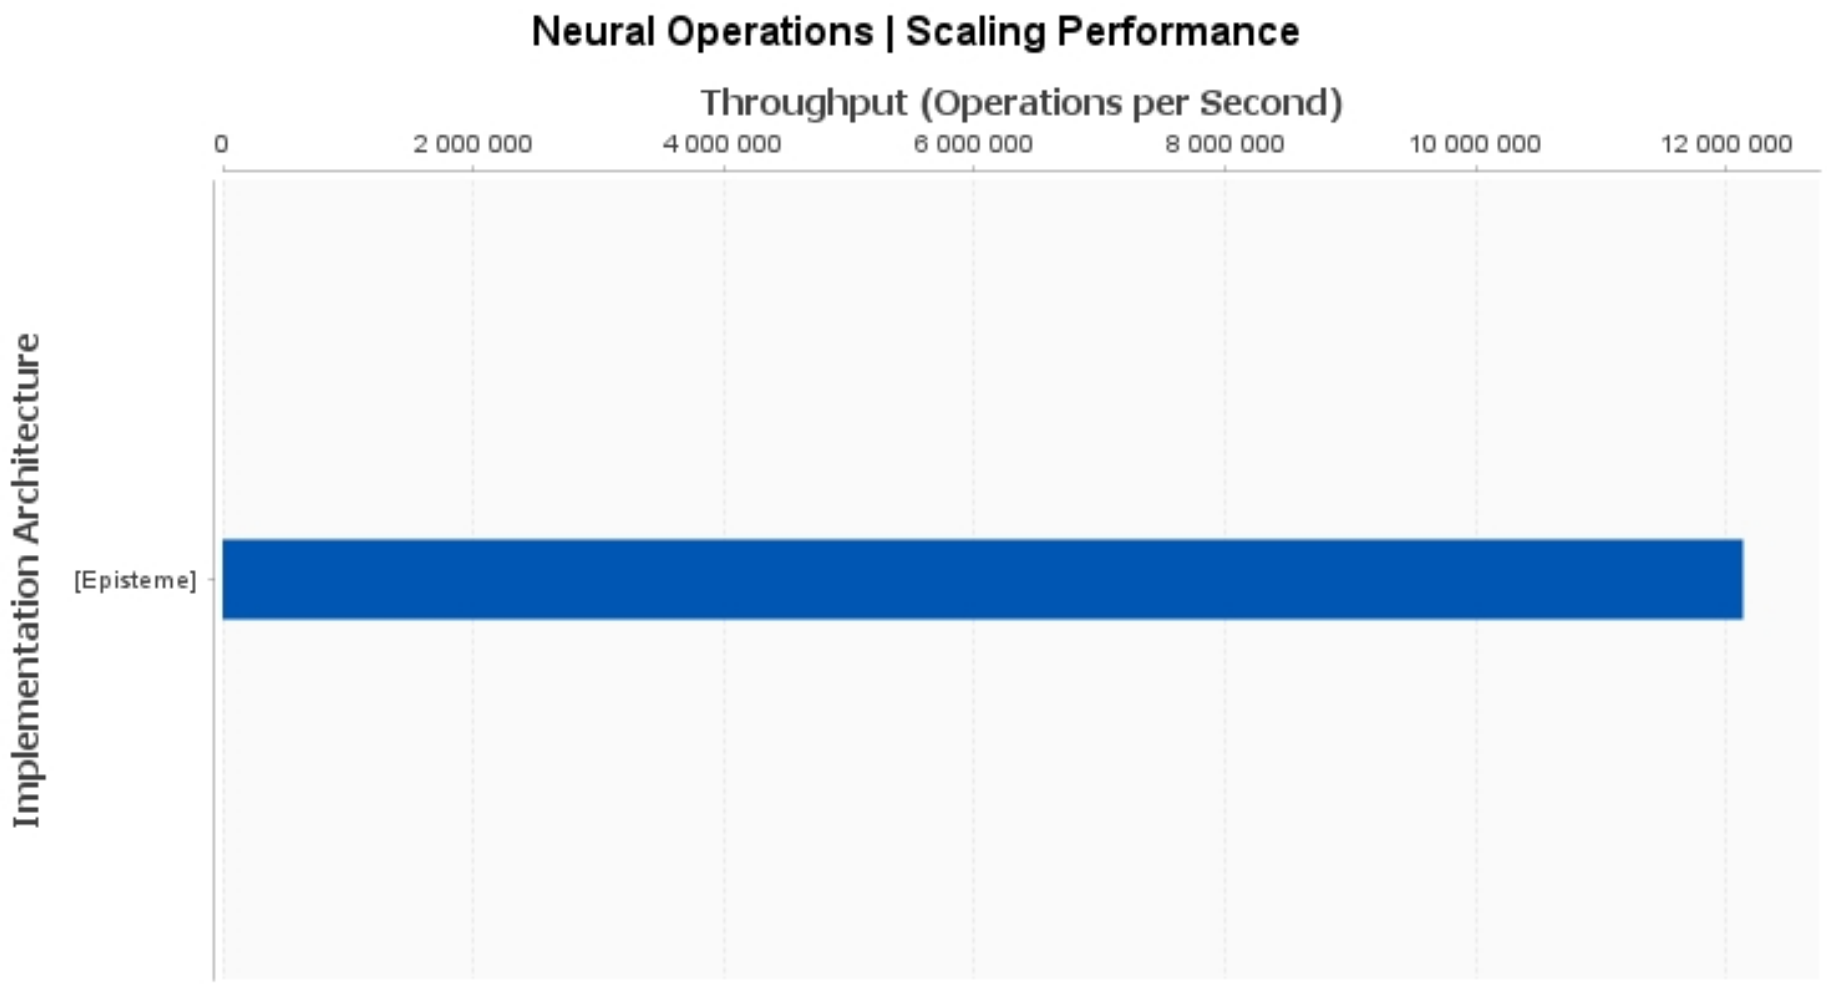


Neural Operations

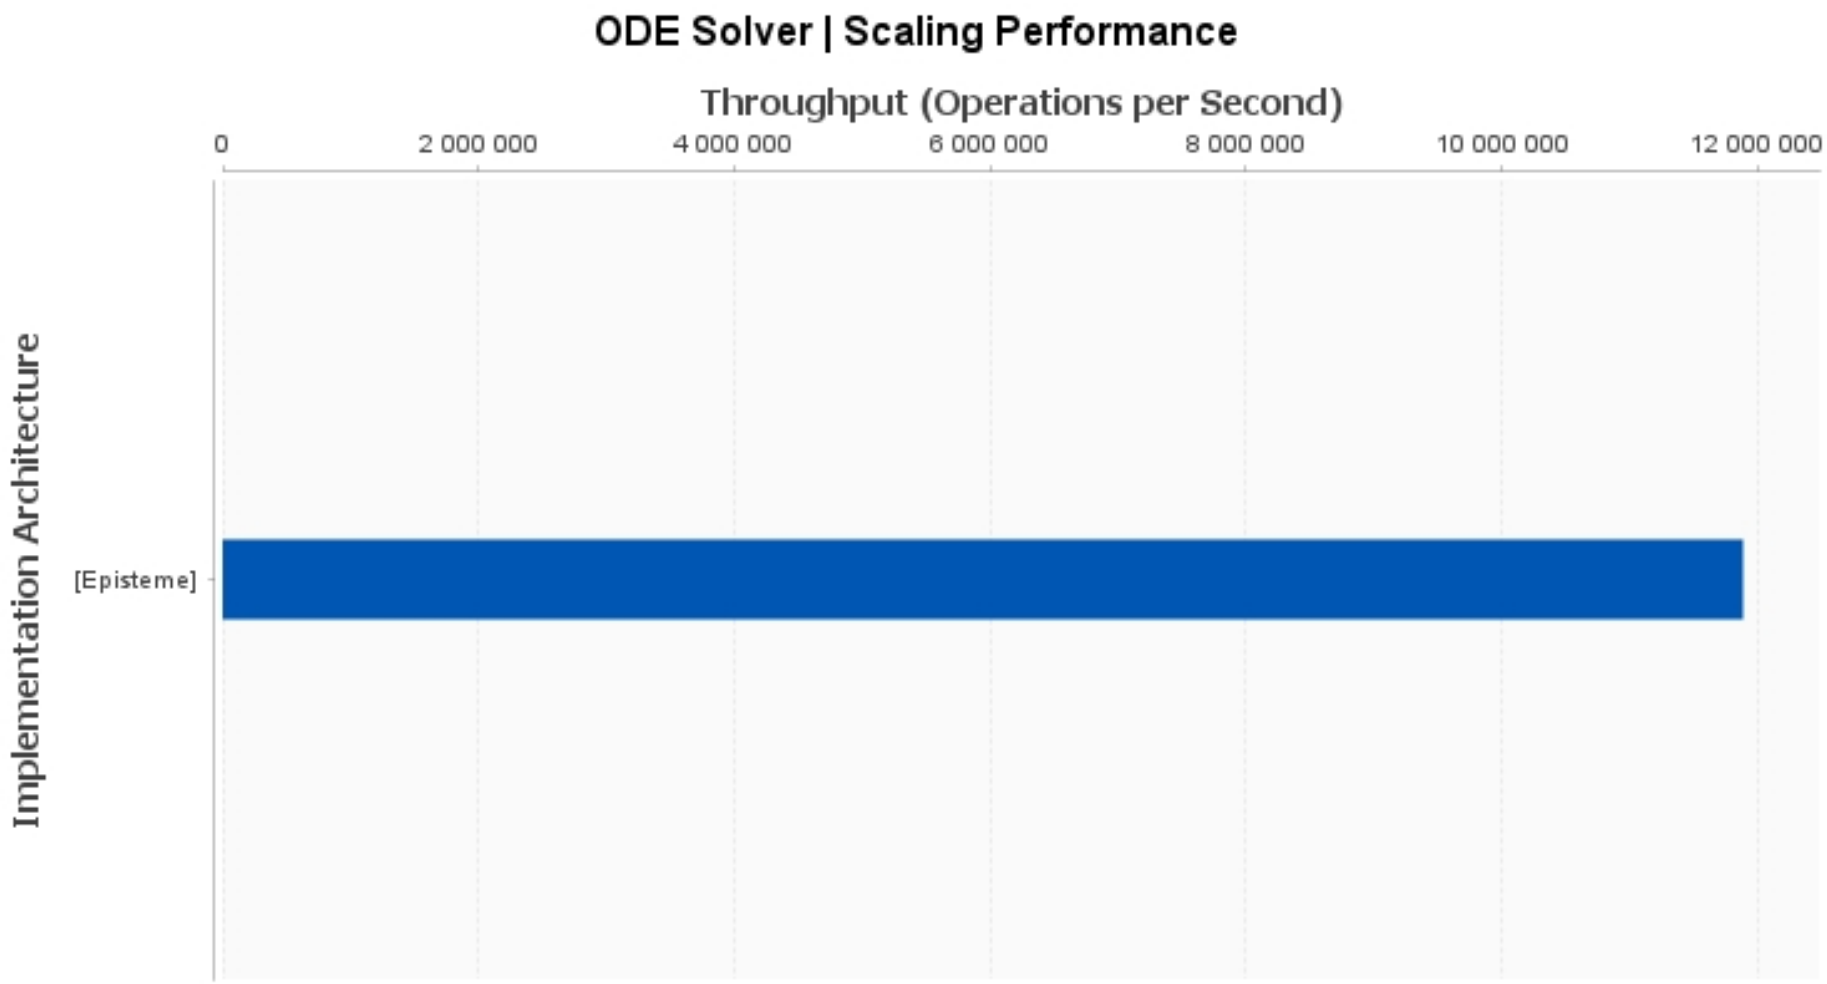


Neural Inference (ONNX) | Scaling Performance
Throughput (Operations per Second)
0
2 000 000
4 000 000
6 000 000
8 000 000
10 000 000
Implementation Architecture
[Episteme]

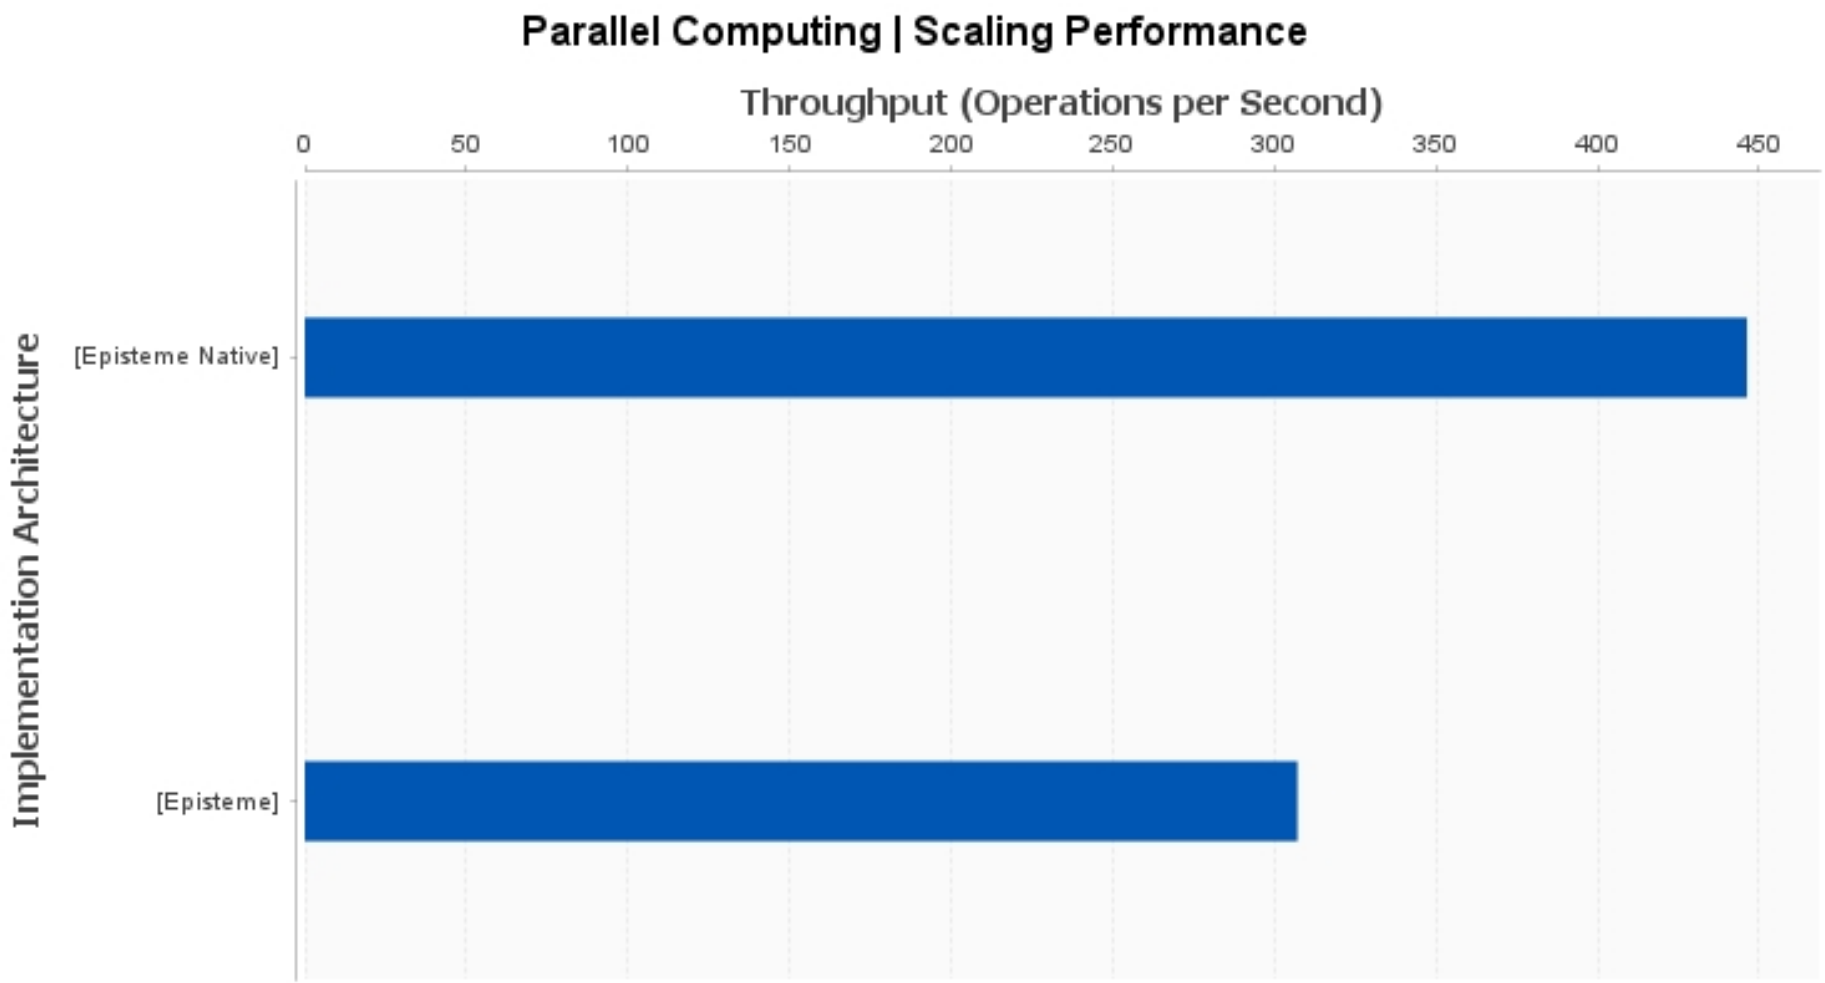
ODE Solver



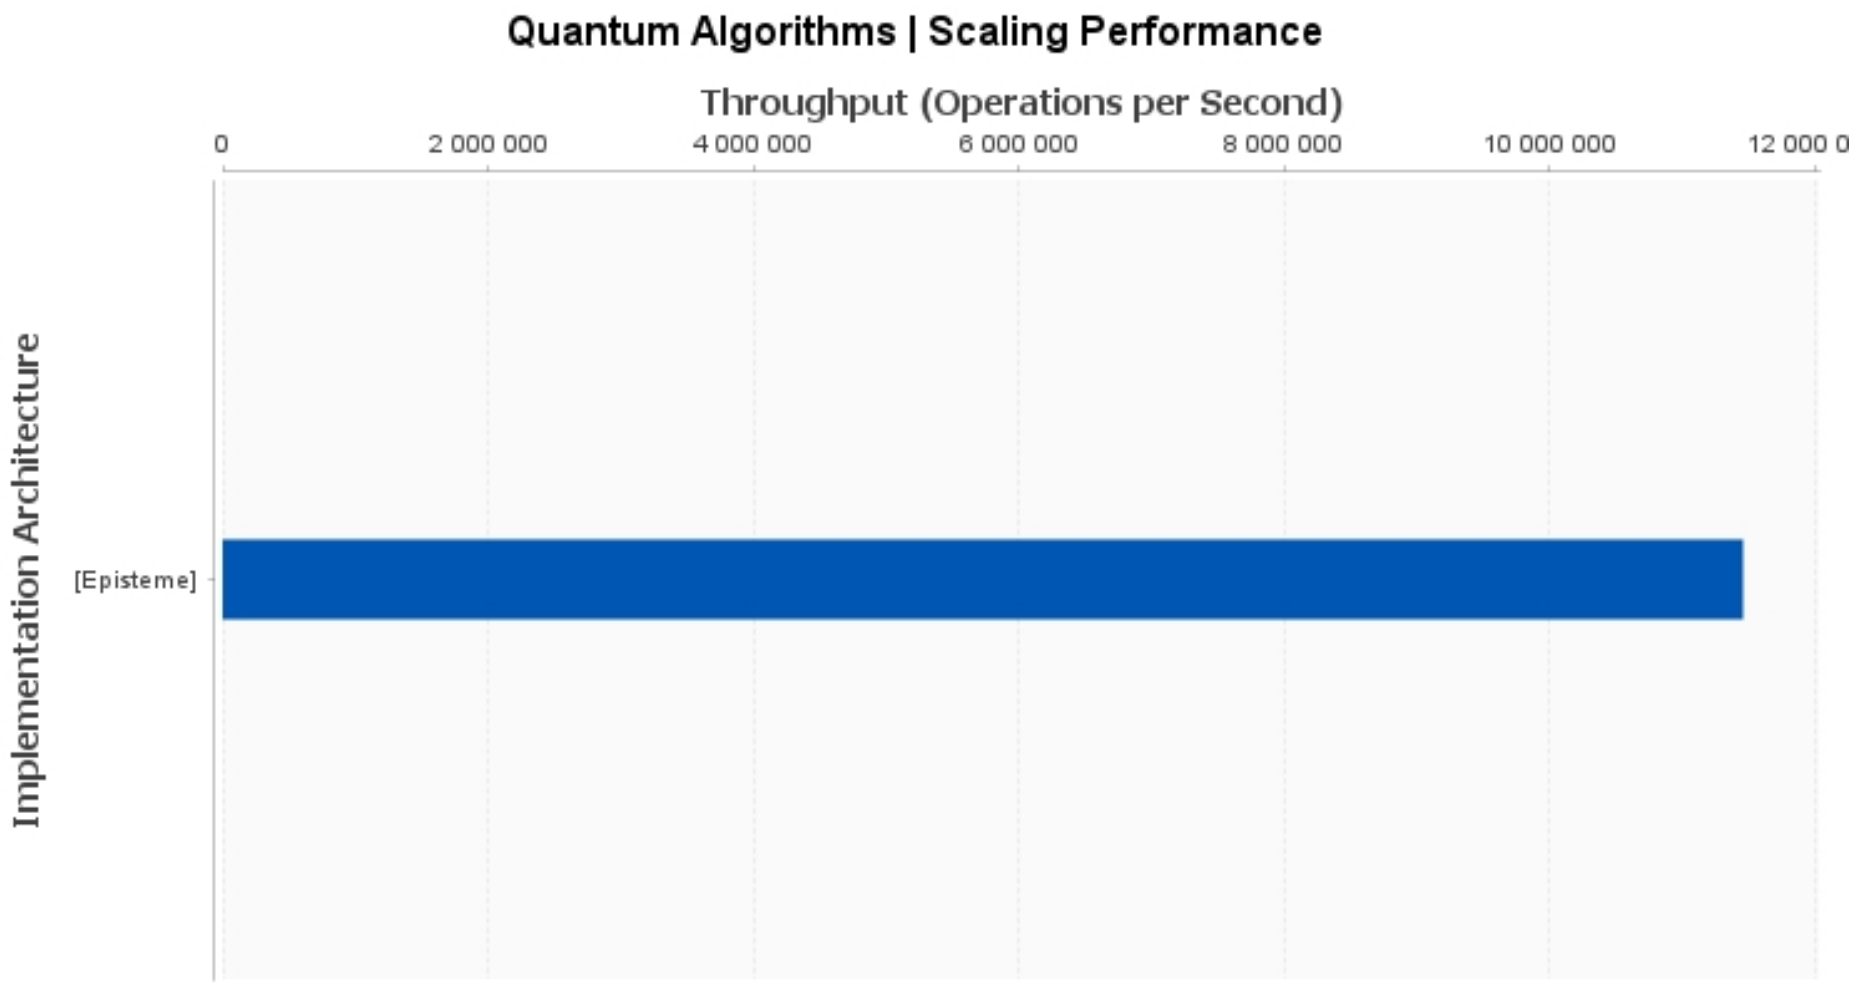
Parallel Computing



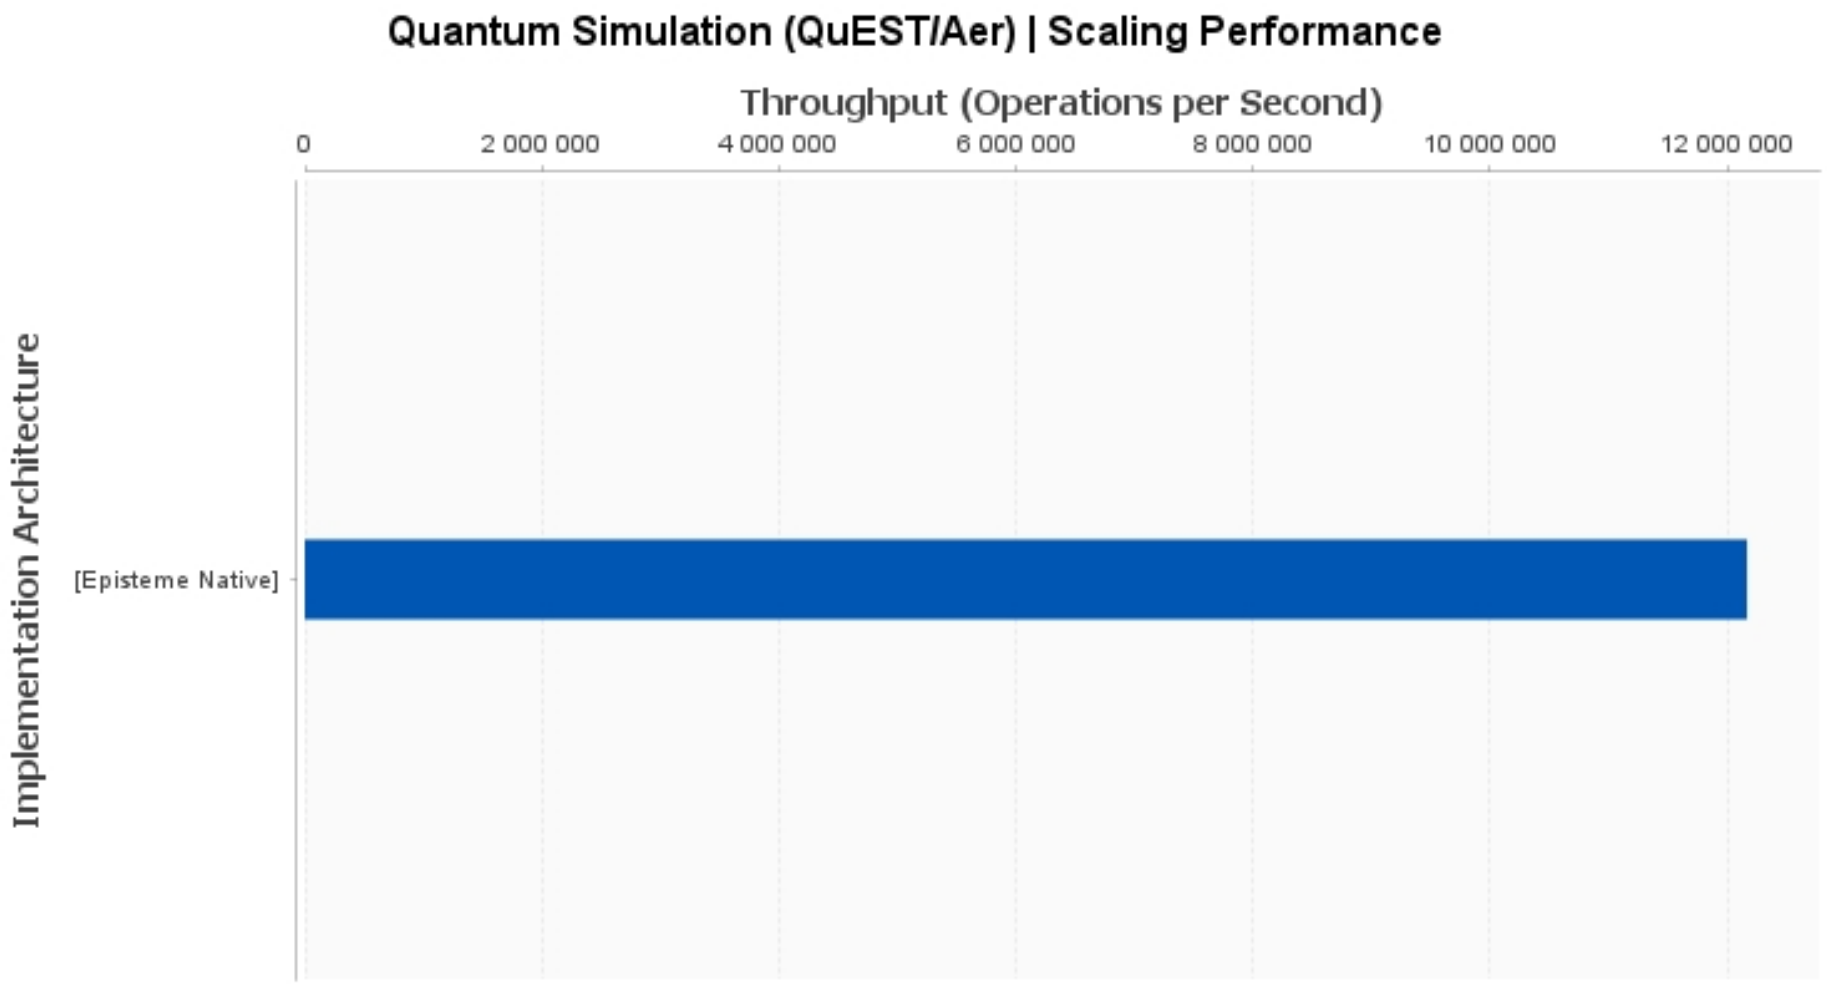
Quantum Algorithms



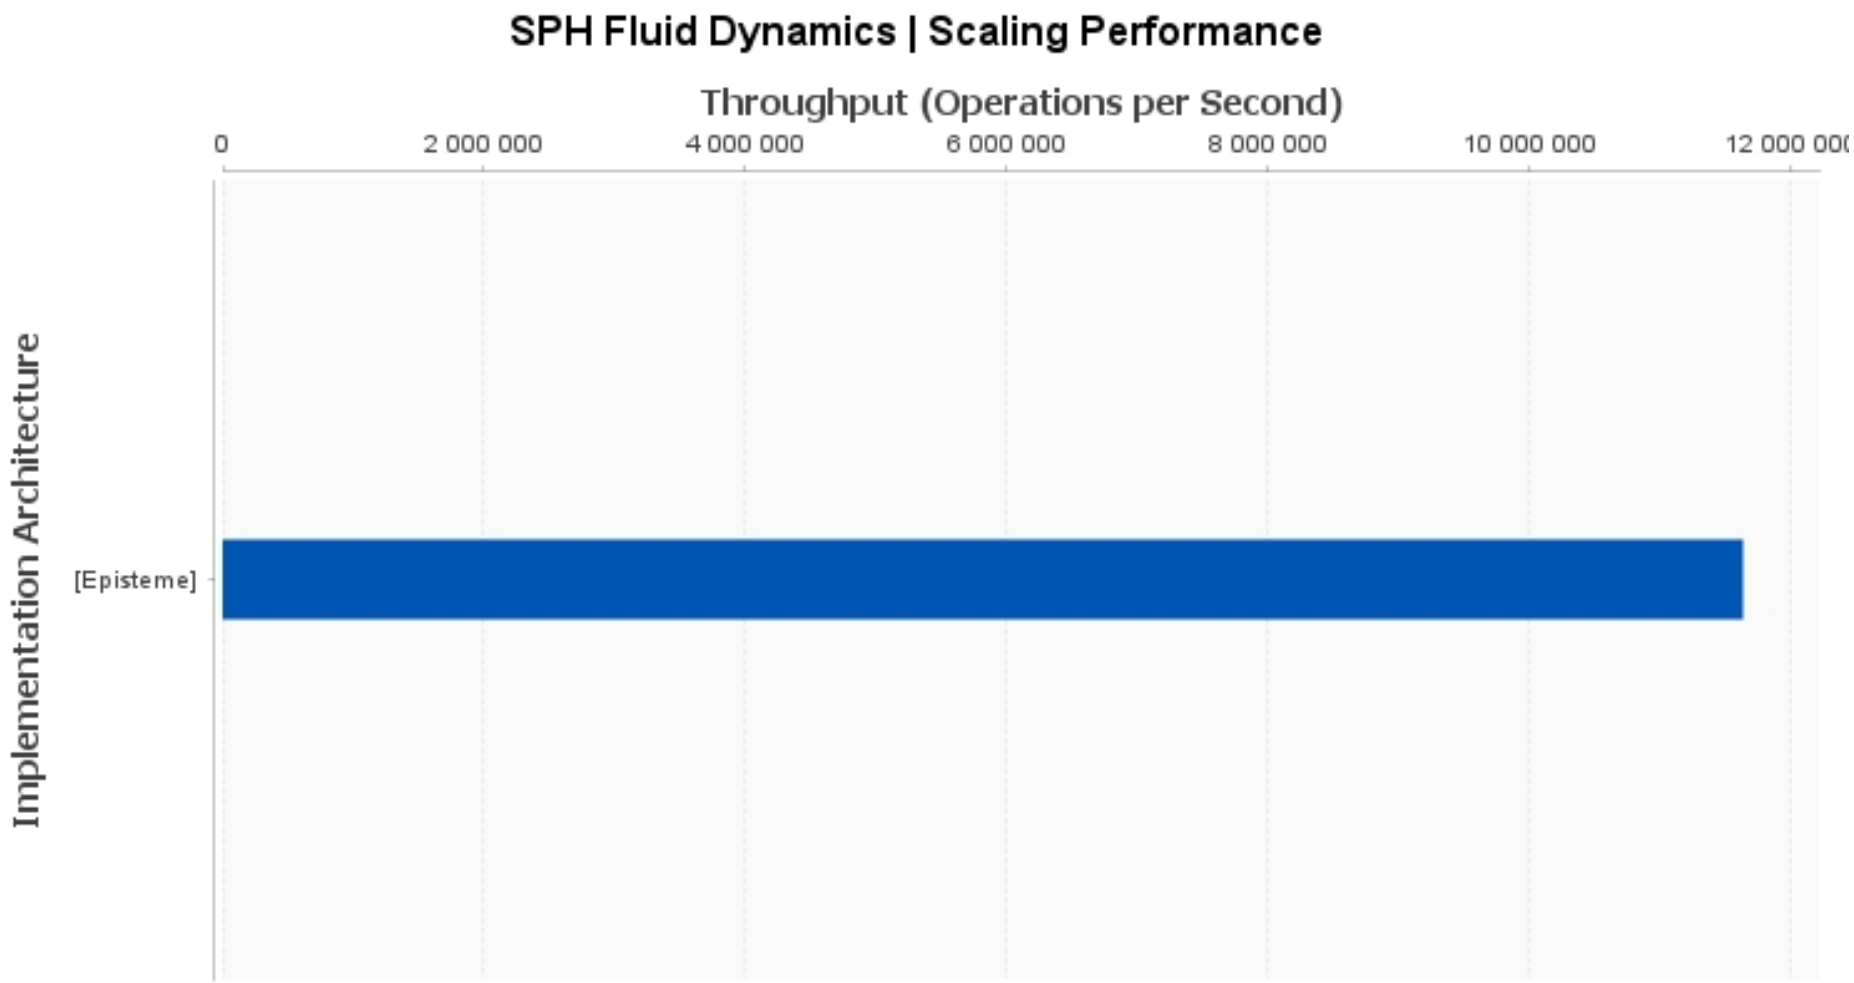
Quantum Simulation (QuEST/Aer)



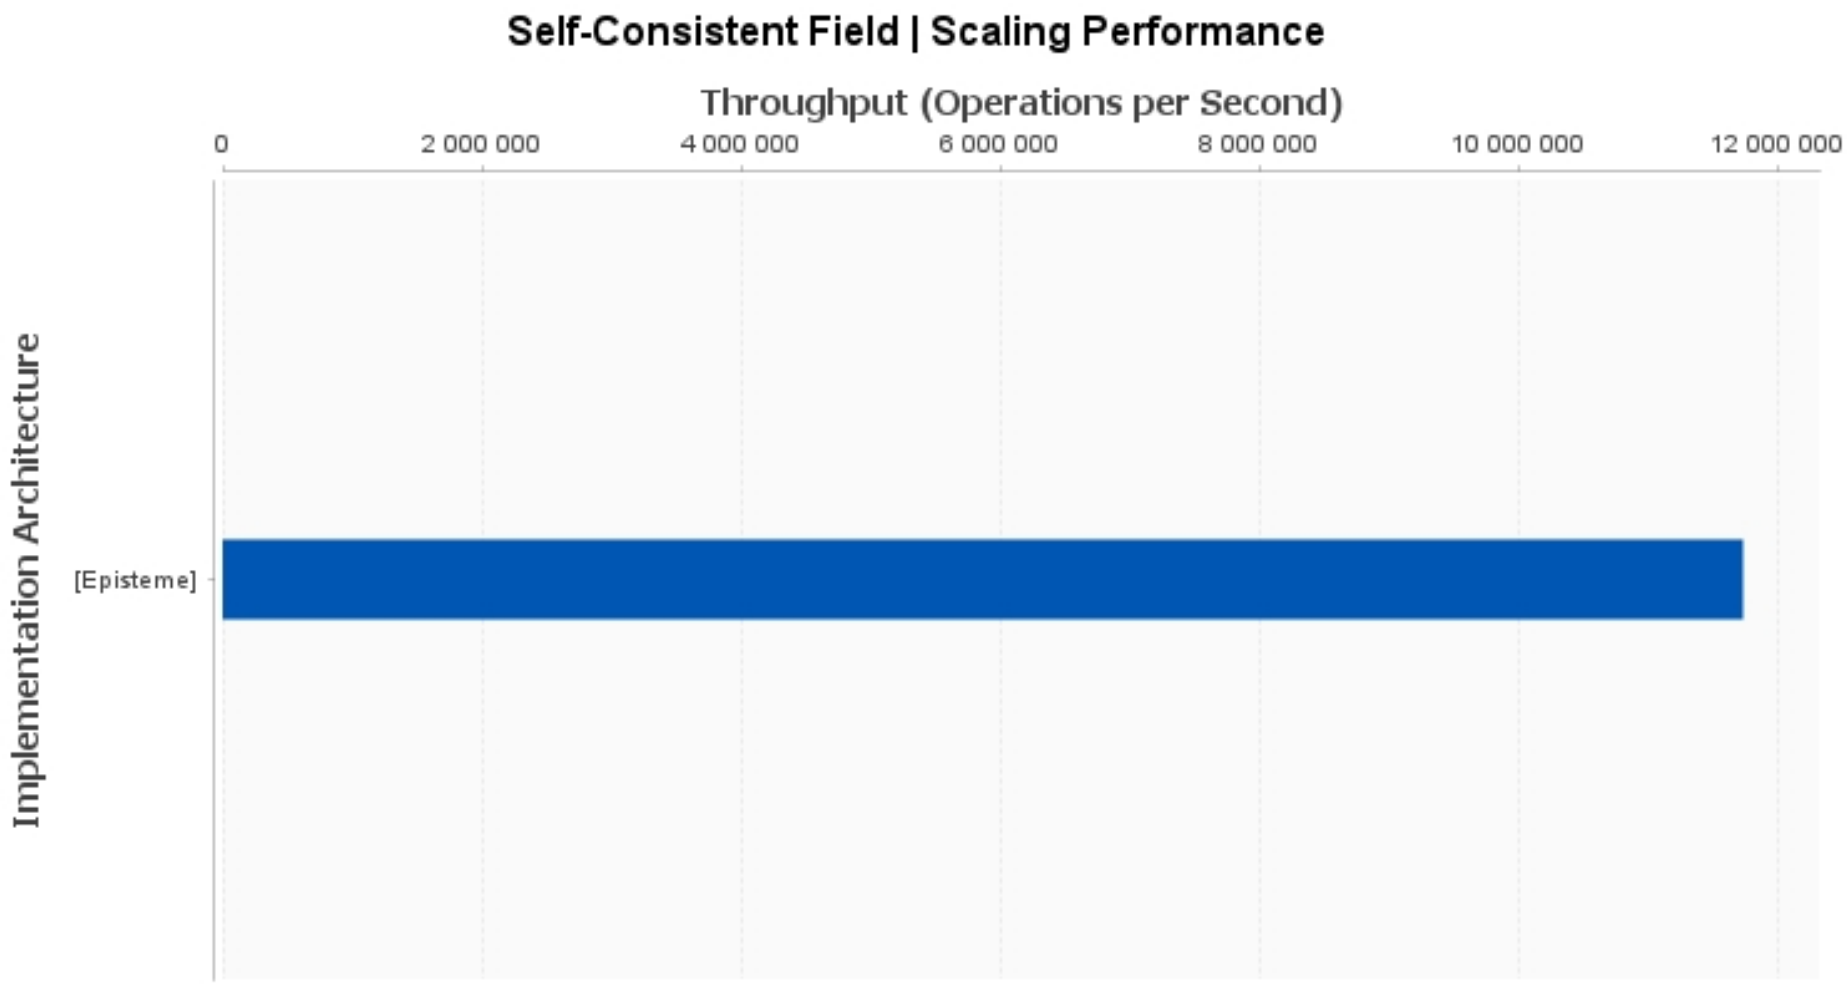
SPH Fluid Dynamics



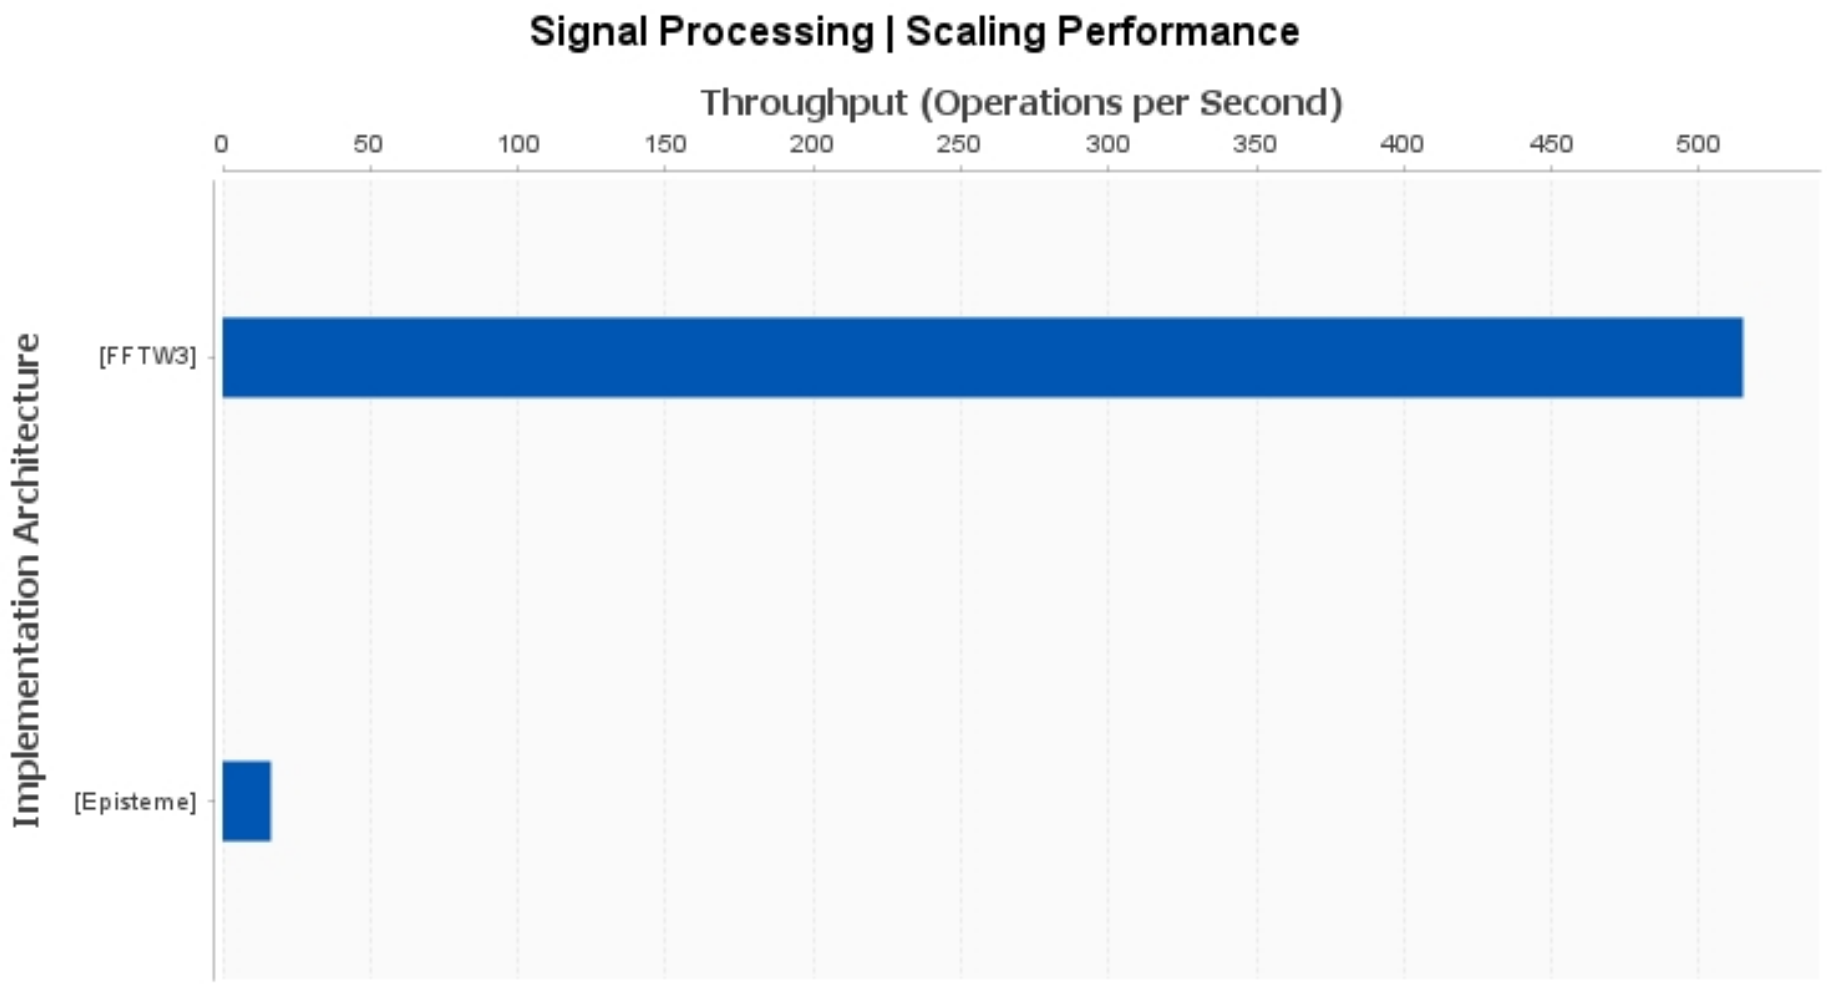
Self-Consistent Field



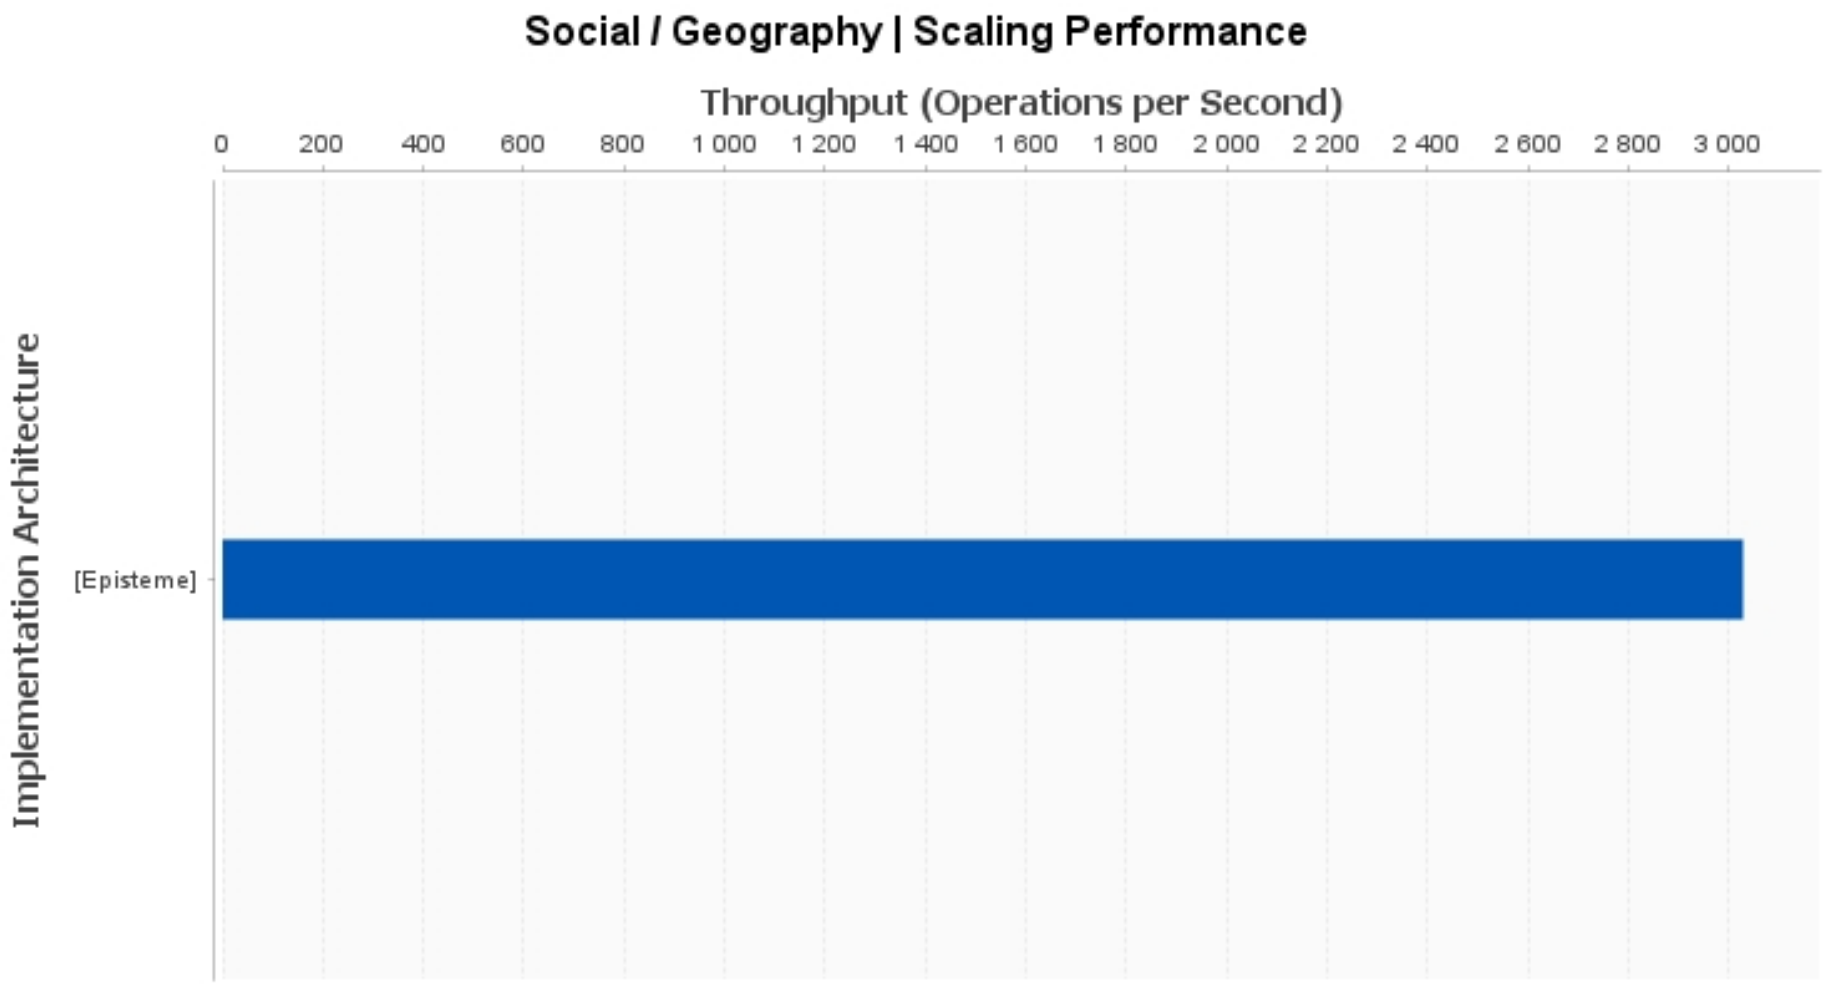
Signal Processing



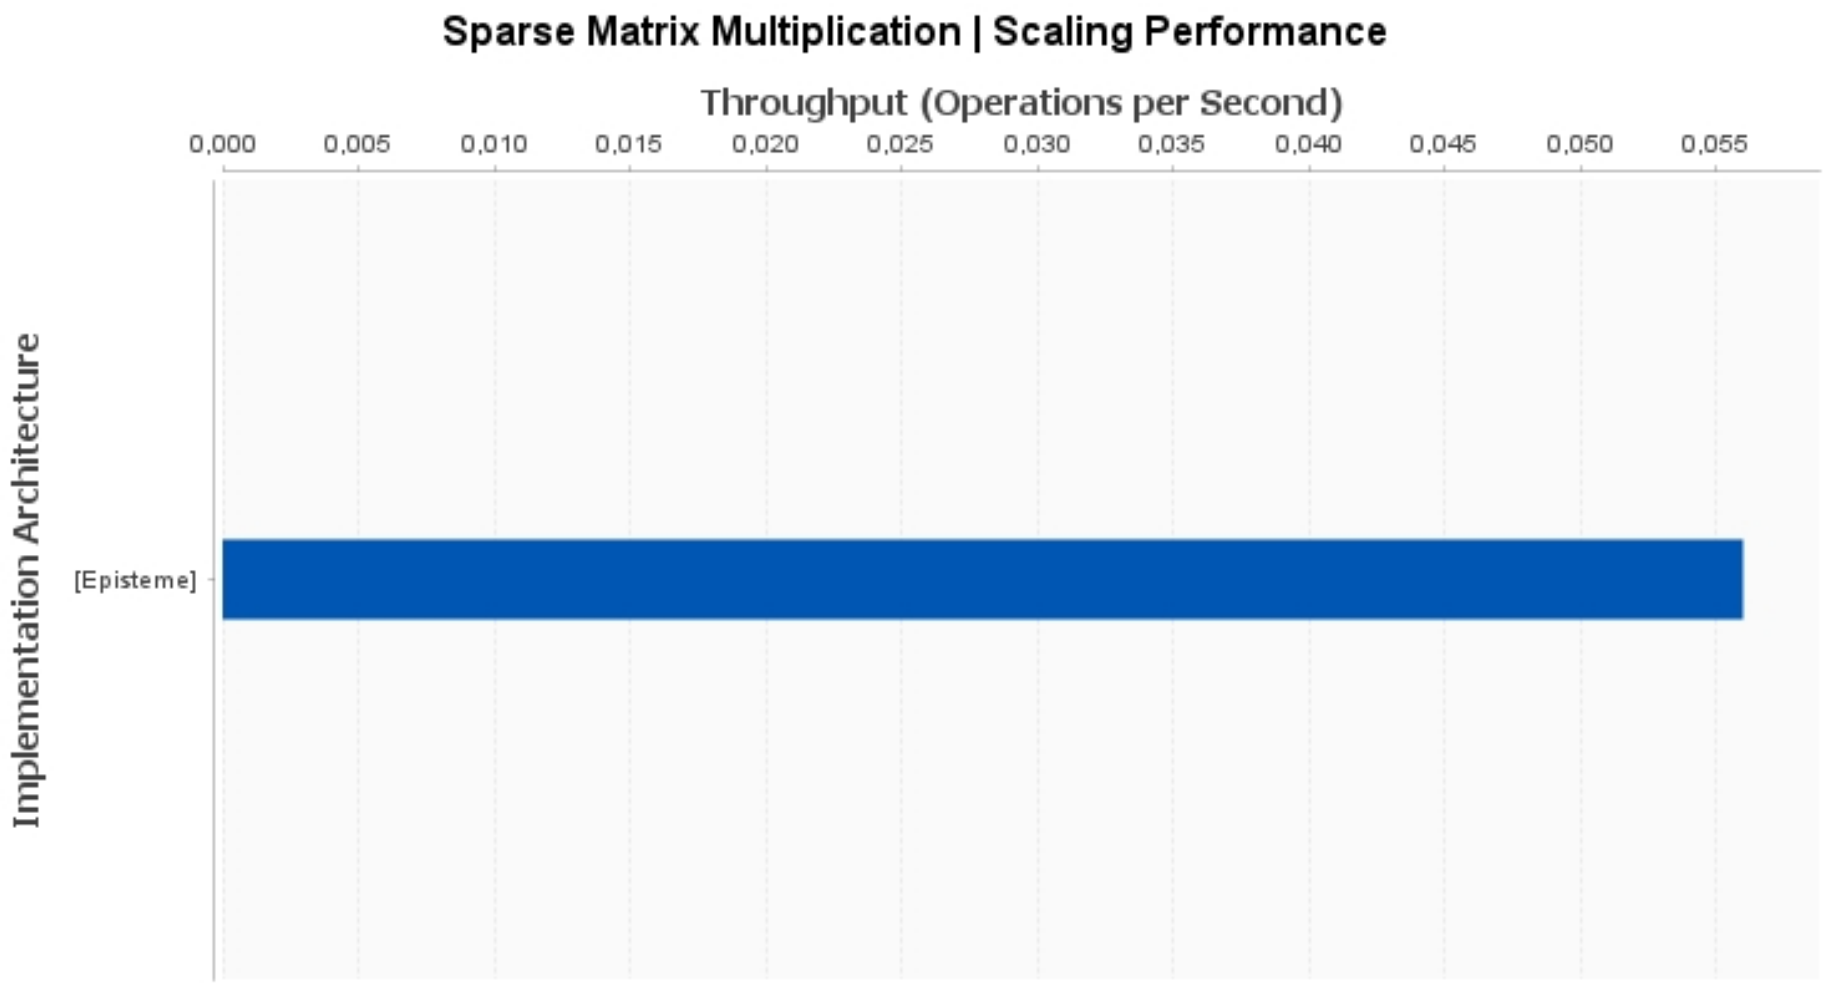
Social / Geography



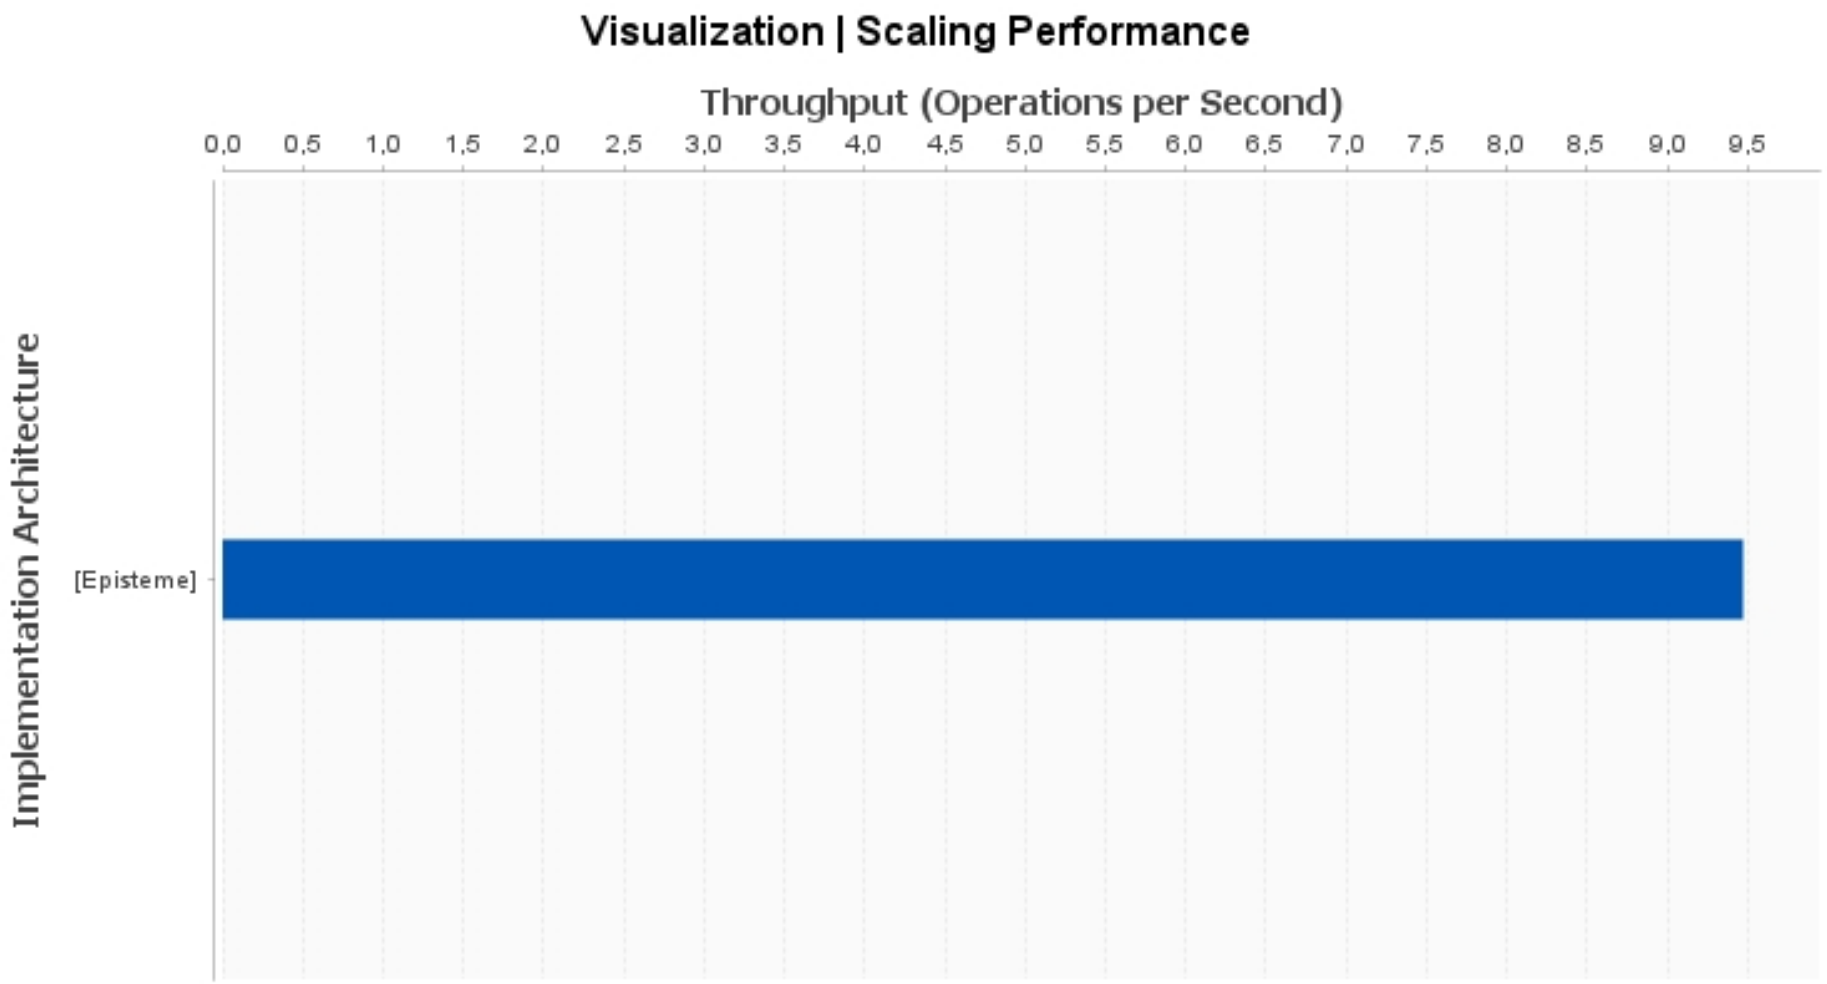
Sparse Matrix Multiplication



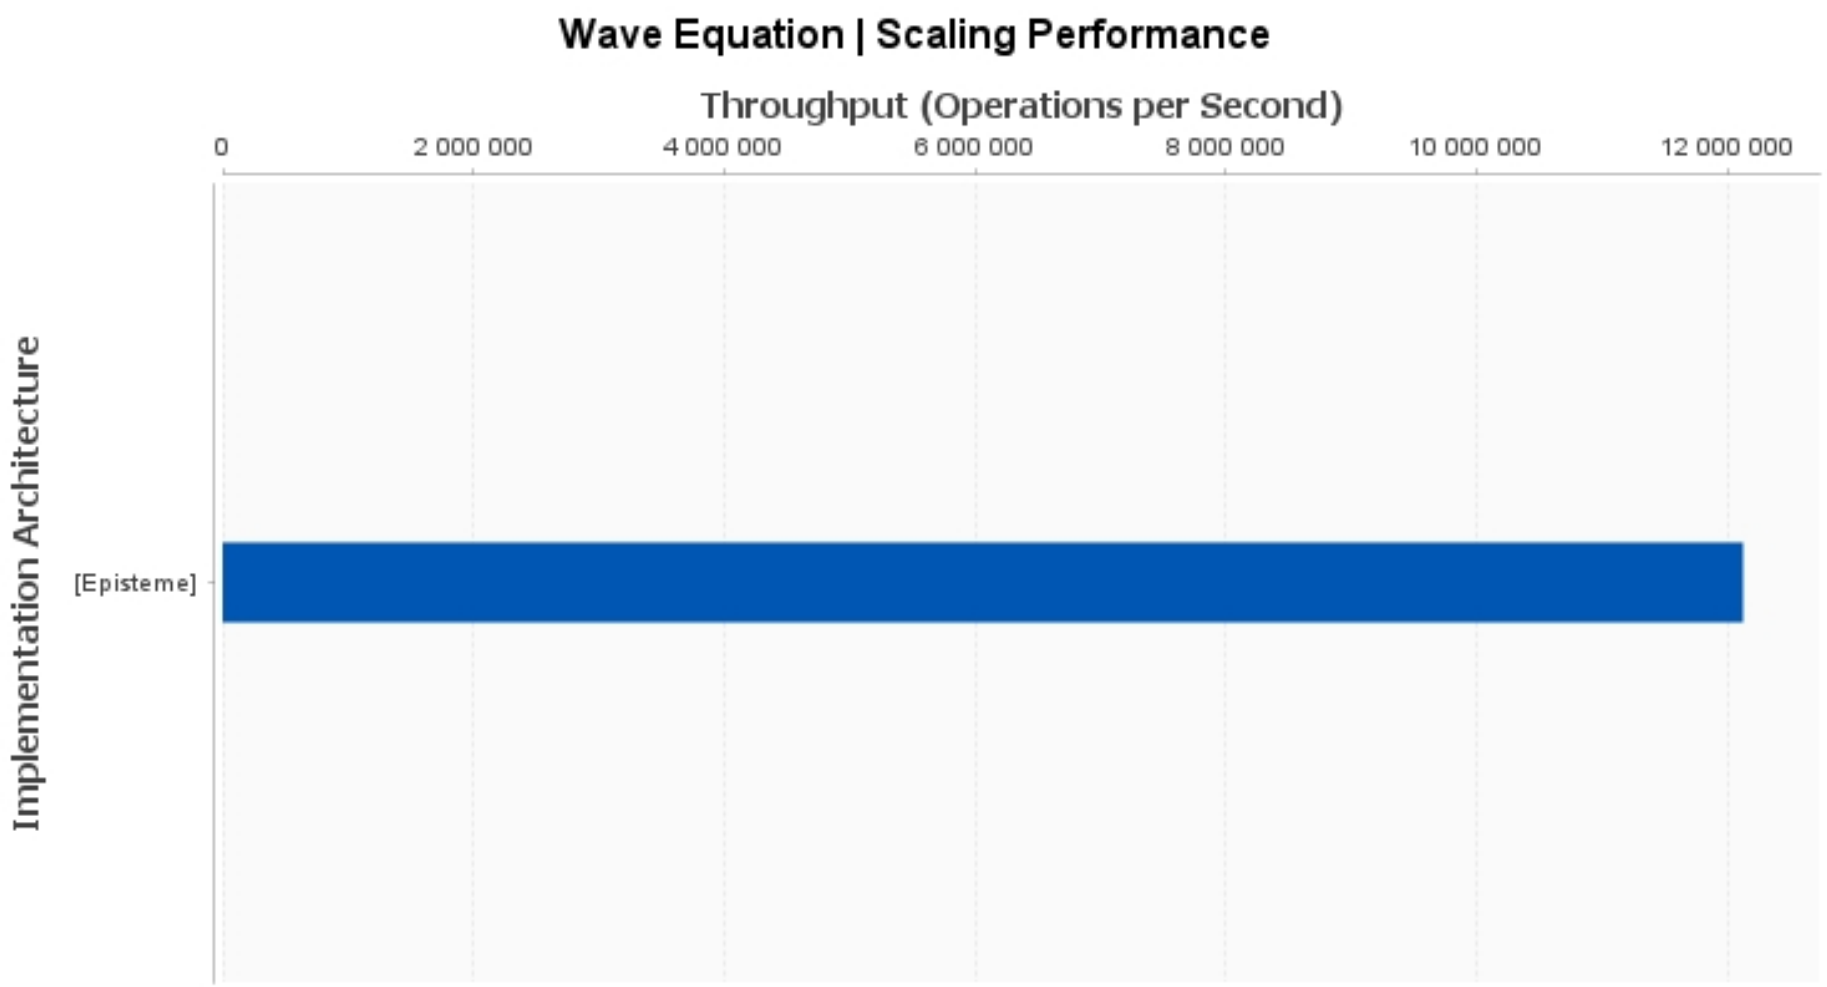
Visualization



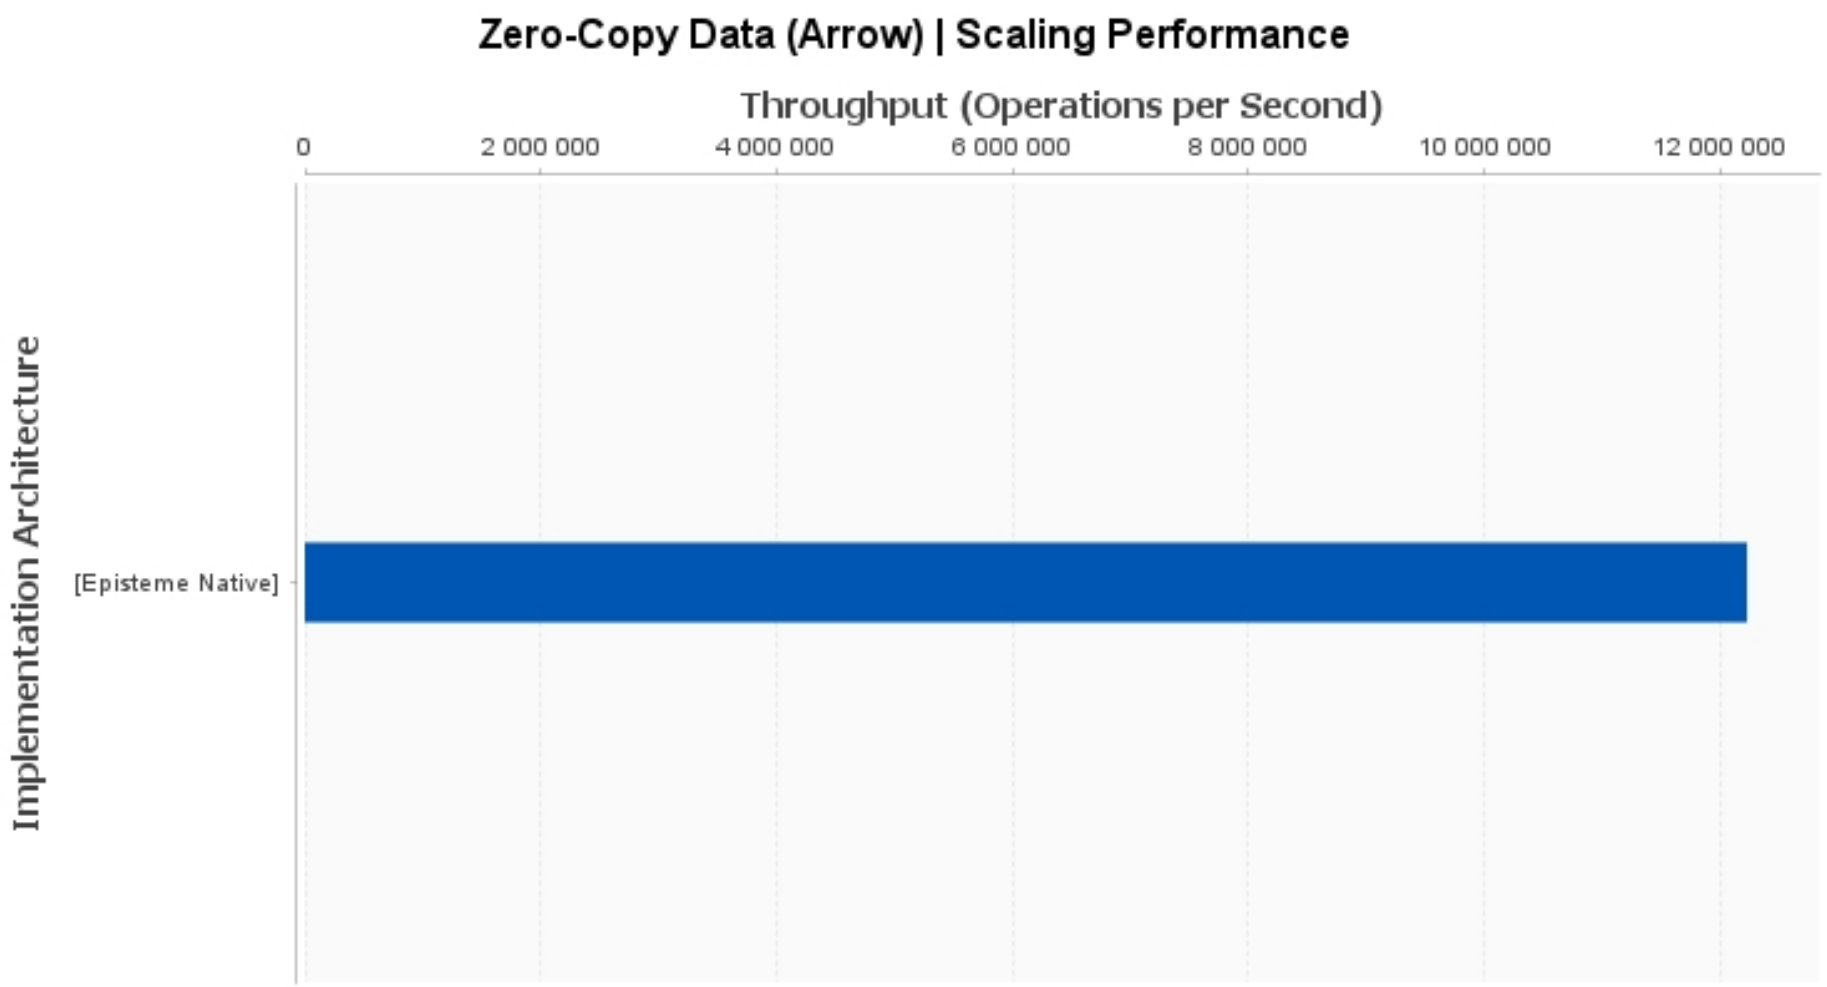
Wave Equation



Zero-Copy Data (Arrow)



Wave Equation | Scaling Performance
Throughput (Operations per Second)
0
2 000 000
4 000 000
6 000 000
8 000 000
10 000 000
12 000 000
Implementation Architecture
[Episteme]



Zero-Copy Data (Arrow) | Scaling Performance
Throughput (Operations per Second)
0
2 000 000
4 000 000
6 000 000
8 000 000
10 000 000
12 000 000
Implementation Architecture
[Episteme Native]
